Re: Air Permit Project Status Update
Osceola Farms Company – Sugar Mill

Dear Mr. Rionda:

This is simply a courtesy letter to provide an update on the status of the pending application for air permit for the Osceola Farms Company's sugar mill located in Palm Beach County, Florida.

Project No. 0990019-006-AC (PSD-FL-337) - Modifications of Boilers 4 and 5

Status: We received this application on November 3, 2003 and requested additional information in letters dated December 1 and 18, 2003. On February 24, 2004 we met with your consultant, David Buff, and discussed the project in detail. On March 4, 2004, we received an email request for an additional 90 days to provide the information or modify the request, which we approved on March 5, 2004. This is just a reminder that the application remains incomplete and cannot be processed without further additional information. The deadline for submitting this information is May 30, 2004.

We will resume processing your application after receipt of the requested information. Rule 62-4.050(3), F.A.C. requires that all applications for a Department permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. For any material changes to the application, please include a new certification statement by the authorized representative or responsible official. If you have any questions regarding this matter, please call me at 850/921-9536.

Sincerely,

Jeffery F. Koerner, Air Permitting South
Bureau of Air Regulation
