**Re: Annual Compliance Test for EU-6
Auburndale Power Plant
Permit Number: 1050221-007-AV
Federal Express Number: 7924 1257 8164**

Dear Mr. Halpin:

On September 22, 2004 I received an email from you that stated the Department would use its enforcement discretion as it pertains to the subject testing, provided: within 30 days of receipt of this e-mail, the company submits an application for a permanent change to its air permit, consistent with statements in Mr. Callery's letter to the Department dated 9/14/05.

Please accept this letter as confirmation that the facility submitted an application for permanent PSD modifications on May 27, 2005. Included in this modification application was a request to modify the existing permit to establish a minimum number of operating hours on natural gas necessary to trigger annual compliance testing. Mr. Bobby Bull of your Department is heading this permitting effort.

The Auburndale Power Plant and Calpine Corporation sincerely appreciate the Department's assistance in this matter. If you have any questions or concerns, please contact Benjamin Borsch at (813) 637-7305 or myself at (813) 637-7316.

Sincerely,

Heidi M. Whidden
