Re: AC53-199112 (Modification of No. 10 & 11 Sulfuric Acid
Plants)
AC53-222859 (AFI Air Classifier)

Dear Mr. Baretincic:

The Department received your October 20 letter requesting two year extensions of the subject permits due to a market downturn in the phosphate industry.

Eighteen month extensions can be granted without re-evaluating the BACT analysis, however, for two year extensions, a condition would have to be added requiring re-evaluation of the BACT analysis before construction begins (F.A.C. Rule 17-212.410(2)). If you want us to process the two year extension with BACT re-evaluation required, please advise. If there are questions, please contact Preston Lewis or John Reynolds at (904) 488-1344.

Sincerely,

John C. Brown, Jr., P.E.

RE: Request for Extension of Permit Expiration Dates

Dear Mr. Lewis:

We request that the expiration dates for two active IMC-Agrico Air Construction Permits be extended in the following manner:

AC53-199112, Modification of the Nos. 10 & 11 Sulfuric Acid Plants at the South Pierce Chemical Plant, from January 1, 1994 to January 1, 1996. The need for this extension is due to unfavorable financial circumstances at the present time. The work that remains for this permit is the installation of a waste heat recovery boiler in the No. 11 Unit. All other work covered by the permit has been completed. The boiler cannot be installed in the next major maintenance of Unit 11 but will be installed during the following one. This will occur within the two year period requested.

AC53-222859, Installation of an Animal Feed Ingredient Air Classifier and Controls at the New Wales Chemical Plant, from January 31, 1994 to January 31, 1996. The need for this extension is also due to unfavorable financial circumstances at the present time. The funds for this project are expected within a year. The additional time beyond the first year will be needed for the installation of the equipment.

Since both of these units were approved under PSD review, we understand that there will be additional procedural steps required in the permitting process due to these delays. They will be initiated in a timely manner.

02222

Mr. Preston Lewis
October 20, 1993
Page 2

Pursuant to 17-4.050(4)(p)3., F.A.C., a check in the amount of \$100 is enclosed for the fee of \$50 for each of the permit extensions.

Thank you for your attention in this matter. Please contact me if there is additional information required.

Sincerely,

J. M. Baretincic
Director
Environmental Services

RE: AC53-199112 (Modification of Nos. 10 & 11 Sulfuric Acid Plants)
AC53-222859 (AFI Air Classifier)

Dear Mr. Brown:

Thank you for your letter of November 4, 1993, which explained the advantage of IMC-Agrico Company requesting an 18-month extension on the above subject construction permits rather than a two-year extension.

A detailed review of turnaround schedules for these facilities now indicates that construction can begin within an 18-month window.

IMC-Agrico Company hereby requests that our extension request be modified from two years to 18 months.

Sincerely,

J. M. Baretincic
