Dear Mr. Baretincic:

Modification of Conditions

Permit No. AC 53-22671 GTSP Truck/Rail Loadout

We are in receipt of your request for a modification of the permit conditions. The conditions are changed as follows:

<u>Revised Condition</u>	<u>From</u>	<u>To</u>
Expiration Date	July 1, 1984	December 31, 1985

New Specific Conditions

- A. Submit semi-annual reports, beginning on July 1, 1984, giving the status of the source (operational or not), any activity involving the source that occurred during the proceeding six months (scavenged components or operation of any of the source's equipment), and plans for the source during the next six months (operation or maintenance).
- B. Notify the department's Southwest District Office 30 days in advance of starting production or operations of the source.
- C. Conduct the compliance tests required by the construction permit within 45 days of placing the source in operation. Notify the District Office 10 days prior to the scheduled tests.
- D. Within 60 days after the source is placed in operation, submit copies of the compliance test reports and a complete application for a permit to operate the source to the Southwest District Office.

Mr. J. M. Baretincic

SUBJ: Extension of IMC, New Wales Operations,  
Air Construction Permit Numbers  
AC 53-19051, AC 53-22671, and AC 53-23546

**RECEIVED**  
APR 27 1984

Office of the Secretary

The Bureau has received another request from International Minerals and Chemicals Corporation (IMC) for an extension of the expiration dates for three air construction permits for the New Wales Operation facility. This action is needed because some of these units have not yet been put into operation and, furthermore, it is expected that these units may not be put into service prior to the fall of 1985.

Therefore, we respectfully request that the extensions, with conditions, be granted.
