Re: Fly Ash Reinjection Into NR 7 Boiler

Dear Mr. Hagan:

You are authorized to conduct a trial in which #5 power boiler fly ash is reinjected into #7 power boiler for a period not to exceed ten days. I understand that you desire to conduct this extended trial in order to collect enough ash samples at steady state conditions to determine if the composite ash is suitable as an aggregate supplement for concrete block.

Based on the results of a previous test, the district does not require particulate tests to be conducted during this trial. However visible emissions should be observed and should not exceed permitted limits.

In addition it is advisable to measure the total fly ash input to #7 boiler since the fly ash input rate would be required should you apply for a permit modification.

Please notify this office when you plan to commence the trial.

Sincerely,

Andrew G. Kutyna, P.E.
District Air Program
Administrator
