RE: Air Operating Permit Application
Charlotte Pipe and Foundry Company, Wildwood, Florida
Facility ID: 1190030
AEI Job No. N188-83

Dept. of Environmental
Protection
OCT 10 2006
Southwest District

Dear Mr. Waters:

On behalf of Charlotte Pipe and Foundry Company, Plastics Division (CPFC), AWARE Environmental® Inc. (AEI) is submitting the required four (4) copies of an Air Operating Permit Application. The Air Operating Permit is being requested so the facility may increase its currently permitted VOC and total hazardous air pollutant (HAP) emission limits from 5.0 tons in any consecutive 12-month period to 15 tons in any consecutive 12-month period. The facility also wishes to establish a permit limit of 9.9 tons in any consecutive 12-month period for individual HAP emissions.

A \$1,000 check to cover the permit application fee is included. If you have any questions or concerns regarding the attached permit application, please contact me at (704) 815-1677.

Sincerely,

AWARE Environmental® Inc.

A handwritten signature in black ink, appearing to read "Marty Stewart", is written over a horizontal line.

**SECTION 1.0
INTRODUCTION**

Dept. of Environmental
Protection
OCT 10 2006
Southwest District

Charlotte Pipe and Foundry Company, Plastics Division (CPFC) is requesting an Air Operating Permit Modification for its Polyvinyl Chloride (PVC) and Chlorinated Polyvinyl Chloride (CPVC) pipe manufacturing facility. The facility is located in Wildwood, Florida (Figure 1) and currently operates under a Synthetic Minor Non-Title V Air Operating Permit (Permit No. 1190030-009-AO). The Air Operating Permit Modification is being requested to incorporate the facility's increase in its currently permitted VOC and total hazardous air pollutant (HAP) emission limits from 5.0 tons in any consecutive 12-month period to 15 tons in any consecutive 12-month period as detailed in Construction Permit No. 1190030-010-AC.

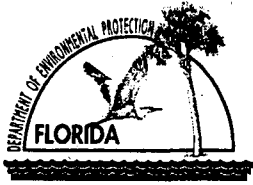

The Air Operating Permit Modification is also being requested to incorporate the facility's increase in its currently permitted individual HAP emission limits from 5.0 tons in any consecutive 12-month period to 9.9 tons in any consecutive 12-month period as detailed in Construction Permit No. 1190030-010-AC.

The facility is considered a Synthetic Minor Non-Title V source of air emissions. The increase of its currently permitted VOC and total HAP emission limits to 15 tons in any consecutive 12-month period, along with the increase of its currently permitted individual HAP emission limits to 9.9 tons in any consecutive 12-month period, will not change the facility's Synthetic Minor classification. If not subject to limitations, the facility would emit VOCs from its inkjet printing process above Title V thresholds if the facility's inkjet printers were running constantly at full capacity. The inkjet printers are not reasonably expected to run at full capacity and their potential emissions have been limited based on the facility's permitted production throughput rate. The ink and additive use associated with the inkjet printing process is directly related to pipe production.

On December 14, 2005, the United State Environmental Protection Agency delisted Methyl Ethyl Ketone (MEK) as a HAP. The Florida Department of Environmental Protection followed this action by delisting MEK as a HAP on April 1, 2006. To maintain consistency with Construction Permit No. 1190030-010-AC, the emission limits established in the permit are

being requested in this Air Operating Permit Modification Application; however, MEK is no longer included in the attached calculations as it is no longer considered a HAP.

APPLICATION FOR AIR PERMIT – LONG FORM

Department of Environmental Protection

Division of Air Resources Management

APPLICATION FOR AIR PERMIT - NON-TITLE V SOURCE

See Instructions for Form No. 62-210.900(3)

I. APPLICATION INFORMATION

Identification of Facility

1. Facility Owner/Company Name: Charlotte Pipe and Foundry Company	
2. Site Name: Charlotte Pipe and Foundry Company- Plastics Division, Wildwood, Florida	
3. Facility Identification Number: 1190030 [] Unknown	
4. Facility Location: Street Address or Other Locator: County Road 124 A City: Wildwood County: Sumter Zip Code: 34785	
5. Relocatable Facility? [] Yes [X] No	6. Existing Permitted Facility? [X] Yes [] No

