**MEMORANDUM**

**To:** Mara Grace Nasca  
District Air Program Administrator

**Through:** Cindy Zhang-Torres, P.E. *cf*  
Air Program Permitting Supervisor

**From:** Danny Stubbs *DS*

**Date:** 11/29/2007

**Subject:** Permit recommendation for Global Tire Recycling of Sumter County, Inc. (1190028-005-AC and 1190028-006-AO).

**Day 90:** 12/17/2007

I recommend permits 1190028-005-AC and 1190028-006-AO (one document) for Global Tire Recycling of Sumter County, Inc. be issued.

There have been no changes to the permit as it was originally proposed with the Intent to Issue.

The public notice was properly published on November 15, 2007, as required and as of this date no comments have been received.

## P.E. CERTIFICATE STATEMENT

### PERMITTEE

Global Tire Recycling of Sumter County, Inc.

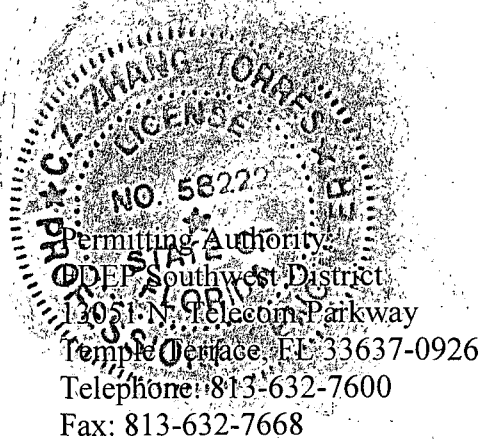

Draft Air Permit Nos. 1190028-005-AC  
and 119008-006-AO

Project Type: AC1F and AO2B

Permit Description: increase crumb rubber production from 20,000 to 26,280 tons per year and renew the operation permit for the crumb rubber manufacturing facility.

**I HEREBY CERTIFY** that the air pollution control engineering features described in the above referenced application and subject to the proposed permit conditions provide reasonable assurance of compliance with applicable provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Chapters 62-4 and 62-204 through 62-297. However, I have not evaluated and I do not certify aspects of the proposal outside of my area of expertise (including, but not limited to, the electrical, mechanical, structural, hydrological and meteorological features).

Cindy Zhang-Torres 7/2/07

License Number: 58222

## MEMORANDUM

**To:** Mara Grace Nasca  
District Air Program Administrator

**Through:** Cindy Zhang-Torres, P.E. *CJ*  
Air Program Permitting Supervisor

**From:** Danny Stubbs *DS*

**Date:** June 25, 2007

**Subject:** Permit recommendation for Global Tire Recycling Of Sumter County, Inc. (1190028-005-AC and 1190028-006-A0).

**Day 90:** 8/27/2007

On April 17<sup>th</sup>, 2007, the Department received a construction/renewal permit application from Global Tire Recycling Of Sumter County, Inc. to renew the operation permit for their crumb rubber manufacturing facility. The operation permit for this facility expired on October 13<sup>th</sup>, 2004, and the facility just recently applied to renew their permit.

The compliance inspector, Arthur Bosshart, informed me via email on 4/23/2007, that he conducted an inspection of the facility on 3/21/2007 and discovered their permit had expired. As a result, he submitted referral for enforcement to Danielle Henry. Based on his inspection, he found that operation of the facility and equipment had not changed and the expired permit descriptions were still valid.

Danielle Henry informed me via email on 5/03/2007 that the facility had an enforcement referral in-house and a warning letter would be sent to the facility. She also stated that there were no other enforcement issues discovered at the facility.

After reviewing the permit application, a request for additional information letter was mailed on 5/7/2007. This letter was a request for clarification of production rate listed in the application. Two different values were listed for a production rate that is also a permit limit in previous permits. A response letter containing the requested information was received on 5/29/2007. The response included the correct production rate along with corrected emission calculations. Since the permitted production rate of the facility was affected by this information, a construction permit is necessary.

Visible emissions tests were conducted on 4/10/2007 and showed compliance with the permit VE limitations.

I recommend the Intent to Issue for Global Tire Recycling Of Sumter County, Inc. be signed.

