Re: Project No. 1170084-009-AC/PSD-FL-376B
Seminole Energy, LLC
Revision to Permit No. 1170084-005-AC/PSD-FL-376
Landfill Gas-to-Energy Project, Carbon Monoxide (CO) Modification

RECEIVED

JAN 23 2012

**DIVISION OF AIR
RESOURCE MANAGEMENT**

Dear Mr. DiGia:

On October 18, 2011, you submitted an application requesting a modification of the carbon monoxide emission limit and provided updated information regarding Phase II for the landfill gas fueled engine generator sets. This facility is located in Seminole County at 1930 Osceola Road in Geneva, Florida. Enclosed are the following documents:

- The Written Notice of Intent to Issue Air Permits provides important information regarding: the Permitting Authority's intent to issue air permits for the proposed project; the requirements for publishing a Public Notice of the Permitting Authority's intent to issue air permits; the procedures for submitting comments on the draft air construction permit revision; the process for filing a petition for an administrative hearing; and, the availability of mediation.
- The Public Notice of Intent to Issue Air Permits is the actual notice that you must have published in the legal advertisement section of a newspaper of general circulation in the area affected by this project. The Public Notice of Intent to Issue Air Permits must be published as soon as possible and the proof of publication must be provided to the Department within seven days of the date of publication.
- The Technical Evaluation and Preliminary Determination, which explains the revisions to underlying construction permit conditions.
- The draft air construction permit revision.

Please submit any written comments you wish to have considered concerning the permitting authority's proposed action to Mr. Syed Arif, P.E., Environmental Administrator, at the above letterhead address. If you have any questions, please contact the project engineer, Leigh-Ann Pell, by telephone at 850/717-9033 or by email at leigh.pell@dep.state.fl.us.

Sincerely,
Electronically Signed

Office of Permitting and Compliance

PUBLIC NOTICE OF INTENT TO ISSUE AIR PERMIT

Florida Department of Environmental Protection
Division of Air Resource Management, Office of Permitting and Compliance

Draft Modification of Air Construction Permit
Project No. 1170084-009-AC/PSD-FL-376B
Seminole Energy, LLC
Seminole County, Florida

Applicant: The applicant for this project is Seminole Energy, LLC. The applicant's authorized representative and mailing address is: Richard M. DiGia, President and Chief Executive Officer of Landfill Energy Systems, Seminole Energy, LLC, 46280 Dylan Dr, Suite 200, Novi, MI 48377.

Facility Location: Seminole Energy, LLC operates an electricity generation plant at the existing Osceola Road Solid Waste Management Facility located at 1930 Osceola Road in Geneva, Seminole County, Florida.

Project: The Osceola Road Solid Waste Management Facility is an existing Class I municipal solid waste landfill classified as a major and Title V Source of air pollution. Seminole Energy, LLC operates four lean-burn spark-ignition reciprocating internal combustion engine/generator sets as part of the electricity generation plant collocated at this site. In order to reduce the amount of landfill gas (LFG) wasted by flaring, all available LFG from the landfill is supplied to Seminole Energy for use as fuel to power the internal combustion engine electricity generation plant. A total of six engine/generator sets were permitted and the two remaining engine/generator sets (Phase II) are proposed to be installed within 18 months of the issuance of this permit. The applicant requests a modification to the carbon monoxide (CO) emissions standard as Best Available Control Technology (BACT) for the existing and proposed engine/generator sets to maintain low nitrogen oxides (NOx) emissions. An engine can be tuned to achieve low NOx emissions at the price of higher CO emissions or vice versa. The two existing flares will be retained as additional combustion devices for the landfill gas. The landfill gas is routed through a landfill gas treatment system and then to the engines. As necessary, residual landfill gas will be routed to the flares. The project will result in a potential CO emissions increase at the existing landfill of 144.2 tons/year.

The proposed project is subject to preconstruction review pursuant to Rule 62-212.400, Florida Administrative Code (F.A.C.) for the Prevention of Significant Deterioration (PSD) of Air Quality for CO emissions, which requires a BACT determination and air quality modeling analyses. The revised CO BACT emissions standard is based on the lean-burn combustion design combined with good operating and maintenance practices. All other permitted emissions limits will remain unchanged.

The Department reviewed the air quality analyses prepared by the applicant. The project has no predicted significant impact for CO emissions in the nearest PSD Class I area (Okefenokee National Wildlife Refuge). Therefore, a multi-source modeling analysis for PSD Class I increment was not required. The predicted impacts of CO are well below the corresponding PSD Class II significant impact levels and no further analysis was required.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.) and Chapters 62-4, 62-210 and 62-212, F.A.C. The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Florida Department of Environmental Protection's Division of Air Resource Management's Office of Permitting and Compliance is the Permitting Authority responsible for making a permit determination for this project. The Office of Permitting and Compliance's physical address is 111 South Magnolia Drive, Suite 4, Tallahassee, Florida 32301 and the mailing address is 2600 Blair Stone Road, MS #5505, Tallahassee, Florida 32399-2400. The Office of Permitting and Compliance's phone number is 850/717-9000.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m., Monday through Friday (except legal holidays), at address indicated above for the Permitting Authority. The complete project file includes the Draft Permit, the Technical Evaluation and Preliminary Determination, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.114, F.S. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address and phone number listed above. In

addition, electronic copies of these documents are available on the following web site by entering draft permit number: <http://www.dep.state.fl.us/air/emission/apds/default.asp>

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue an air permit to the applicant for the project described above. The applicant has provided reasonable assurance that operation of the proposed equipment will not adversely impact air quality and that the project will comply with all applicable provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-296 and 62-297, F.A.C. The Permitting Authority will issue a Final Permit in accordance with the conditions of the proposed Draft Permit unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, F.S. or unless public comment received in accordance with this notice results in a different decision or a significant change of terms or conditions.

Comments: The Permitting Authority will accept written comments concerning the proposed Draft Permit and requests for a public meeting for a period of 30 days from the date of publication of the Public Notice. Written comments must be received by the Permitting Authority by close of business (5:00 p.m.) on or before the end of this 30-day period. In addition, if a public meeting is requested within the 30-day comment period and conducted by the Permitting Authority, any oral and written comments received during the public meeting will also be considered by the Permitting Authority. If timely received comments result in a significant change to the Draft Permit, the Permitting Authority shall revise the Draft Permit and require, if applicable, another Public Notice. All comments filed will be made available for public inspection.

Petitions: A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed with (received by) the Department's Agency Clerk in the Office of General Counsel of the Department of Environmental Protection, 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of this Public Notice or receipt of a written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Permitting Authority for notice of agency action may file a petition within 14 days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Permitting Authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner; the name, address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of when and how each petitioner received notice of the agency action or proposed decision; (d) A statement of all disputed issues of material fact; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action including an explanation of how the alleged facts relate to the specific rules or statutes; and, (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action. A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the

Permitting Authority's final action may be different from the position taken by it in this Public Notice of Intent to Issue Air Permit. Persons whose substantial interests will be affected by any such final decision of the Permitting Authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation: Mediation is not available in this proceeding.
