My day 30 is October 13, 2005.

Attached is my rough draft of an incompleteness letter, if I get close to day 30.

I have not yet been able to reach Mr. Lee at his desk, after telling you I would email you the modifications to the op permit application yesterday. I understand that you can not wait too long due to the review period, but we have completed the modifications to the permit application, again I just want to make sure the Mill agrees with how we are suggesting they change their records. I'm not sure how much you can wait before sending out an RAI on this but I do appreciate your consideration.
