Re: Additional Information, File Number 1010017-012-AV
Title V Air Operation Permit Renewal Application
Anclote Power Plant

Dear Mr. Jackson:

On May 20, 2009, the Department received a Title V air operation permit renewal application for the subject facility via hard copy submission. Thank you for using the latest version of the air permit application form. The Anclote Power Plant is located at 1729 Baillies Bluff Road, Holiday in Pasco County, Florida.

In order to continue processing your application, the Department needs the additional information requested below. Should your response to any of the below items require new calculations, please submit the new calculations, assumptions, reference material and appropriate revised pages of the permit application form.

1. New Applicable Requirements: The Title V air operation permit, permit no. 1010017-006-AV, had been renewed with an effective date of January 1, 2005. Subsequent to this effective date, several new federal regulations have been promulgated by U.S. EPA and adopted by the State of Florida. Some of these new federal regulations may be new applicable requirements for the facility applying to certain types of engines.

New Applicable Requirements - New Source Performance Standards (NSPS) Requirements from 40 Code of Federal Regulations (CFR) 60:

40 CFR 60 Subpart III also known as (a.k.a.) NSPS "4-I's" or "CI-ICE"

U.S. EPA promulgated on July 11, 2006, the NSPS for Stationary Compression Ignition (CI) Internal Combustion Engines (ICE) under 40 CFR 60 Subpart III. This new NSPS applies to new engines. Florida adopted this regulation by reference soon thereafter at Rule 62-204.800(8)(b)78., Florida Administrative Code (F.A.C.).

40 CFR 60 Subpart JJJJ a.k.a. NSPS "4-J's" or "SI-ICE"

U.S. EPA promulgated on January 18, 2008, the NSPS for Stationary Spark Ignition (SI) Internal Combustion Engines (ICE) under 40 CFR 60 Subpart JJJJ. This new NSPS applies to new engines. Florida adopted this regulation by reference soon thereafter at Rule 62-204.800(8)(b)79., F.A.C.

- a. This facility has proposed insignificant emissions units, e.g., "general purpose engines" and "emergency generators" in Attachment E, items 16. & 17. of the renewal application. Also, the current permit has a Subsection B. for Relocatable Diesel Fired Generator(s) and "General Purpose Engines" & "Emergency Generator(s)" (Emissions Unit ID Nos. -006 & -005) listed in Appendix

Re: Additional Information, File Number 1010017-012-AV
Title V Air Operation Permit Renewal Application
Anclote Power Plant
Page 2

U-1. These new NSPS could therefore apply. Are any engines on-site regulated under these new NSPS?

If not, for each engine on-site please provide key non-applicability descriptors to show that each engine is clearly not subject to these new NSPS, like 'existing,' model year/construction (manufacturer) date, manufacturer name, size of engine, e.g., equivalent brake horsepower (HP), type of engine, etc.

New Applicable Requirements - National Emissions Standards for Hazardous Air Pollutants (NESHAP) Requirements also known as (a.k.a) Maximum Available Control Technologies (MACT) from 40 CFR 63 Subpart ZZZZ:

40 CFR 63 Subpart ZZZZ a.k.a. MACT "4-Z's" or "RICE MACT"

U.S. EPA promulgated on February 24, 2004, the Reciprocating Internal Combustion Engines (RICE) MACT under 40 CFR 63 Subpart ZZZZ. This new MACT applies to new and existing engines at a Title V source that is a major source of hazardous air pollutants (HAP). Florida adopted this regulation by reference soon thereafter at Rule 62-204.800(11)(b)82., Florida Administrative Code (F.A.C.).

b. This facility is a major source of HAP and has engines. This new MACT may therefore apply to engines at the facility. Are any engines on-site regulated under the RICE MACT?

If not, for each engine on-site please provide key non-applicability descriptors to show that each engine is clearly not subject to the RICE MACT, like 'existing,' model year/construction (manufacturer) date, manufacturer name, size of engine, e.g., equivalent brake horsepower (HP), type of engine, e.g., compression ignition (CI), etc.

These new federal regulations along with fact sheets are posted on the following U.S. EPA web site:
<http://www.epa.gov/ttn/atw/combust/list.html>.

2. New Acid Rain Forms: The Department revised the acid rain forms last year. The current acid rain forms have an effective date of 03-16-2008. The form submitted with the permit renewal application is therefore outdated. Please submit completed acid rain form(s) using the current version of the form. The current versions of the acid rain forms can be accessed at the following web site:
<http://www.dep.state.fl.us/Air/forms/acidrain.htm>.

The Department will resume processing your application after receipt of the requested information. Rule 62-4.050(3), Florida Administrative Code (F.A.C.) requires that all applications for a Department Title V air operation permit must be certified by a professional engineer (P.E.) registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. For any material changes to the application, please include a new certification statement by the responsible official (R.O.).

Rule 62-4.055(1), F.A.C. now requires applicants to respond to requests for information within **ninety (90)** days or provide a written request for an additional period of time to submit the information. The processing of this application is under time constraints due to acid rain requiring this permit to be effective January 1, 2010. A response no later than **September 28, 2009** is appreciated.
