Barbara - This Title V renewal is ready to be clerked and issued. I have signed on behalf of Jeff. The permit summary table has been updated.

Jeff – This is a simple renewal with no changes requested by the applicant. The format was revised and three engines were added as emissions units. One steam generator was retired (EU-004) and was removed from the renewed permit. Some unregulated emissions units were reclassified as insignificant emissions units as their emissions were less than 5 tons per year.

Ed - Please replace all your word documents with the ones attached with this email as I had made changes to some of the documents.

Thanks,
Syed