TECHNICAL EVALUATION  
AND  
PRELIMINARY DETERMINATION  
FOR

**Global Tire Recycling Of Sumter County, Inc.**

Sumter County

Construction Permit Application Number

1190028-005-AC

**Crumb Rubber Manufacturing Facility**

Florida Department of Environmental Protection

Southwest District

Tampa, FL

July 2, 2007

Prepared by: Danny Stubbs

**I. Project Description:****A. Applicant:**

Mr. Mark J. Bailey  
Vice President, Plant Operations  
Global Tire Recycling Of Sumter County, Inc.  
1201 Industrial Drive  
Wildwood, Florida 34785

**B. Engineer:**

Mr. Rama Iyer, P.E.  
Southern Environmental Sciences, Inc.  
1204 North Wheeler Street  
Plant City, Florida 33563

**C. Project and Location:**

This project is for the permit renewal and construction modification of an existing, synthetic non-Title V, crumb rubber manufacturing facility. The construction modification will increase the maximum process production rate from 20,000 tons/year to 26,280 tons/year. The facility manufacture crumb rubber 1/8 to 3/8 inch in diameter. The facility located at 1201 Industrial Drive, Wildwood, Sumter County.

**D. Process and Controls:**

This permit is for the operation of a synthetic non-Title V crumb rubber manufacturing facility. This facility consists of (1) waste tire receiving, storage and staging areas, (2) a rotary shear type tire shredder, (3) two cracker mills in series with hooded air separator screens, (4) three fine grind mills in parallel with hooded air separator screens, (5) intermediate and final product storage bins, and (6) final product bagging and bulk loadout bins.

In this process, waste tires are passed through a shredder that reduces the tires to 2-4 inch chips. The chips are then passed through two cracker mills that further reduce the size of the chips and separates the fiber, metal tread and cord material from the rubber. The metal is removed with magnets and the fiber and other foreign material is removed on air aspirated screening tables and gravity tables. The separation process results in debris free rubber 1/8 to 3/8 inch in diameter. Oversized rubber is fed back into the cracker mills. Fine grinding mills then reduce the rubber to mesh-sized crumb rubber product. Each fine grind mill is followed by an air aspirated screening operation. Oversize material is feed back to the fine grind mills. The final product is then conveyed via a screw elevator to a loadout hopper for bagging or bulk shipment to customers.

Particulate matter emissions from the air aspirated screening processes are vented through a common baghouse (MAC Environmental, Model 144WMCF338) before being discharged to the atmosphere. Because of the enclosure of the process and the nature of the raw material and the product, there are no significant fugitive emissions associated with this process.

## E. Application Information:

Description	Date Received	Application Complete?
Application	04/17/2007	No
RAI Response	5/29/2007	Yes

II. Rule Applicability

This project is subject to the preconstruction review requirements of Chapter 403, Florida Statutes and Chapters 62-204 through 62-297, Florida Administrative Code (F.A.C.), as indicated below.

Subject to:	Y/N
Rule 62-212.300, Sources Not Subject to Prevention of Significant Deterioration or Nonattainment Requirements, F.A.C. <sup>1</sup>	Y
Rule 62-212.400, Prevention of Significant Deterioration, F.A.C. <sup>2</sup>	N
Rule 62-296.320, General Particulate Emission Limiting Standards, F.A.C. <sup>3</sup>	Y
Rule 62-296.320, General Pollutant Emission Limiting Standards, F.A.C. <sup>4</sup>	N
Rule 62-296.400, Stationary Source Emission Standards, F.A.C. <sup>5</sup>	N
Rule 62-296.500, Reasonably Available Control Technology (VOC) <sup>6</sup>	N
Rule 62-296.700, Reasonably Available Control Technology (PM) <sup>7</sup>	N
Rule 62-204.800, Standards of Performance for New Stationary Sources, F.A.C. <sup>8</sup> (NSPS)	N
Rule 62-204.800, National Emission Standard for Hazardous Air Pollutants, F.A.C. <sup>9</sup> (NESHAPS)	N
Chapter 62-213, Operation Permits for Major Sources of Air Pollution, F.A.C. <sup>10</sup>	N
Rule 62-297.310, General Compliance Test Requirements, F.A.C. <sup>11</sup>	Y

1. Not exempt from general permitting requirements
2. Facility is PSD minor source
3. Facility is a source of particulate emissions.
4. Facility is not a source of VOCs.
5. There are no applicable source categories.
6. There are no applicable source categories.
7. There are no applicable source categories.
8. There are no applicable source categories.
9. Facility is minor for HAPs.
10. Facility is a synthetic non-Title V source.
11. Compliance testing is required.

