RE: Clean Air Act Section 112(j) Notification Information
Holly Hill Fruit Company, Inc.
Title V Permit No. 1050061-001-AV

Dear Ms. Phillips:

The purpose of this letter is to provide information relative to Section 112(j) of the Clean Air Act as amended in 1990 which pertains to the development of **Maximum Achievable Control Technology (MACT) standards**. Section 112(j) requires that owners of a major source of hazardous air pollutants (HAPs) in an affected industry source category submit the information listed below to the permitting authority (i.e. the State of Florida) with a copy submitted to the United States Environmental Protection Agency (USEPA).

Holly Hill Fruit Products Company, Inc. is submitting this Part 1 notification information without necessarily having determined that certain units, such as, but not limited to, the process heaters which serve its peel drying system or other process heater units at the facility, are subject to the Process Heaters or other MACT category. Holly Hill Fruit Products Company, Inc. is submitting information about these units as a precaution and reserves the right to contest that these units are subject to a MACT category. See, "NESHAPS for Source Categories: General Provisions; and Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j)," 67 Fed. Reg. 16,582, 16,591 (April 5, 2002) (Final Rule) (stating that "If the section 112(j) deadline arrives before you can determine ... applicability, you should submit a Part 1 [notification]").

The Code of Federal Regulations, at 40 C.F.R. §63.53(a), directs that the following information is to be submitted in a Part 1 notification to the permitting authority:

1. Holly Hill Fruit Products Company, Inc., 315 Hwy. 17/92 N. Davenport, FL 33837, which is not, to the best of our knowledge, not a major HAP's source.
2. Process Heaters.
3. One citrus peel dryer with one waste heat evaporator (it is believed by FDEP that does not meet the definition of a process heater).
4. There are no affected sources for which a Section 112(g) MACT determination has been made.

Subject to the conditions outlined herein, Holly Hill Fruit Products Company, Inc. hereby provides the following facility-specific information for each of these items:

1). Name: Holley Hill Fruit Products Company, Inc.

Address: 315 Hwy. 17/92 N., Davenport, Florida 33837

Source Description: The existing industrial complex includes citrus processing and juice extracting, packaging, warehousing, and distribution. Fruit is graded and carried to an extractor room where the juice is removed and pumped to evaporators for concentrate production.

The plant contains one pellet citrus feed mill, one citrus pellet mill, including one cooler and associated pellet shaker cooler and a wastewater spray field.

2). Relevant Industry Source Categories: Depending on the final form of the applicability portion of the MACT standard, the following industry source categories may be applicable to sources at the facility:

Industrial Boilers and Indirect-fired Process Heater.

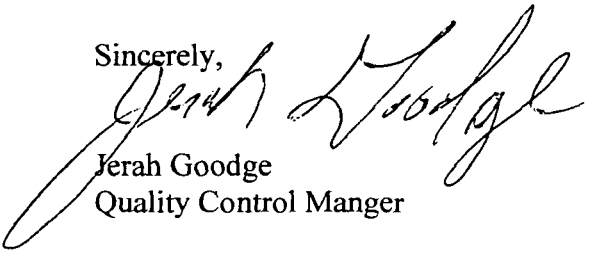

3). List of the Emission Units Belonging to the Relevant Industry Source Categories: This list is dependent on the final form of the applicability portion on the specific MACT standard.

Facility Emission Source	Potentially Relevant Industry Source Category
Auxiliary and Standby Boilers; Duct Burner System	Industrial, Commercial, and Industrial Boilers and Indirect-fired Process Heaters
Citrus Oils Handling and Storage	Organic Liquids Distribution (non-Gasoline)

RE: Clean Air Act Section 112(j) Notification Information
Holly Hill Fruit Company, Inc.
Title V Permit No. 1050061-001-AV

Dear Ms. Phillips:

The purpose of this letter is to provide information relative to Section 112(j) of the Clean Air Act as amended in 1990 which pertains to the development of Maximum Achievable Control Technology (MACT) standards. Section 112(j) requires that owners of a major source of hazardous air pollutants (HAPs) in an affected industry source category submit the information listed below to the permitting authority (i.e. the State of Florida) with a copy submitted to the United States Environmental Protection Agency (USEPA).

Holly Hill Fruit Products Company, Inc. is submitting this Part 1 notification information without necessarily having determined that certain units, such as, but not limited to, the process heaters which serve its peel drying system or other process heater units at the facility, are subject to the Process Heaters or other MACT category. Holly Hill Fruit Products Company, Inc. is submitting information about these units as a precaution and reserves the right to contest that these units are subject to a MACT category. See, "NESHAPS for Source Categories: General Provisions; and Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j)," 67 Fed. Reg. 16,582, 16,591 (April 5, 2002) (Final Rule) (stating that "If the section 112(j) deadline arrives before you can determine ... applicability, you should submit a Part 1 [notification]").

The Code of Federal Regulations, at 40 C.F.R. §63.53(a), directs that the following information is to be submitted in a Part 1 notification to the permitting authority:

1. Holly Hill Fruit Products Company, Inc., 315 Hwy. 17/92 N. Davenport, FL 33837, which is not, to the best of our knowledge, **not a major HAP's source.**
2. Process Heaters.
3. One citrus peel dryer with one waste heat evaporator (it is believed by FDEP that does not meet the definition of a process heater).
4. There are no affected sources for which a Section 112(g) MACT determination has been made.

Subject to the conditions outlined herein, Holly Hill Fruit Products Company, Inc. hereby provides the following facility-specific information for each of these items:

1). Name: Holley Hill Fruit Products Company, Inc.
Address: 315 Hwy. 17/92 N., Davenport, Florida 33837
Source Description: The existing industrial complex includes citrus processing and juice extracting, packaging, warehousing, and distribution. Fruit is graded and carried to an extractor room where the juice is removed and pumped to evaporators for concentrate production.

The plant contains one pellet citrus feed mill, one citrus pellet mill, including one cooler and associated pellet shaker cooler and a wastewater spray field.

2). Relevant Industry Source Categories: Depending on the final form of the applicability portion of the MACT standard, the following industry source categories may be applicable to sources at the facility:

Industrial Boilers and Indirect-fired Process Heater.

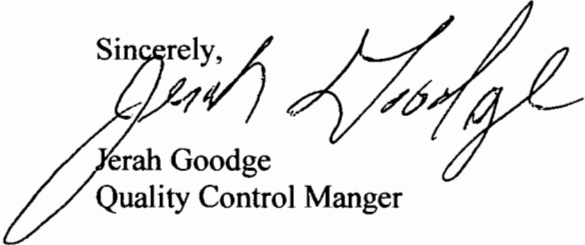

3). List of the Emission Units Belonging to the Relevant Industry Source Categories: This list is dependent on the final form of the applicability portion on the specific MACT standard.

Facility Emission Source	Potentially Relevant Industry Source Category
Auxiliary and Standby Boilers; Duct Burner System	Industrial, Commercial, and Industrial Boilers and Indirect-fired Process Heaters
Citrus Oils Handling and Storage	Organic Liquids Distribution (non-Gasoline)
