**Attachments:** Seminole 3

Cleve –

I've not yet received your Air Quality write-up, nor a response to my question from last Monday regarding the averaging time for SO<sub>2</sub> (see attached).

I wanted to get this to Jeff and Trina for review starting today if possible.

Mike

Cleve –

I'm attaching the Draft Technical/BACT, which has been revised to incorporate Trina and Jeff's initial review. It is ready for you to develop and incorporate the Air Quality write-up. For starters, I've copied and pasted the language from your report on Units 1 and 2 into that part of the report.

My hope is to have the completed package to Jeff and Trina for review, by the COB on a week from Friday (July 28<sup>th</sup>), so I'd appreciate it if I could get it a day beforehand (next Thursday) so that I can ensure that the formatting is consistent.

If, as a result of your review, you require me to incorporate specific permit conditions, please let me know as soon as you are able, since I am beginning to write the Draft Permit now.

Thanks.

Call if you need to discuss.

Mike
