Jeff/Trina -

I'm on the clock with this thing and I know that over the next couple of weeks you are both out of the office quite a bit. This is preliminary (and the ambient part of it is from Seminole 1 and 2 pollution control upgrades, so you can largely ignore that part) but I need to find out if anything in here gives you heartburn or if you see any "fatal flaws".

I plan to issue the draft 2 weeks from today (7/26) in order to be timely; your feedback by next Monday evening (7/17) is appreciated as it gives me time to make any adjustments as well as to draft the permit.

Thanks much
Mike
