BUREAU OF AIR REGULATION

**PUBLIC NOTICE OF INTENT TO ISSUE AIR CONSTRUCTION PERMIT**

STATE OF FLORIDA  
DEPARTMENT OF ENVIRONMENTAL PROTECTION

Draft Air Permit No. 1130037-007-AC

Florida Gas Transmission Company  
Existing Santa Rosa Compressor Station 12  
Phase VI Project

The Department of Environmental Protection (Department) gives notice of its intent to issue an air construction permit to Florida Gas Transmission Company that authorizes modifications for Engines 1204, 1205, and 1207. The equipment is installed at existing Compressor Station 12, which is located north of Munson on Highway 191, approximately 5 miles north of Highway 4 in Santa Rosa County, Florida. The applicant's authorized representative is Mr. Richard Craig, Vice President of Southwestern Operations. The applicant's mailing address is Florida Gas Transmission Company, P.O. Box 1188, Houston, Texas 77251.

The proposed project is part of Florida Gas Transmission Company's overall Phase VI projects intended to increase the availability and reliability of natural gas supplied by the existing natural gas pipeline. Engine 1207 currently consists of a Solar Model No. Mars 90-T-13000S gas turbine compressor engine rated at 13,000 bhp. The applicant proposes to upgrade this engine to a Solar Mars 100 T-15000S gas turbine rated at 15,000 bhp. The project also includes adding jet cell pre-combustor technology to existing compressor Engines 1204 and 1205. The new jets cells are expected to reduce fuel consumption, lower emissions, and decrease engine maintenance. All engines exclusively fire natural gas.

The proposed increase in gas turbine output from 13,000 to 15,000 bhp will result in a slight increase in the maximum heat input rate and emissions. The upgraded gas turbine remains subject to the federal standards in NSPS Subpart GG. The applicant requested standards more stringent than the federal standards and within the capabilities of the engine to avoid preconstruction review in accordance with the Prevention of Significant Deterioration (PSD) of Air Quality pursuant to Rule 62-212.400, F.A.C. The addition of jet cell pre-combustors to Engines 1204 and 1205 is expected to lower fuel consumption, which should reduce emissions. However, the applicant has not requested any changes to the current emissions standards for these engines.

Upon completion, upgraded Engine 1207 will have the potential to emit the following pollutants: 60 tons of carbon monoxide per year; 49 tons of nitrogen oxides per year; 4 tons of particulate matter per year; 15 tons of sulfur dioxide per year; and 2 ton of volatile organic compounds per year. However, recent contemporaneous projects also include the following: emissions increases due to the addition of a new 15,700 bhp gas turbine compressor engine (Unit 1208); decreases of carbon monoxide emissions from the installation of catalytic converters on Engines 1204 and 1205; decreases in nitrogen oxide emissions from modifications to the turbochargers and control systems on Engines 1204 and 1205; and potential emissions decreases from the addition of jet cell pre-combustor technology on Engines 1204 and 1205. A review of the recent actions shows that the net emissions increases from the combined projects are below the PSD significant emission rates. Therefore, the project remains minor with respect to the PSD preconstruction review program.

The Department will issue the Final Permit with the attached conditions unless a response received in accordance with the following procedures results in a different decision or significant change of terms or conditions. The Department will accept written comments concerning the proposed permit issuance action for a period of fourteen (14) days from the date of publication of this Public Notice of Intent to Issue Air Construction Permit. Written comments should be provided to the Department's Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, FL 32399-2400. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit and require, if applicable, another Public Notice.

The Department will issue the permit with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to Sections 120.569 and 120.57, F.S., before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below. Mediation is not available in this proceeding.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen (14) days of receipt of this notice of intent. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S. must be filed within fourteen (14) days of publication of the public notice or within fourteen (14) days of receipt of this notice of intent, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Department for notice of agency action may file a petition within fourteen (14) days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 F.A.C.

A petition that disputes the material facts on which the Department's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner, the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of how and when petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the Department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

A complete project file is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Florida Department of Environmental Protection  
Bureau of Air Regulation
