Mike,

You can change the wording to the following:

“Submit air quality monitoring data gathered by the applicant to the Department in electronic form in EPA’s Air Quality System (AQS) format.

Cleve –

We are updating some of our documents here in Siting and I wanted to know if this is still correct (it is an instruction to the applicant):

“Submit air quality monitoring data gathered by the applicant to the Department in machine-readable form in the Aerometric Information Retrieval System (AIRS) format.”
