RE: Clean Air Act Section 112(j) Notification Information
Juice Bowl Products, Inc.
Title V Permit No.

Dear Ms. Phillips:

We were just notified on Wednesday, May 15, 2002, at 3:30 PM of the requirement to send this letter. We may not be able to make the deadline due to the time it will take to prepare the letter and mail it. However, we will do our very best. If we are not successful, the letter will be mailed first thing Thursday, May 16, 2002.

The purpose of this letter is to provide information relative to Section 112(j) of the Clean Air Act as amended in 1990 which pertains to the development of Maximum Achievable Control Technology (MACT) standards. Section 112(j) requires that owners of a major source of hazardous air pollutants (HAPs) in an affected industry source category submit the information listed below to the permitting authority (i.e. the State of Florida) with a copy submitted to the United States Environmental Protection Agency (USEPA).

Juice Bowl Products, Inc. is submitting this Part 1 notification information without necessarily having determined that it is a major source of HAPs or that certain units, such as, but not limited to, the process heaters units at the facility, are subject to the Process Heaters or other MACT category. Juice Bowl Products, Inc. is submitting information about these units as a precaution and reserves the right to contest that these units are subject to a MACT category. See, "NESHAPS for Source Categories: General Provisions; and Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j)," 67 Fed. Reg. 16,582, 16,591 (April 5, 2002) (Final Rule) (stating that "If the section 112(j) deadline arrives before you can determine ... applicability, you should submit a Part 1 [notification]").

The Code of Federal Regulations, at 40 C.F.R. §63.53(a), directs that the following information is to be submitted in a Part 1 notification to the permitting authority:

Subject to the conditions outlined herein, Juice Bowl Products, Inc. hereby provides the following facility-specific information for each of these items:

1. **Name:** Juice Bowl Products, Inc.
Address: 2090 Bartow Hwy. South, Lakeland, FL 33801
Source Description: The existing industrial complex includes citrus processing and juice extracting, packaging, warehousing, and distribution. Fruit is graded and carried to an extractor room where the juice is removed and pumped to concentrate production. Retail packaging consist of hotfilled product produced in glass, PET and aluminum containers. Concentrates are blended and filled into drums or tankers.

The plant contains 2 boilers and a minimal wastewater treatment that discharges to the City of Lakeland.

2. **Relevant Industry Source Categories:** Depending on the final form of the applicability portion of the MACT standard, the following industry source categories may be applicable to sources at the facility: Industrial Boilers powered by natural gas.
3. **List of the Emission Units Belonging to the Relevant Industry Source Categories:** This list is dependent on the final form of the applicability portion on the specific MACT standard.

Facility Emission Source	Potentially Relevant Industry Source Category
Natural Gas Boilers	Industrial Boilers
Citrus Oils Handling and Storage	Organic Liquids Distribution (non-Gasoline)

4. **Previous Section 112(g) MACT Determinations:** To our best knowledge and belief, there has been no section 112 (g) MACT determination made for any of the potential sources at this facility.

If you have any questions concerning the information provided, please contact Terry Simmers

Sincerely,

Terry Simmers

RE: Clean Air Act Section 112(j) Notification Information
Juice Bowl Products, Inc.
Title V Permit No.

Dear Ms. Phillips:

We were just notified on Wednesday, May 15, 2002, at 3:30 PM of the requirement to send this letter. We may not be able to make the deadline due to the time it will take to prepare the letter and mail it. However, we will do our very best. If we are not successful, the letter will be mailed first thing Thursday, May 16, 2002.

The purpose of this letter is to provide information relative to Section 112(j) of the Clean Air Act as amended in 1990 which pertains to the development of Maximum Achievable Control Technology (MACT) standards. Section 112(j) requires that owners of a major source of hazardous air pollutants (HAPs) in an affected industry source category submit the information listed below to the permitting authority (i.e. the State of Florida) with a copy submitted to the United States Environmental Protection Agency (USEPA).

Juice Bowl Products, Inc. is submitting this Part 1 notification information without necessarily having determined that it is a major source of HAPs or that certain units, such as, but not limited to, the process heaters units at the facility, are subject to the Process Heaters or other MACT category. Juice Bowl Products, Inc. is submitting information about these units as a precaution and reserves the right to contest that these units are subject to a MACT category. See, "NESHAPS for Source Categories: General Provisions; and Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j)," 67 Fed. Reg. 16,582, 16,591 (April 5, 2002) (Final Rule) (stating that "If the section 112(j) deadline arrives before you can determine ... applicability, you should submit a Part 1 [notification]").

The Code of Federal Regulations, at 40 C.F.R. §63.53(a), directs that the following information is to be submitted in a Part 1 notification to the permitting authority:

Subject to the conditions outlined herein, Juice Bowl Products, Inc. hereby provides the following facility-specific information for each of these items:

1. **Name:** Juice Bowl Products, Inc.
Address: 2090 Bartow Hwy. South, Lakeland, FL 33801
Source Description: The existing industrial complex includes citrus processing and juice extracting, packaging, warehousing, and distribution. Fruit is graded and carried to an extractor room where the juice is removed and pumped to concentrate production. Retail packaging consist of hotfilled product produced in glass, PET and aluminum containers. Concentrates are blended and filled into drums or tankers.

The plant contains 2 boilers and a minimal wastewater treatment that discharges to the City of Lakeland.

2. **Relevant Industry Source Categories:** Depending on the final form of the applicability portion of the MACT standard, the following industry source categories may be applicable to sources at the facility: Industrial Boilers powered by natural gas.
3. **List of the Emission Units Belonging to the Relevant Industry Source Categories:** This list is dependent on the final form of the applicability portion on the specific MACT standard.

Facility Emission Source	Potentially Relevant Industry Source Category
Natural Gas Boilers	Industrial Boilers
Citrus Oils Handling and Storage	Organic Liquids Distribution (non-Gasoline)

4. **Previous Section 112(g) MACT Determinations:** To our best knowledge and belief, there has been no section 112 (g) MACT determination made for any of the potential sources at this facility.
