Re: DAP Production in AFI Plant,
IMCC Letter 12/19/83

Dear Mr. Girardin:

This is to authorize IMCC-New Wales to produce DAP in the AFI plant during the period January 9-30, 1984, as requested in the above subject letter. During the run, IMCC must comply with applicable DER rules.

Fluoride emissions shall not exceed .06 lbs. of F per ton of P_2O_5 input or 2.23 lbs. of F per hour. Particulate emissions shall not exceed 36.1 lbs. per hour. Visible emissions shall not exceed 20% opacity. One compliance test is required for fluorides, particulates and opacity.

Please contact me if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "W. C. Thomas".

CERTIFIED MAIL - RECEIPT REQUESTED

Mr. T. H. Traylor
Vice President & General Manager
International Minerals and
Chemical Corporation
New Wales Operations
P. O. Box 1035
Mulberry, Florida 33860

Dear Mr. Traylor:

The Bureau of Air Quality Management has received your response to our letter of October 18, 1983. The permit application is still incomplete for the following reason:

In August and again in October of 1983, the Southwest District authorized IMCC - New Wales to produce DAP in an existing AFI plant with compliance tests as a requirement for the authorizations. The compliance reports dated 8-17-83, 8-19-83, 8-24-83, 8-25-83, and 10-17-83 showed opacities of 19.42%, 20.00%, 20.00%, 20.00%, and 55.88% respectively. The production of DAP in the AFI plant will probably have a visible emission standard of less than 20 percent opacity, 17-2.610(2). IMCC - New Wales must provide the Department with reasonable assurance that they can comply with an opacity of less than 20 percent before we can resume processing the application.

When this information is received, we will resume processing your application. If you have any questions on its status, please call Edward Svec, Review Engineer, at (904)488-1344.

Sincerely,

C. H. Fancy

Mr. Edward Svec
Bureau of Air Quality Management
2600 Blair Stone Road
Tallahassee, Florida 32301-8241

Dear Mr. Svec:

Regarding AC-75926, IMC-New Wales Operations no longer finds it necessary to produce DAP in our AFI plant. Therefore we are requesting that this application be withdrawn.

Thank you for your consideration in this matter.

Sincerely,

A handwritten signature in cursive script that reads 'A. L. Girardin'.