Application Contact

1. Name and Title of Application Contact: Marty Stewart, Scientist		
2. Application Contact Mailing Address: Organization/Firm: AWARE Environmental ® Inc. Street Address: 9305 Monroe Road Suite J City: Charlotte State: NC Zip Code: 28270		
3. Application Contact Telephone Numbers: Telephone: (704) 815-1677 Fax: (704) 845-1759		

Application Processing Information (DEP Use)

1. Date of Receipt of Application:	10-10-06
2. Permit Number:	1190030-011-A0

Purpose of Application

Air Operation Permit Application

This Application for Air Permit is submitted to obtain: (Check one)

- ☐ Initial non-Title V air operation permit for one or more existing, but previously unpermitted, emissions units.
- ☐ Initial non-Title V air operation permit for one or more newly constructed or modified emissions units.

Current construction permit number: _____

- ☐ Non-Title V air operation permit revision to address one or more newly constructed or modified emissions units.

Current construction permit number: _____

Operation permit number to be revised: _____

- ☐ Initial non-Title V air operation permit under Rule 62-210.300(2)(b), F.A.C., for an existing facility seeking classification as a synthetic non-Title V source.

Current operation/construction permit number(s): _____

- ☒ Non-Title V air operation permit revision for a synthetic non-Title V source. Give reason for revision; e.g., to address one or more newly constructed or modified emissions units.

Operation permit number to be revised: 1190030-009-AO

Reason for revision: To address changes outlined in Construction Permit No.

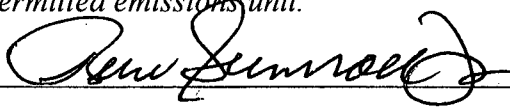

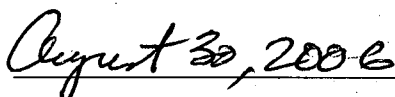

1190030-010-AC

Air Construction Permit Application

This Application for Air Permit is submitted to obtain: (Check one)

- ☐ Air construction permit to construct or modify one or more emissions units.
- ☐ Air construction permit to make federally enforceable an assumed restriction on the potential emissions of one or more existing, permitted emissions units.
- ☐ Air construction permit for one or more existing, but unpermitted, emissions units.

Owner/Authorized Representative

1. Name and Title of Owner/Authorized Representative: Reese Sumrall, Jr.
2. Owner/Authorized Representative Mailing Address: Organization/Firm: Charlotte Pipe and Foundry Company- Plastics Division Street Address: 4210 Old Charlotte Highway City: Monroe State: NC Zip Code: 28110
3. Owner/Authorized Representative Telephone Numbers: Telephone: (704) 291-3211 Fax: (704) 291-3204
4. Owner/Authorized Representative Statement: <i>I, the undersigned, am the owner or authorized representative* of the facility addressed in this application. I hereby certify, based on information and belief formed after reasonable inquiry, that the statements made in this application are true, accurate and complete and that, to the best of my knowledge, any estimates of emissions reported in this application are based upon reasonable techniques for calculating emissions. The air pollutant emissions units and air pollution control equipment described in this application will be operated and maintained so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof. I understand that a permit, if granted by the Department, cannot be transferred without authorization from the Department, and I will promptly notify the Department upon sale or legal transfer of any permitted emissions unit.</i>   Signature Date

* Attach letter of authorization if not currently on file.

Professional Engineer Certification

1. Professional Engineer Name: Edward C. Fiss, Jr. Registration Number: 40330
2. Professional Engineer Mailing Address: Organization/Firm: AWARE Environmental ® Inc. Street Address: 9305 Monroe Road Suite J City: Charlotte State: NC Zip Code: 28270
3. Professional Engineer Telephone Numbers: Telephone: (704) 845-1697 Fax: (704) 845-1759

4. Professional Engineer Statement:

I, the undersigned, hereby certify, except as particularly noted herein, that:*

(1) To the best of my knowledge, there is reasonable assurance that the air pollutant emissions unit(s) and the air pollution control equipment described in this Application for Air Permit, when properly operated and maintained, will comply with all applicable standards for control of air pollutant emissions found in the Florida Statutes and rules of the Department of Environmental Protection; and

(2) To the best of my knowledge, any emission estimates reported or relied on in this application are true, accurate, and complete and are either based upon reasonable techniques available for calculating emissions or, for emission estimates of hazardous air pollutants not regulated for an emissions unit addressed in this application, based solely upon the materials, information and calculations submitted with this application.