### III. Summary of Operational and Emission Limitations

#### Permitted Operational Limits:

Description	Hours of operation	Production
Facility	8760 hours/year	26,280 tons/year

#### Potential Emissions (Tons/Year):

Description	PM
Baghouse (EU-001)	2.63

*Note: Emissions potential listed above is based upon the used of a baghouse control device with a capture efficiency of 99.9%. PM is generated in the process from the (1) chord and thread fibers separated from the tires (approximately 5% of the total tire weight) and (2) by tire dust and foreign matter generated during the process (less than 5% of tire weight).*

#### Allowable Emissions:

Allowable Pollutant Limits	
Description	Maximum PM Emission Rate (Pounds Per Hour)
Baghouse (EU-001) (Process Input @ 8.0 tons/hour)	13.0*

*\* For lower process input rates, the emission rate limit shall be determined using the process weight table or equation contained in 62-296.320(4)(a)2. F.A.C.*

Allowable Visible Emissions			
Description	Opacity Limit	Test Method(s)	Rule Basis
Baghouse (EU-001)	5% in lieu of Stack test	Method 9	Rules 62-297.620(4) and 62-296.320(4)(b)1., F.A.C

#### Title V Applicability Determination

This is a synthetic non-Title V facility based on Particulate Matter (PM) emission limitation and the necessity of baghouse control devices for particulate matter emissions control.

#### PSD Applicability Determination

This facility is a minor source as defined by the Prevention of Significant Deterioration (PSD) regulation; therefore, PSD is not applicable.

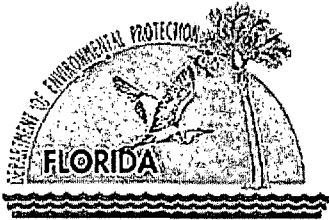

**IV. Conclusions**

The emission limits proposed by the applicant will meet all of the requirements of Chapters 62-204 through 297, F.A.C.

The general and Specific Conditions listed in the proposed permit (attached) will assure compliance with all the applicable requirements of Chapters 62-204 through 297, F.A.C.

**V. Proposed Agency Action**

Pursuant to Section 403.087, Florida Statutes and Section 62-4.070, Florida Administrative Code, the Department hereby gives notice of its intent to issue a permit to construct the aforementioned air pollution source in accordance with the draft permit and its conditions as stipulated (see attached).

## WAIVER OF 90 DAY TIME LIMIT UNDER SECTIONS 120.60(2) AND 403.0876, FLORIDA STATUTES

LICENSE (PERMIT, CERTIFICATION) APPLICATION NO: 1190028-005-AC/1190028-  
APPLICANT'S NAME: Global Tire Recycling of Sumner City 006-AD  
COMPANY/OWNER Inc.

The undersigned has read Sections 120.60(2) and 403.0876, Florida Statutes, and fully understands the applicant's rights under that section.

With regard to the above referenced license (permit, certification) application, the applicant hereby with full knowledge and understanding of (his) (her) (its) rights under Sections 120.60(2) and 403.0876, Florida Statutes, waives the right under Sections 120.60(2) and 403.0876, Florida Statutes, to have the application approved or denied by the State of Florida Department of Environmental Protection within the 90 day time period prescribed in Sections 120.60(2) and 403.0876, Florida Statutes. Said waiver is made freely and voluntarily by the application, is in (his) (her) (its) self-interest, and without any pressure or coercion by anyone employed by the State of Florida Department of Environmental Protection.

This waiver shall expire on the 24<sup>th</sup> day of November 2007.

The undersigned is authorized to make this waiver on behalf of the applicant.

Section 120.60, Florida Statutes

(2) When an application for a license is made as required by law, the agency shall conduct the proceedings required with reasonable dispatch and with due regard to the rights and privileges of all affected parties or aggrieved persons. Within 30 days after receipt of an application for a license, the agency shall examine the application, notify the applicant of any apparent errors or omissions, and request any additional information the agency is permitted by law to require. Failure to correct an error or omission or to supply additional information shall not be grounds for denial of the license unless the agency timely notified the applicant within this 30 day period. The agency shall notify the applicant if the activity for which he seeks a license is exempt from the licensing requirement and return any tendered application fee within 30 days after receipt of the original application or within 10 days after receipt of the timely requested additional information or correction of errors or omissions. Every application for license shall be approved or denied within 90 days after receipt of the original application or receipt of the timely requested additional information or correction of errors or omissions unless a shorter period of time for agency action is provided by law. The 90-day or shorter time period shall be tolled by the initiation of a proceeding under Section 120.57 and shall resume 10 days after the recommended order is submitted to the agency and the parties. Any application for a license not approved or denied within the 90-day period or shorter time period within 15 days after conclusion of a public hearing held on the application, or within 45 days after the recommended order is submitted to the agency and the parties, whichever is latest, shall be deemed approved and, subject to the satisfactory completion of an examination, if required as prerequisite to licensure, the license shall be issued. The Public Service Commission, when issuing a license, and any other agency, if specifically exempted by law, shall be exempt from the time limitations within this subsection. Each agency, upon issuing or denying a license, shall state with particularity the grounds or basis for the issuance or denial of same, except where issuance is a ministerial act. On denial of a license application on which there has been no hearing, the denying agency shall inform the applicant of any right to a hearing pursuant to Section 120.57.

