Purpose of Application

**Air Operation Permit Application**

This Application for Air Permit is submitted to obtain: (Check one)

- Initial Title V air operation permit for an existing facility which is classified as a Title V source.
- Initial Title V air operation permit for a facility which, upon start up of one or more newly constructed or modified emissions units addressed in this application, would become classified as a Title V source.

Current construction permit number: \_\_\_\_\_

- Title V air operation permit revision to address one or more newly constructed or modified emissions units addressed in this application.

Current construction permit number: \_\_\_\_\_

Operation permit number to be revised: \_\_\_\_\_

- Title V air operation permit revision or administrative correction to address one or more proposed new or modified emissions units and to be processed concurrently with the air construction permit application. (Also check Air Construction Permit Application below.)

Operation permit number to be revised/corrected: \_\_\_\_\_

- Title V air operation permit revision for reasons other than construction or modification of an emissions unit. Give reason for the revision; e.g., to comply with a new applicable requirement or to request approval of an "Early Reductions" proposal.

Operation permit number to be revised: \_\_\_\_\_

Reason for revision: \_\_\_\_\_

**Air Construction Permit Application**

This Application for Air Permit is submitted to obtain: (Check one)

- Air construction permit to construct or modify one or more emissions units.
- Air construction permit to make federally enforceable an assumed restriction on the potential emissions of one or more existing, permitted emissions units.
- Air construction permit for one or more existing, but unpermitted, emissions units.

**Air Open Burning Permit Application**

- Temporary Air Open Burning Permit pursuant to paragraph 403.061(18), FS, Research, and Rule 62-256.256.256.600(1), Emergency Response.

DEP Form No. 62-210.900(1) - Form  
Effective: 2/11/99

**Owner/Authorized Representative or Responsible Official**

1. Name and Title of Owner/Authorized Representative or Responsible Official: John C. Folks, Environmental Administrator
2. Owner/Authorized Representative or Responsible Official Mailing Address: Organization/Firm: DACS Office of Agriculture Water Policy Street Address: 1203 Governor's Square Blvd City: Tallahassee State: FL Zip Code: 32301
3. Owner/Authorized Representative or Responsible Official Telephone Numbers: Telephone: (850) 414 - 9928 Fax: (850) 921 - 2153
4. Owner/Authorized Representative or Responsible Official Statement: <i>I, the undersigned, am the owner or authorized representative (check here [ X ], if so) or the responsible official (check here [ ], if so) of the Title V source addressed in this application, whichever is applicable. I hereby certify, based on information and belief formed after reasonable inquiry, that the statements made in this application are true, accurate and complete and that, to the best of my knowledge, any estimates of emissions reported in this application are based upon reasonable techniques for calculating emissions. The air pollutant emissions units and air pollution control equipment described in this application will be operated and maintained so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof. I understand that a permit, if granted by the Department, cannot be transferred without authorization from the Department, and I will promptly notify the Department upon sale or legal transfer of any permitted emissions unit.</i>
Signature:  Date: 4/16/02

4. Professional Engineer Statement:

I, the undersigned, hereby certify, except as particularly noted herein\*, that:

(1) To the best of my knowledge, there is reasonable assurance that the air pollutant emissions unit(s) and the air pollution control equipment described in this Application for Air Permit, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in the Florida Statutes and rules of the Department of Environmental Protection; and

(2) To the best of my knowledge, any emission estimates reported or relied on in this application are true, accurate, and complete and are either based upon reasonable techniques available for calculating emissions or, for emission estimates of hazardous air pollutants not regulated for an emissions unit addressed in this application, based solely upon the materials, information and calculations submitted with this application.

If the purpose of this application is to obtain a Title V source air operation permit (check here [ NA ], if so), I further certify that each emissions unit described in this Application for Air Permit, when properly operated and maintained, will comply with the applicable requirements identified in this application to which the unit is subject, except those emissions units for which a compliance schedule is submitted with this application.

If the purpose of this application is to obtain an air construction permit for one or more proposed new or modified emissions units (check here [ NA ], if so), I further certify that the engineering features of each such emissions unit described in this application have been designed or examined by me or individuals under my direct supervision and found to be in conformity with sound engineering principles applicable to the control of emissions of the air pollutants characterized in this application.

If the purpose of this application is to obtain an initial air operation permit or operation permit revision for one or more newly constructed or modified emissions units (check here [ NA ], if so), I further certify that, with the exception of any changes detailed as part of this application, each such emissions unit has been constructed or modified in substantial accordance with the information given in the corresponding application for air construction permit and with all provisions contained in such permit.

\* Attach any exception to certification statement.

[See Application Comment]

**Construction/Modification Information**

1. Description of Proposed Project or Alterations:	
<p>An air curtain incinerator (ACI) will be used in a remote area to test burn dead cattle and poultry, to determine if the use of an ACI, with and without supplemental gelled diesel fuel, is a safe and effective way of cremating infected animals in an emergency situation to stop the spread of disease and protect both livestock and public health.</p> <p>During the test burns that will be conducted with a five-day period, the DACS project manager (Frank Leteux), the ACI provider/operator (Gary Ford), and the permit certifying PE (Steve Smallwood) will be onsite to supervise the conduct of the test burns. A test burn will not proceed until all three agree that the ACI is ready, the test carcasses are properly prepared and ready to be loaded into the ACI unit, and it is safe to proceed. If at any time, during a test burn, any one of the three determine that the operation is (or is becoming) unsafe, the test burn will be terminated as quickly and as safely as possible. During some of the test burns, special emissions tests may be conducted. If so, the test supervisor will participate in the decision to initiate and terminate the test burn.</p> <p>The ACI will be properly operated and never over-loaded at any time during any of the test burns. The ACI will be sloped to contain all fluids that may accumulate in the ACI to prevent any ground contamination.</p> <p>See the attached test burn project description for a more detailed description of the planned test burns.</p>	
2. Projected or Actual Date of Commencement of Construction:	NA
3. Projected Date of Completion of Construction:	NA

**Application Comment**

This is a special air open burning permit application. The PE certification that applies to Chapter 403 F.S. air construction and air operation permit applications does not apply to this application.

The first paragraph of the standard PE certification does generally apply: "(1) To the best of my knowledge, there is reasonable assurance that the air pollutant emissions unit(s) and the air pollution control equipment described in this Application for Air Permit, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in the Florida Statutes and rules of the Department of Environmental Protection."

The second paragraph of the standard PE certification does not apply in this case because no emissions estimates are required or provided as part of this research testing application. The test may result in data that will be useful in developing emissions estimates for this kind of burning in the future.

The remaining provisions of the standard PE certification only apply to Chapter 403 F.S. air construction and air operation permit applications.

I have reviewed the plans for the test burns with the DACS project manager and the ACI provider/operator. Animals have been safely burned in ACI's using clean dry wood fuel, and on the ground with gelled fuel. One or more of the test burns of this project will test the use of gelled fuel with clean dry wood in an ACI. I have concluded that the test can be conducted safely and the use of gelled fuel may be a quick and effective way of cremating infected animals in emergency situation. The ACI will not be over-loaded with carcasses during the tests.

Dear Mr. Lefeux,

Here are the codes to be used to transfer funds for the air operation permit (AO) processing fee (please call Becky Ajhar on any questions regarding the fee transfer). The processing fee for the AO pursuant to Rule 52-4.050(4)(a)3.c., F.A.C., is \$750.00. If there any other questions; please give me a call at 413-9198.

Bruce Mitchell