If the purpose of this application is to obtain an air construction permit for one or more proposed new or modified emissions units (check here [], if so), I further certify that the engineering features of each such emissions unit described in this application have been designed or examined by me or individuals under my direct supervision and found to be in conformity with sound engineering principles applicable to the control of emissions of the air pollutants characterized in this application.

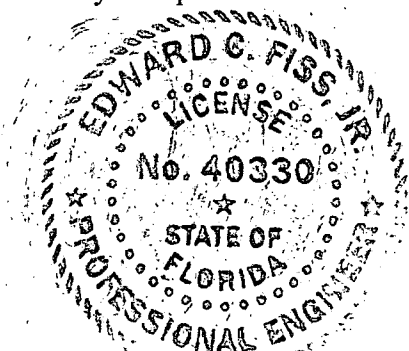

If the purpose of this application is to obtain an initial air operation permit or operation permit revision for one or more newly constructed or modified emissions units (check here [X], if so), I further certify that, with the exception of any changes detailed as part of this application, each such emissions unit has been constructed or modified in substantial accordance with the information given in the corresponding application for air construction permit and with all provisions contained in such permit.

Edward G. Fiss

Construction/Modification Information

1. Description of Proposed Project or Alterations:

Charlotte Pipe and Foundry Company – Plastics Division (CPFC) is requesting a non-Title V Air Operating Permit Modification for its PVC and CPVC pipe manufacturing facility. The Air Operating Permit Modification is being requested so the facility may increase its currently permitted VOC and Total HAPs emission limits from 5.0 tons in any consecutive 12-month period to 15 tons in any consecutive 12-month period. The facility also wishes to establish a permit limit of 9.9 tons in any consecutive 12-month period for individual HAPs. These modification activities are detailed in Construction Permit No. 1190030-010-AC.

2. Projected or Actual Date of Commencement of Construction: Currently Constructed

3. Projected Date of Completion of Construction: Currently Constructed

Application Comment

All facility equipment is currently constructed. This permit application is being submitted to increase currently permitted VOC and Total HAPs emission limits for the facility and establish an individual HAP emission limit for the facility as outlined in Construction Permit No. 1190030-010-AC, which was issued on July 6, 2006.

II. FACILITY INFORMATION

A. GENERAL FACILITY INFORMATION

Facility Location and Type

1. Facility UTM Coordinates: Zone: 17 East (km): 399.0 North (km): 3,197			
2. Facility Latitude/Longitude: Latitude (DD/MM/SS): 28/53/45 Longitude (DD/MM/SS): 82/02/00			
3. Governmental Facility Code: O	4. Facility Status Code: A	5. Facility Major Group SIC Code: 30	6. Facility SIC(s): 3084
7. Facility Comment (limit to 500 characters): This facility is located at County Road 124A Wildwood, Florida, 34785. This facility is a PVC/CPVC pipe extrusion facility.			

Facility Contact

1. Name and Title of Facility Contact: Reese Sumrall, Jr.		
2. Facility Contact Mailing Address: Organization/Firm: Charlotte Pipe and Foundry Company- Plastics Division Street Address: 4210 Old Charlotte Highway City: Monroe State: NC Zip Code: 28110		
3. Facility Contact Telephone Numbers: Telephone: (704) 291-3211 Fax: (704) 291-3204		

Facility Regulatory Classifications

Check all that apply:

1. <input type="checkbox"/> Small Business Stationary Source?	<input type="checkbox"/> Unknown
2. <input checked="" type="checkbox"/> Synthetic Non-Title V Source?	
3. <input checked="" type="checkbox"/> Synthetic Minor Source of Pollutants Other than HAPs?	
4. <input checked="" type="checkbox"/> Synthetic Minor Source of HAPs?	
5. <input type="checkbox"/> One or More Emissions Units Subject to NSPS?	
6. <input type="checkbox"/> One or More Emission Units Subject to NESHAP Recordkeeping or Reporting?	
7. Facility Regulatory Classifications Comment (limit to 200 characters): The facility is currently classified as a Synthetic Minor Non-Title V Source of volatile organic compounds (VOC) and hazardous air pollutants (HAPs) emissions, as defined by Rule 62-210.200, F.A.C. This application is being submitted so the facility may increase its currently permitted VOC and Total HAPs emission limits from 5.0 tons in any consecutive 12-month period to 15 tons in any consecutive 12-month period. The facility also wishes to establish a permit limit of 9.9 tons in any consecutive 12-month period for individual HAPs. Construction Permit No. 1190030-010-AC details this restriction.	

