RE: APAC - Southeast, Inc. Pasco Asphalt Plant Status Update
(Facility ID 1010041)

To Whom It May Concern,

The APAC - Southeast, Inc. Pasco Asphalt Plant site has not operated, and is not anticipated to operate, during the 2012 Federal Fiscal Year (FFY). We are requesting DEP to update the site's operational status to "Long-Term Reserve Shutdown" and agree to waive the site's annual Method 5 and 9 compliance testing requirements for the 2012 FFY. The plant has not operated due to a lack of demand in the area.

Testing of the asphalt plant will be completed as soon as practicable but no later than 30 days after the facility resumes operations.

A relocated RAP crushing unit has not operated, and is not anticipated to operate, at the site during the 2012 FFY. A current Method 9 test report will be submitted to the Department upon resuming crushing operations at the site.

Please contact Erin Zimmet at Erin.Zimmet@oldcastlematerials.com or 386-257-5504 ext. 221 with any questions regarding this submission.

Thank you,
