**Re: ECC International Corporation
Request for Variance Renewal, File Number A05
Permit Number 0950159-003-AF**

Dear Mr. Sheplak:

ECC International Corp. is requesting the extension of the above referenced variance in order to be in compliance when the non-RACT compliant coating is used at the facility.

All of the supportive documentation that was previously provided as evidence for obtaining the variance remains unchanged. Presently there is no compliant substitute for DoD-P-15328. Therefore, the variance needs to be extended.

ECC request that the variance be renewed from October 2002 to October of the year 2004.

If you have any questions, please call Alice Parker at 407-858-7414 ext. 2609.

Respectfully,
ECC International Corp.

Glenn Andrew
Executive V.P., Chief Operating Officer