Rule Applicability Analysis

62-4.050	Procedures to obtain permits and other applications
62-296.100,200,300	Stationary Source Emissions Standards

B. FACILITY POLLUTANTS

List of Pollutants Emitted

1. Pollutant Emitted	2. Pollutant Classif.	3. Requested Emissions Cap		4. Basis for Emissions Cap	5. Pollutant Comment
		lb/hour	tons/year		
PM	B	17.2	4.5	Rule and Other	Requested hourly emission cap is based on Rule 62-296.320 and the pneumatic conveyor's max rate of 12.5 tons/hr (PVC raw material). The annual emissions will be below five (5) tons per year. The facility annual potential emissions is approximately 1.174 tons/yr
VOCs	SM	3.42	15.0	ESCTIII	The annual emission cap is being requested so the facility's annual VOC emissions will be below the Title V threshold value of 100 tons/yr.
INDIVIDUAL HAPS	B	2.26	9.9	OTHER	The annual emission cap is being requested in accordance with the facility's current construction permit (Permit No. 1190030-010-AC). With the removal of MEK from FDEP's HAP list on 4/1/06, it is not anticipated that the facility will exceed the Title V threshold value of 10 tons/yr for any individual HAP.

TOTAL HAPS	B	3.42	15.0	OTHER	The annual emission cap is being requested in accordance with the facility's current construction permit (Permit No. 1190030-010-AC). With the removal of MEK from FDEP's HAP list on 4/1/06, it is not anticipated that the facility will exceed the Title V threshold value of 25 tons/yr for total HAPs.

6. Supplemental Requirements Comment: Not applicable to this facility

III. EMISSIONS UNIT INFORMATION

A separate Emissions Unit Information Section (including subsections A through G as required) must be completed for each emissions unit addressed in this Application for Air Permit. If submitting the application form in hard copy, indicate, in the space provided at the top of each page, the number of this Emissions Unit Information Section and the total number of Emissions Unit Information Sections submitted as part of this application.

A. GENERAL EMISSIONS UNIT INFORMATION**Emissions Unit Description and Status**

1. Type of Emissions Unit Addressed in This Section: (Check one)		
<input type="checkbox"/> This Emissions Unit Information Section addresses, as a single emissions unit, a single process or production unit, or activity, which produces one or more air pollutants and which has at least one definable emission point (stack or vent).		
<input type="checkbox"/> This Emissions Unit Information Section addresses, as a single emissions unit, a group of process or production units and activities which has at least one definable emission point (stack or vent) but may also produce fugitive emissions.		
<input checked="" type="checkbox"/> This Emissions Unit Information Section addresses, as a single emissions unit, one or more process or production units and activities which produce fugitive emissions only.		
2. Description of Emissions Unit Addressed in This Section (limit to 60 characters):		
Ink Jet Printing		
3. Emissions Unit Identification Number:		<input type="checkbox"/> No ID <input type="checkbox"/> ID Unknown
ID: 009		
4. Emissions Unit Status	5. Initial Startup Date:	6. Emissions Unit Major Group SIC Code:
Code: A	10/99	30
7. Emissions Unit Comment: (Limit to 500 Characters)		
<p>The facility's ink jet printing process consists of printing bar codes and specification information on manufactured PVC and CPVC pipe. The facility's ink jet printing process utilizes twelve (12) Imaje-Model JAIME 100S8 and eleven (11) Video Jet-Model EXCEL 1701 ink jet printers. Air emissions from this emission unit include the Individual HAPs in the form of Methanol and Isophorone, as well as VOCs.</p>		

Emissions Unit Information Section 1 of 1**Emissions Unit Control Equipment**

INK JET PRINTING PROCESS EMISSION CALCULATIONS AND EMISSION
FACTOR SELECTION

ATTACHMENT A
INK JET PRINTING PROCESS
EMISSION CALCULATIONS AND EMISSION FACTOR SELECTION

Charlotte Pipe & Foundry Company
Wildwood, Florida

CPFC's ink jet printing process consists of printing bar codes and specification information on PVC and CPVC pipe. The products used in the ink jet printing process contain HAPs in the form of Methanol and Isophorone, as well as VOCs.

