Environmental Protection

Memorandum

TO: Howard L. Rhodes

THRU: Clair Fancy
Al Linero

FROM: Cleve Holladay

DATE: January 28, 1997

SUBJECT: Kissimmee Utility Authority/Application to Burn Very Low Sulfur Fuel Oil/
AC#0970043-004 (PSD-FL-182)

Attached for your approval and signature is a letter that will amend a construction permit for the above mentioned facility.

This amendment will allow Kissimmee Utility Authority (KUA) to burn very low sulfur (0.05%) fuel oil for up to 800 hours per year each in its combustion turbines referenced in this permit. Presently KUA can only burn fuel oil when natural gas is unavailable.

The option to burn limited amounts of fuel oil even when natural gas is available will give KUA greater operational flexibility during the winter heating season. I recommend your approval and signature.
