Twin Towers Office Building
2600 Blair Stone Road
Tallahassee, FL 32399-2400

Dear Mr. Halpin:

Re: Seminole Generating Station, Units 1 and 2
Control System Replacement Project

Thank you for discussing Seminole Electric Cooperative, Inc.'s (Seminole) plans for a control system replacement project at its Seminole Generating Station. After confirming that this project involves the replacement of equipment that will have no adverse effect on emissions, Seminole understands that the Department agrees that this project can be implemented without PSD review and any air permitting action. Accordingly, Seminole intends to proceed with the project as scheduled.

Seminole appreciates the Department's prompt response and resolution of this matter. If you have any questions, please contact me at (813) 739-1233.

Sincerely,

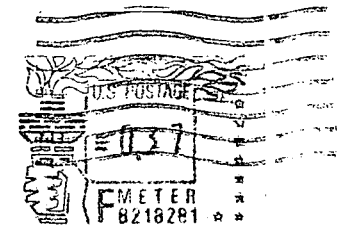

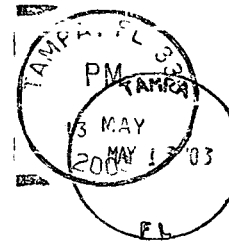

M. P. Opalinski
Director of Environmental
and Engineering Services
