**Re: Renewal of Title V Permit - Charles Larsen Memorial Power Plant
 Facility ID 1050003 and Permit No: 1050003-014-AV**

Dear Ms. Vielhauer:

In compliance with the above referenced Title V permit and the Department's request for CAM Plan for Unit No. 8 at this facility, Lakeland Electric (Lakeland) is submitting the attached documents prepared by Mr. Ken Kosky of Golder Associates our consulting engineers.

Additionally, enclosed you will find Responsible Official Certification completed and signed by Mr. Timothy Bachand P.E. in accordance with requirements of Title V permit. To speed up the process, we are submitting this document electronically and via mail.

As always, we appreciate all the help you have offered us in our permitting endeavors and look forward to hear from you soon. However, if you should have any questions, please do not hesitate to contact me.

Sincerely,

Farzie Shelton

RE: Title V Air Operation Permit Renewal
Project No. 1050003-014-AV

Dear Mr. Bachand:

On June 26, 2007, the Department received your application for a Title V Air Operation Permit Renewal for the Charles Larsen Memorial Power Plant. Based on a review of the application, the application is incomplete. In order to continue processing your application, the Department will need the additional information requested below. Should your response to any of the items below require new calculations, please submit the new calculations, assumptions, reference material and appropriate revised pages of the application form. This letter supplements the incompleteness letter sent on August 15, 2007.

1. For the 120 MW combustion turbine (CT) No. 8, the uncontrolled emissions of nitrogen oxides (NO_x) are greater than 100 tons per year. The NO_x emissions are controlled by the use of water spray. Therefore, a Compliance Assurance Monitoring (CAM) plan is required. For Acid Rain purposes, the emissions unit has a NO_x continuous emissions monitoring system (CEMS). If you will accept the NO_x CEMS for continuous compliance purposes, then a CAM plan is not required. If you will not accept the NO_x CEMS for continuous compliance purposes, then please submit a CAM plan for the emissions unit, realizing that the CAM plan will include the use of the NO_x CEMS. In addition, please correct the application page for the CAM plan requirement in the "Emissions Unit Information" and resubmit.

2. For the CT #8, there are no nitrogen allowances granted to the emissions unit. As a clean-up of the specific conditions to incorporate the latest amendments made to the NSPS Subpart GG regulations, please request to remove the language that relates to nitrogen allowances.

The Department will resume processing your application after receipt of the requested information. Rule 62-4.050(3), F.A.C., requires that all applications for a Department permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. For any material changes to the application, please include a new certification statement by the authorized representative or responsible official. You are reminded that Rule 62-4.055(1), F.A.C. requires applicants to respond to requests for information within 90 days or provide a written request for an additional period of time to submit the information. If you have any questions regarding this matter, please call Bruce Mitchell at (850)413-9198.

Sincerely,

Jeffery F. Koerner, P.E.

Lakeland, Florida 33801-5079

RE: Title V Air Operation Permit Renewal
Project No. 1050003-014-AV

Dear Mr. Bachand:

On June 26, 2007, the Department received your application for a Title V Air Operation Permit Renewal for the Charles Larsen Memorial Power Plant. Based on a review of the application, the application is incomplete. In order to continue processing your application, the Department will need the additional information requested below. Should your response to any of the items below require new calculations, please submit the new calculations, assumptions, reference material and appropriate revised pages of the application form.

1. For the 120 MW combustion turbine No. 8, the renewal permit will include the latest revisions from the NSPS Subpart GG provisions regarding compliance with the federal fuel sulfur specifications. However, Project No. 1050003-012-AC (PSD-FL-166D issued 12/09/03) established a fuel sulfur limitation for natural gas of 2 grains per 100 standard cubic feet of gas. This project authorized peak mode operation. Please explain how compliance is demonstrated with this fuel sulfur limitation.
2. Regarding Attachment LR-EU3-F1.11, the values listed under "Emission Factors" are actually federally enforceable limitations derived from BACT determinations and still remain as such.
3. For Sulfuric Acid Mist (SAM), why were specific emission limitations established for SAM, when the original BACT determination was to "fire natural gas and No. 2 fuel oil"? SAM limitations were established in both the Title V permit revision, No. 1050003-009-AV, issued August 30, 2001, and the Title V permit renewal, No. 1050003-011-AV, issued December 30, 2002.

The Department will resume processing your application after receipt of the requested information. Rule 62-4.050(3), F.A.C., requires that all applications for a Department permit must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. For any material changes to the application, please include a new certification statement by the authorized representative or responsible official. You are reminded that Rule 62-4.055(1), F.A.C. requires applicants to respond to requests for information within 90 days or provide a written request for an additional period of time to submit the information. If you have any questions regarding this matter, please call Bruce Mitchell at (850)413-9198.