Section 403.0876, Florida Statutes

Permits; processing. ---Within 30 days after receipt of an application for a permit under this chapter, the department shall review the application and shall request submittal of all additional information the department is permitted by law to require. If the applicant believes any departmental request for additional information is not authorized by law or departmental rule, the applicant may request a hearing pursuant to S. 120.57. Within 30 days after receipt of such additional information, the department shall review it and may request only that information needed to clarify such additional information or to answer new questions raised by or directly related to such additional information. If the applicant believes the request of the department for such additional information is not authorized by law or departmental rule, the department, at the applicant's request, shall proceed to process the permit application. Permits shall be approved or denied within 90 days after receipt of the original application, the last item of timely requested additional material, or the applicant's written request to begin processing the permit application.

Re: Application dated April 13, 2007  
DEP File No. 1190028-005-AC & 1190028-006-AO

Dear Mr. Bailey:

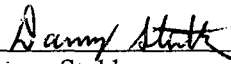

On April 13, 2007, the Department received your application for an air construction & operation permit. The application is not considered complete. In order to continue processing the application, the Department will need the following additional information pursuant to Rules 62-4.055 and 62-4.070(1), F.A.C.:

Please refer to page 15 of the application. Potential emissions of 2.0 tons/year of PM were calculated based upon a 20,000 tons/year maximum projected annual production rate. However on page 12, a maximum production rate of 6,000 pound/hr (or 26,280 ton/year @ 8760 hours/year) is listed. Please recalculate the potential emissions using the maximum production rate specified on page 12, item 4 of the application or explain why 20,000 tons/year is valid. Please make all necessary corrections and resubmit the page(s).

NOTE - Rule 62-4.050, F.A.C. requires applications of this type must be certified by a professional engineer registered in the State of Florida. This requirement also applies to responses to Department requests for additional information of an engineering nature. Therefore, your response to the above requests should be certified by a professional engineer.

Your response should be submitted by June 21, 2007. If you have any questions, please call me at 813-632-7600 extension 159.

Sincerely,

  
\_\_\_\_\_  
Danny Stubbs

Danny,

I am currently working on a enforcement case for this facility operating without a permit. I plan to have the Warning Letter out next week. I did not see any other enforcement issues with this facility. I'll let you know if an enforcement meeting is scheduled so you can participate.

Danielle

**Subject:** RE: Global Tire Recycling 1190028-005-AC and 006-AO

Danny,

The old process description is accurate with their current process, nothing has changed. Also, they have not replaced any of the process equipment. There is really no new technical information of significance for permitting. During my inspection I did not observe any issues that would cause FDEP to not have reasonable assurance to modify and/or issue the renewal. Global Tire's operating conditions were within the specified limitations of their old permit 1190028-004-AO. I understand all permitted conditions listed along with the associated method of compliance. I had a detailed discussion with the plant manager in regards to his permit and process with which he is in understanding of and can demonstrate full compliance satisfactorily. Records are kept or are compiled into the fashion outlined in the permit.

Let me know if there is anything else that you would like to know.

**Subject:** RE: Global Tire Recycling 1190028-005-AC and 006-AO

Do you have any technical comments or other comments regarding the facility's desire to renew this permit? If your comments are of great detail, I encourage discussing them directly with Danny.

Were there any problems noted in the last inspection that do not give the FDEP reasonable assurance to modify and/or issue this renewal permit?

Are there any facility descriptions and/or operations that do not match what you saw onsite?

Are there any permit conditions that are vague and subject to different interpretations?  
 Can compliance with certain permit conditions be verified?

Are records being maintained in the manner or form described in the permit? If not, how are they being maintained or in what form are they being maintained?

Is the facility description within the permit correct? If not, what specifically has changed with the facility?

Any other input you may have that will help the Permitting Section write a better permit?

---

Project Number: 1190028-005-AC and 006-AO  
Receipt Date: 04/17/07  
Response Due Date: 05/02/07  
Assigned Inspector: Art Bosshart

Last Facility Inspection (ARMS): 3/21/07

Permit Engineer: Danny Stubbs

The facility's operation permit expired in 2004. The facility was found operating without a permit during an inspection conducted on March 21, 2007. The two permit applications were submitted as a corrective action. Please let the Permit Engineer know by the date above if you have any changes for the permit, items to add to a potential incompleteness letter, or any other concerns you may have with this project.
