Ed,

Per our conversation today, I am e-mailing you a concern raised by our stack testing contractor (Ken Given) pertaining to his interpretation of the proposed permit's stack testing condition. Do all four stacks have to be tested simultaneously (two dryers and four WHE)? If so, the concern is that this will require more equipment than the contractor has available and will drive the testing cost up with no benefit. It will also be difficult to coordinate this much stack testing activity at one time. From our conversation, this issue may be addressed within the permit structure by a clarification note i.e. at a minimum stack test one dryer along with two WHE??

Please let me know what can be done to help this situation.

Thank you,
Aaron P. Corkum

PUBLIC NOTICE OF INTENT TO ISSUE AIR CONSTRUCTION PERMIT

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
DEP File No. 1050023-015-AC

Cutral Citrus Juices USA, Inc., Polk County
The Department of Environmental Protection (Department) gives notice of its intent to issue an air construction permit to Cutral Citrus Juices USA, Inc. for its existing citrus juice facility located at 602 McKean Street, Auburndale, Polk County. The applicant's address is: 602 McKean Street, Auburndale, Florida 33823. The project is to allow installation of a fifth waste heat evaporator (WHE) and two additional exhaust stacks to two citrus peel dryers and their associated for WHEs and two exhaust stacks.

There will be no emissions increases as a result of this project. A determination of Control Technology was not required.

The Department will accept written comments concerning the proposed permit action for a period of fourteen (14) days from the date of publication of this Public Notice of Intent to Issue Air Construction Permit. Written comments should be provided to the Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, Florida 32399-2400. Any written comments filed shall be made available for public review if written comments received result in a significant change in the proposed agency action. The Department shall revise the proposed permit and require, if applicable, another Public Notice of Intent to Issue Air Construction Permit.

The Department will issue the permit with the attached conditions unless a timely administrative hearing is filed pursuant to Sections 120.569 and 120.57, Florida Statutes, before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below.

Mediation is not available in this proceeding.

A person whose substantial interests are affected by the proposed permitting action or an administrative proceeding (hearing) under Section 120.569 and 120.57, Florida Statutes, must contain the information set forth below and must be filed (received) in the Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, Florida 32399-2400. Petitions filed by the permit applicant or any of those listed below must be filed within fourteen days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), Florida Statutes, must be filed within fourteen days of publication of the public notice or within fourteen days of this notice of intent, whichever occurs first. Under Section 120.60(3), Florida Statutes, however, a person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner's copy of the petition to the applicant at the address indicated above at the time of filing of any person to file a petition within the appropriate time period shall constitute that person's right to request an administrative determination (hearing), under Sections 120.569 and 120.57, Florida Statutes, or to intervene in this proceeding and participate as a party. Subsequent intervention will be only at the approval of the presiding officer upon the motion in compliance with Rule 28-106.205 of the Florida Administrative Code (F.A.C.).

A petition that disputes the material facts on which the Department's action is based shall contain the following information: (a) The name and address of each agency affected by the action; (b) The name, address, and telephone number of the petitioner; (c) An explanation of how the petitioner's substantial interests will be affected by the proposed action; (d) A statement of how and when petitioner received notice of the agency's proposed action; (e) A statement of all disputed issues of material fact. If there are specific facts the petitioner contends warrant reversal or modification of the agency's action; (f) A statement of the specific rules or statutes the petitioner contends require or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, filing of a petition means that the Department's final action may be different from that taken by it in this notice. Persons whose substantial interests will be affected by any decision of the Department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

A complete project file is available for public inspection during normal business hours from 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Dept. of Environmental Protection
Bureau of Air Regulation
Suite 4, 111 S. Magnolia Drive
Tallahassee, Florida 32301 Tampa, Florida 33619-9218
Telephone: 850/488-0114
Fax: 850/922-6979

The complete project file includes the application, technical evaluation, draft permit information submitted by the responsible official, exclusive of confidential records information 403.111, F.S. Interested persons may contact the Administrator, Title V Section, Department's reviewing engineer for this project, Edward J. Svec, at the Bureau of Air Regulation in Tallahassee, Florida, or call 850/488-0114, for additional information. Written comments directed to the Department's reviewing engineer should be sent to the following address: Dept. of Environmental Protection, Bureau of Air Regulation, Mail Station #5505, Tallahassee, Florida 32399-2400.
