RE: Tiger Bay Cogeneration Facility
Facility ID No. 1050223
Title V Permit No. 1050223-012-AV
Emissions Unit No. -003, Auxiliary Boiler

Dear Mr. Koerner:

Per your discussion with Ann Quillian of Progress Energy's Environmental Services Section on December 1, 2005, the US Agri Chem ("USAC") facility in Ft. Meade, FL was shut down the week of November 21, 2005 and it is not expected to re-start its operation. The auxiliary boiler (Emissions Unit No. -003) on Progress Energy Florida's ("PEF") Tiger Bay facility had been providing steam to the USAC facility. In Section B., Emissions Unit Description on page 25 of the Title V Permit No. 1050223-012-AV, describes this activity.

In the past, PEF had used a portion of the steam from the boiler (Emissions Unit No. -003) to start-up the combustion turbine (Emissions Unit No. -001). This shortened the start-up time and therefore resulted in less start-up emissions. With the permanent shutdown of the USAC Ft. Meade facility, PEF will continue to use this boiler to assist in start-up of the combustion turbine.

Per your request, PEF is requesting via this correspondence that the emissions unit description for the auxiliary boiler be updated with this change at the next re-opening of the Tiger Bay Title V Permit.

Thank you for your assistance. If you have questions or need additional information, please let Ann Quillian, (727) 820-5962, know.

Sincerely,

Martin J. Drango, P.E.
