**Re: Auburndale Cogeneration Facility (Facility ID 1050221)
 Final Permit No. 1050221-002-AV
 Request to Delete Sulfuric Acid Mist Emission Limitations**

Dear Mr. Linero:

Auburndale Power Partners, Limited Partnership (APP) operates a nominal 156 megawatt (MW) electric cogeneration facility located near Auburndale in Polk County, Florida. Operation of the Auburndale Cogeneration Facility is currently authorized by Final Permit No. 105021-002-AV issued by the Department on December 31, 1997.

Section III., Subsection A., Condition No. A.11. of Final Permit No. 105021-002-AV specifies emission limitations for sulfuric acid mist. Consistent with current Department practice, APP requests that Final Permit No. 105021-002-AV be revised to delete Condition No. A.11.

Your expeditious review and approval of this request to revise Final Permit No. 105021-002-AV is appreciated. Please contact me by telephone at (813) 637-7305 or via email at bborsch@calpine.com if there are any questions.

Sincerely,

AUBURNDALE POWER PARTNERS, L.P.

Benjamin M. H. Borsch, P.E.
