RE: Clean Air Act Section 112(j) Notification Information  
Citrosuco North America, Inc.  
Title V Permit No. 1050001

Dear Ms. Phillips:

The purpose of this letter is to provide information relative to Section 112(j) of the Clean Air Act as amended in 1990 which pertains to the development of Maximum Achievable Control Technology (MACT) standards. Section 112(j) requires that owners of a major source of hazardous air pollutants (HAPs) in an affected industry source category submit the information listed below to the permitting authority (i.e. the State of Florida) with a copy submitted to the United States Environmental Protection Agency (USEPA).

Citrosuco North America, Inc. is submitting this Part 1 notification information without necessarily having determined that certain units, such as, but not limited to, the process heaters which serve its peel drying system or other process heater units at the facility, are subject to the Process Heaters or other MACT category. Citrosuco North America, Inc. is submitting information about these units as a precaution and reserves the right to contest that these units are subject to a MACT category. See, "NESHAPS for Source Categories: General Provisions; and Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j)," 67 Fed. Reg. 16,582, 16,591 (April 5, 2002) (Final Rule) (stating that "If the section 112(j) deadline arrives before you can determine ... applicability, you should submit a Part 1 [notification] ....").

**Fischer**

The Code of Federal Regulations, at 40 C.F.R. §63.53(a), directs that the following information is to be submitted in a Part 1 notification to the permitting authority:

Subject to the conditions outlined herein, Citrusuco North America, Inc .hereby provides the following facility-specific information for each of these items:

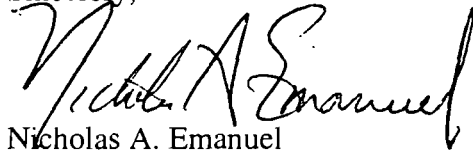

1. **Name:** Citrusuco North America, Inc.  
**Address:** 5937 Hwy 60 East, Lake Wales, FL 33859  
**Source Description:** The existing citrus processing complex includes citrus processing, juice extracting, packaging, and storage. The plant contains 2 citrus peel driers, 4 citrus pellet mills, 2 citrus pellet coolers, 3 waste heat evaporators, and 4 industrial boilers.
  
2. **Relevant Industry Source Categories:** Depending on the final form of the applicability portion of the MACT standard, the following industry source categories may be applicable to sources at the facility:  
 Industrial boilers, indirect –fired process heaters, reciprocating internal combustion engines, organic liquids distribution (non- gasoline) and diesel powered generators.
  
3. **List of the Emission Units Belonging to the Relevant Industry Source Categories:** This list is dependent on the final form of the applicability portion on the specific MACT standard.

Facility Emission Source	Potentially Relevant Industry Source Category
Auxiliary and Standby Boilers Peel Dryer	Industrial, Commercial, and Industrial Boilers and Indirect-fired Process Heaters
Truck Engine Operations	Reciprocating Internal Combustion Engines
Diesel emergency generator	Reciprocating Internal Combustion Engines
Citrus Oils Handling and Storage	Organic Liquids Distribution (non-Gasoline)

4. **Previous Section 112(g) MACT Determinations:**  
None.

If you have any questions concerning the information provided, please contact  
Nick Emanuel or Ken Miller at this location, phone 863-696-7400.

Sincerely,

A handwritten signature in black ink that reads "Nicholas A. Emanuel". The signature is written in a cursive style with a large initial "N" and "E".
