Dear Mr. Director,

I am painfully aware of the FPL plant that is planned near me.

It will have 12 stacks 140' high and spew out 40 tons of sulfuric acid mist etc. This area is rural and we have septic tanks and wells. We don't even have gas stations here. What makes you think a 12.6 million gallon diesel stockpile in the ground will fly? The Palm Beach Aggregates will be blasting until 2032 (permitted already). This is adjacent to the pits my tax money paid \$212 m. for. (ASR wells). FPL is not going to be allowed to utilize them to cool turbines. Why did Wellington and Royal Palm Beach receive letters about this and not the acreage residents? They aren't near this. It's planned right next to our community.

I'd say lots clean up Riviera Beach plant first. It's the dirtiest in the state.

I also call for a public hearing and this letter to be included in your final report.

As a sidebar, FPL will not be tolerated to use the ASR wells as a place to inject their waste.

I never want to see this project come to fruition for another 660,000 new units.

Stop this project now!

Sincerely,
Sharon A. Waite
