BUREAU OF AIR REGULATION

**RE: C.D. McIntosh, Jr. Power Plant – Draft Air Construction Permit No. 1050004-024-AC
Lakeland Electric – Public Notice of Intent to Issue Title V Air Construction Permit**

Dear Mr. Thomas:

We are in receipt of the draft air construction permit for the coal yard improvements at the C.D. McIntosh, Jr. Power Plant. Accordingly, on September 11, 2008 we published the Public Notice of Intent in the Lakeland Ledger. Therefore, enclosed you will find the affidavit of publication as required under provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210 and 62-213.

If you should have any questions, please do not hesitate to contact me.

Sincerely,

Farzie Shelton

Enclosure

PUBLIC NOTICE OF INTENT TO ISSUE AIR PERMIT

Florida Department of Environmental Protection
Division of Air Resource Management, Bureau of Air Regulation
Draft Air Permit No. 1050004-024-AC
City of Lakeland, Department of Electric Utilities
C.D. McIntosh, Jr. Power Plant
Polk County, Florida

Applicant: The applicant for this project is The City of Lakeland, Department of Electric Utilities. The applicant's authorized representative and mailing address is: Mr. Timothy Bachand, P.E., Manager of Engineering, City of Lakeland, Department of Electric Utilities, C.D. McIntosh, Jr. Power Plant, 3030 East Lake Parker Drive, Lakeland, Florida 33805.

Facility Location: The City of Lakeland, Department of Electric Utilities, operates the existing C.D. McIntosh, Jr. Power Plant, which is located in Polk County, at 3030 East Lake Parker Drive in Lakeland, Florida.

Project: The project includes upgrades to the existing coal handling and transfer systems to improve coal unloading by trucks and to allow coal blending. The Project will be completed in two phases. The first phase will include construction of a truck unloading ramp, above-ground truck unloading hopper with baghouse, and a conveyor network to two stackout piles.

The second phase will include construction of a conveyor network to allow additional coal storage and blending. The second phase will utilize two conveyors and one of the stackout piles from phase one and a network of seven conveyors allowing direct coal transport to the crusher or distribution to one of six additional stackout piles. A network of six reclaim conveyors will transport coal from the stackout piles to the crusher.

Particulate emissions (PM) from the truck unloading hopper will be controlled by a baghouse. Fugitive emission controls will include hoods on all belt conveyors and all transfer points will be enclosed. Wet suppression will be used at conveyor stackout points. Stackout will be by way of lowering well (stackout tubes). The estimated potential emissions increases for PM and PM₁₀ of 3.13 and 1.49 tons per year, respectively, are well below the Prevention of Significant Deterioration (PSD) significant emissions rates for PM (25 tons/year) and PM₁₀ (15 tons/year) and therefore not subject to preconstruction review.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.) and Chapters 62-4, 62-210 and 62-212 of the Florida Administrative Code (F.A.C.). The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Bureau of Air Regulation is the Permitting Authority responsible for making a permit determination for this project. The Permitting Authority's physical address is: 111 South Magnolia Drive, Suite #4, Tallahassee, Florida 32301. The Permitting Authority's mailing address is: 2600 Blair Stone Road, MS #5505, Tallahassee, Florida 32399-2400. The Permitting Authority's telephone number is 850/488-0114.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m., Monday through Friday (except legal holidays), at address indicated above for the Permitting Authority. The complete project file includes the Draft Permit, the Technical Evaluation, and Preliminary Determination, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.111, F.S. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address and phone number listed above. In addition, electronic copies of these documents are available on the following web site: <http://www.dep.state.fl.us/air/eproducts/apcs/default.asp>.

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue an air permit to the applicant for the project described above. The applicant has provided reasonable assurance that operation of proposed equipment will not adversely impact air quality and that the project will comply with all appropriate provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-296 and 62-297, F.A.C. The Permitting Authority will issue a Final Permit in accordance with the conditions of the proposed Draft Permit unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, F.S., or unless public comment received in accordance with this notice results in a different decision or a significant change of terms or conditions.

Comments: The Permitting Authority will accept written comments concerning the proposed Draft Permit for a period of 14 days from the date of publication of the Public Notice. Written comments must be received by the Permitting Authority by close of business (5:00 p.m.) on or before the end of this 14-day period. If written comments received result in a significant change to the Draft Permit, the Permitting Authority shall revise the Draft Permit and require, if applicable, another Public Notice. All comments filed will be made available for public inspection.

Petitions: A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed with (received by) the Department's Agency Clerk in the Office of General Counsel of the Department of Environmental Protection at 3900 Commonwealth Boulevard, Mall Station #35, Tallahassee, Florida 32399-3000. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of this Public Notice or receipt of a written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Permitting Authority for notice of agency action may file a petition within 14 days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Permitting Authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address and telephone number of the petitioner; the name, address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial rights will be affected by the agency determination; (c) A statement of when and how the petitioner received notice of the agency action or proposed decision; (d) A statement of all disputed issues of material fact. If there are none, the petition must so state; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action including an explanation of how the alleged facts relate to the specific rules or statutes; and, (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action. A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Permitting Authority's final action may be different from the position taken by it in this Public Notice of Intent to Issue Air Permit. Persons whose substantial interests will be affected by any such final decision of the Permitting Authority on the application have the right to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation: Mediation is not available for this proceeding.
