BUREAU OF  
AIR REGULATION

Florida Department of Environmental Protection  
Division of Air Resource Management, Bureau of Air Regulation.  
Attention: Mr. Alvaro Linero  
2600 Blair Stone Road, MS #5505,  
Tallahassee, Florida 32399-2400

**Re: Notice of Intent to Issue Air Permit – Geoplasma-St. Lucie LLC Plasma Gasification Project**

Dear Mr. Linero:

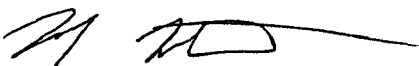

As the developer and supplier of the gasification technology for use in the subject project, Westinghouse Plasma Corporation (WPC) and its parent company, Alter NRG Corp. (Alter), are committed to supporting Geoplasma-St. Lucie and its partners in the successful completion of this project.

The St. Lucie project potentially represents the first plasma gasification energy-from-waste (EFW) project permitted in the United States and, if completed within current timeline expectations, the largest such facility in the world. Currently two plasma gasification facilities having been operating in Japan since 2002 and more recently the world's largest hazardous waste plasma gasification facility began operation in India in 2009. A second hazardous waste plasma facility in India has completed construction and will begin commissioning in late 2010. With operation of these existing facilities, completion of this project will be a major milestone in the continuing deployment of environmentally preferable EFW gasification technologies.

We believe that permitting of this facility will not only be beneficial to the County and State of Florida but to the rest of the United States by providing a North American reference facility for the WPC plasma gasification technology.

As the St. Lucie facility will use plasma gasification to produce electricity via a steam boiler, the plant will provide the basis for more advanced application of plasma technology such as combined cycle power generation and production of liquids such as diesels and ethanol. We believe that this will further enhance the development of the EFW plasma gasification process.

Sincerely yours,

Mark Montemurro,  
Chief Executive Officer and President
