MEMORANDUM

TO: Gerald J. Kissel, P.E.
District Air Program Administrator

DATE: 8/29/03

THROUGH: Eric Peterson, P.E. *EP*
Air Permitting Supervisor, SWD

FROM: Danielle Henry, Air Permitting Engineer *DH*

SUBJECT: Company: Global Tire Recycling
Permit Nos: 1190028-003-AC (Modification) & 1190028-004-AO (Amendment)
Final Issuance
County: Sumter
Project: Construction Modification Permit & Amended Operation Permit

The Intent to Issue Public Notice for the above permit was published on August 14, 2003 in the Sumter County Times weekly newspaper. I have reviewed the proof of publication and verified that the correct notice was published.

I recommend issuance of this final permit modification and amendment, which is identical to the draft permit modification and amendment approved by this office as part of the Notice of Intent package.

MEMORANDUM

TO: Gerald J. Kissel, P.E.
District Air Program Administrator

DATE: 7/29/03

THROUGH: Eric Peterson, P.E. 
Air Permitting Supervisor, SWD

FROM: Danielle Henry, Air Permitting Engineer 

SUBJECT: Company: Global Tire Recycling
Permit No: 1190028-003-AC (Modification) & 1190028-004-AO (Amendment)
(Intent to Issue & Public Notice)
County: Sumter
Default Date (Day 90): September 28, 2003

From the information below, I recommend that the Intent to Issue for the two permits for Global Tire Recycling be signed.

On June 30, 2003, the Department received a request from Global Tire Recycling to increase the allowable operating hours from 6000 hours per 12-month consecutive period to 8760 hours per 12-month consecutive period. This request includes a modification of their construction permit (1190028-001-AC) and an amendment of their operation permit (1190028-002-AO).

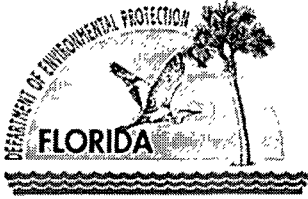

The crumb rubber manufacturing plant consists of (1) waste tire receiving, storage and staging areas, (2) a rotary shear type tire shredder, (3) two cracker mills in series with hooded air separator screens, (4) three fine grind mills in parallel with hooded air separator screens, (5) intermediate and final product storage bins, and (6) final product bagging and bulk loading. Particulate emissions from the 2 gravity separators (destoners) and 12 hooded air separation screening operations are controlled by a MAC Environmental, Model 144WMC338 baghouse.

According to the air construction permit application dated April 1998, the maximum annual production rate of the crumb rubber is limited by the production rate capacity of the 3 parallel fine grind mills. The maximum projected annual production rate is 16,000 tons of mesh size crumb rubber beads. This value is based on operating the 3 fine grind mills at 90% capacity on an annual average basis, operating them 24 hours/day, 5 days/week, 50 weeks/year (or 6000 hours per year). These specified hours of operation were incorporated into the construction permit. The construction permit also states that the maximum input rate shall not exceed 20,000 tons/year.

According to the initial air operation permit application dated June 27, 1999, the maximum annual production rate of the crumb rubber remained the same – 16,000 tons of mesh size crumb rubber – but the permittee requested a change in the maximum operating hours schedule from 6000 hours per year to 8760 hours per year. This request was not incorporated into the initial air operating permit which was issued on 10-14-99.

During the review process, a permit violation of operating hours (Specific Condition #3) in the current operating permit (1190028-002-AO) was discovered. Specifically, the facility's 12 month rolling hours of operation for 2001 and 2002 were greater than the permitted limitation of 6000 hours per 12-month consecutive period which was noted on the Global Tire Recycling Air Quality Production Records attached to the Annual Air Compliance Inspection report dated March 13, 2003. On July 11, 2003, I notified Shelia Schneider, Enforcement Coordinator, of my findings. After a review of the permit and compliance files and follow-up discussions with Shelia, it was determined that enforcement action was not warranted. Shelia has no objections to the issuance of this permit modification.

In conclusion, I recommend that the hours of operation be increased to 8760 hours per 12-month consecutive period. Although there will be an increase in potential particulate emissions (controlled), the increase is expected to be small since both the production cap and corresponding potential emissions (1 TPY) will remain unchanged. Due to equipment limitations, the maximum production capacity cannot be changed and will remain limited to 20,000 tons/year. The recordkeeping conditions of the current permits were also updated to delete the monthly and twelve-month rolling totals of the hours of operation which is no longer required as a permit condition. Upon issuance of the permit, the facility will continue to be considered as a minor source, non-Title V facility.

P.E. Certification Statement

Permittee: Global Tire Recycling

Project type: Increase Hours of Operation

Permit No.: 1190028-003-AC

I HEREBY CERTIFY that the engineering features described in the above referenced application and subject to the proposed permit conditions provide reasonable assurance of compliance with applicable provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Chapters 62-4 and 62-204 through 62-297. However, I have not evaluated and I do not certify aspects of the proposal outside of my area of expertise (including, but not limited to the electrical, mechanical, structural, hydrological, and geological features).
