**CERTIFIED MAIL- RETURN RECEIPT REQUESTED**

**Article Number: 7007-2680 0000 1952 7839**

Dear Mr. Graham:

This letter is written in response to your letter dated August 14, 2008. The responses will assume the numerology of that letter.

1. A copy of the VOC records from September 2007 to September 2008 is attached. A copy of the daily operation times is also attached. Please note that the Spray Booth designations are not used by the facility since lacquer was removed from the process. There are currently five spray booths in the Spray Area. Since lacquer coatings were removed from the process, the configuration of the spray booths was rearranged. Spray Booth A originally handled wipe stain, Spray Booth B originally handled a toner, Spray Booth C originally handled sealer, Spray Booth D and E originally handled touch up or special processes before the lacquer, Spray Booth H originally handled lacquer, and Spray Booth F originally handled all other chemicals used in the process. There are currently five spray booths in the spray area and one spray booth in the laminating area. In the spray area, one booth is used for stain, one booth is used for sealer, one booth used to scuff sand the sealer prior to conversion varnish, one booth is used for the conversion varnish and one booth is not used. Since one of the booths is no longer used, it will be removed in the near future. The laminating booth will be relocated to the spray area in the near future. Based on the need to continually evaluate materials and methodology, PRIDE is requesting that the spray booth

Telephone: (813) 930-9074  
FAX: (813) 935-1167

- designations (A, B, C, D, E, F, and H) be removed from the new permit and simply state that spray booths are used in the wood surfacing operation.
2. A current process flow diagram is attached. Raw materials are received in the receiving area and sent to the panel saw for cutting of the wood blanks. Some of the material may go to the laminating area for surfacing with a laminate. Some of the material will go directly to the parts processing area for assembly. Material that has been laminated would also flow to this area. Products that require finishing would go to the spray area for staining, sealing and conversion varnish top coating. These finished products go to a heat tunnel for drying and flow to the shipping department for packaging and shipping.
  3. A site plan is attached showing the current floor plan and configurations.

If you have any questions concerning this submittal, please do not hesitate to call me at (813) 930-9074.

Sincerely,

Timothy M. O'Dell  
Environmental Scientist

Emissions Unit ID \_\_\_\_\_

### III. EMISSIONS UNIT INFORMATION

A separate Emissions Unit Information Section must be completed for each emissions unit addressed in this Application for Non-Title V Air Permit Renewal. If submitting the form in hard copy, indicate, in the space provided at the top of each page, the Emissions Unit ID of the emissions unit addressed on the page, as given in the unit's most current air operation permit.

#### Emissions Unit Description and Status

1. Description of Emissions Unit Addressed in This Section (limit to 60 characters): Furniture Manufacturing	
2. Emissions Unit Status Code: Active	3. Long-Term Reserve Shutdown Date: NA
4. Control Equipment Method/Description (limit to 200 characters per device or method): No control equipment other than general operating procedures to keep solvent containers tightly sealed, material balance and recordkeeping.	

#### Emissions Unit Operating Capacity and Schedule

1. Maximum Heat Input Rate:		mmBtu/hr
2. Maximum Incineration Rate:	lb/hr	tons/day
3. Maximum Process or Throughput Rate:		
4. Maximum Production Rate:	23.04 Ton VOC per year	
5. Requested Maximum Operating Schedule:		
	hours/day	days/week
	weeks/year	3120 hours/year