Table A-1 summarizes the potential HAP/VOC emissions from the ink jet printing process. In determining the potential emissions of Methanol, Isophorone, and VOCs from CPFC's ink jet printing process, estimated potential ink and additive purchases as well as the calculated product Methanol, Isophorone, and VOC contents were used. Taking a conservative approach, the maximum possible Methanol and Isophorone contents, taken from the product's MSDS chemical content range, were used to determine the worst case air emissions of the individual HAPs. The VOC content used is the actual content provided by the product's MSDS or vendor. Calculations determining the maximum HAPs and actual VOC contents of each product can be found in tables A-2 through A-7. A copy of each product's MSDS can be found in Attachment B of this application.

Potential ink and additive usages for the facility were determined using the 2005 annual ink and additive purchases from CPFC. A ratio was determined using CPFC's 2005 ink and additive purchases and its total 2005 production of PVC pipe (57,619,632 lbs. corresponding to 104,756,330 ft.) and CPVC pipe (3,698,854 lbs. corresponding to 34,899,250 ft.). The ratio was then used to determine CPFC's potential ink and additive usage based on its permitted production rate of 140,000,000 pounds per year (PVC=120,000,000 lbs. or approximately 218,167,995 ft. and CPVC=20,000,000 lbs. or approximately 188,703,042 ft.).

Ink and additive use is directly related to the total length of pipe produced. In 2005, the total length of PVC and CPVC pipe produced was 139,655,580 feet. Based on the ratio of weight of pipe produced to length of pipe produced in 2005, CPFC's permitted production rate of 140,000,000 pounds per year will likely yield approximately 406,871,037 feet of PVC and

CPVC pipe. Therefore, 2005 ink and additive usages were multiplied by 2.9134 (ratio of estimated total feet of pipe produced from permitted production rate to total feet of pipe produced in 2005) to estimate the facility's potential ink and additive purchases.

Depending on the diameter of the PVC and CPVC pipe produced by the facility, the ratio of weight of pipe produced to length of pipe produced may vary. This would directly affect the amount of ink and additive used in the facility's inkjet printing process since ink and additive use is directly related to the total length of pipe produced. For example, higher diameter pipes would result in higher weights and shorter lengths of pipe produced, thus requiring the facility to use less ink and additive for inkjet printing than lower diameter pipes that would result in lower weights and higher lengths of pipe produced. Emissions in this application were calculated based on typical weights and lengths of pipe produced by the facility in 2005 and may be an overestimate, depending on the diameters of pipe produced at the facility in any given year.

The above method was a reasonable method of determining the potential emissions from the facility's ink jet printing process; however, the above method did not calculate the potential emissions based on each printer running constantly at full capacity. The ink jet printers are not reasonably expected to run at full capacity so their potential emissions have been limited based on the permitted production throughput rate. CPFC has estimated that if the printers were to run at full capacity, they would use approximately 10 times the amount of ink and additive of the previously calculated limited potential emissions. This factor was then adjusted to 10.11 since the limited potential emissions were calculated based on the printers only running for 8,664 of the potential 8,760 hours per year. It is assumed that 100% of all the HAPs and VOCs contained in the products used in the ink jet printing process are emitted to the atmosphere.

Notes:

- Potential Product Usages were determined by using a calculated ratio of total feet of pipe produced per total amount of ink and additive used in 2005. The ratio was then used to determine CPFC's potential ink and additive usage based on its permitted production rate of 140,000,000 pounds per year or approximately 406,871,037 feet of pipe (PVC=120,000,000 lbs. corresponding to approximately 218,167,995 ft. and CPVC=20,000,000 lbs. corresponding to approximately 188,703,042 ft). With this explanation, the 2005 Product Usages were multiplied by 2.9134 to get Potential Product Usages. Ink and additive use is directly related to the total length of pipe produced.
- The maximum Methanol and Isophorone contents, taken from the product's MSDS chemical content range, were used to determine the air emissions of the individual HAPs from the inkjet printing process. The VOC contents are the actual values provided by the product's MSDS or vendor. In some cases the VOC content is less than the total maximum HAPs contents because the HAPs content ranges from the MSDS were used.
- Limited potential emissions were estimated by multiplying the facility's potential product usages by each pollutants maximum content in the inks and additives.
- Maximum emissions were estimated by multiplying the facility's limited potential emissions by 10.11. An explanation of how the multiplier value was determined can be found in the text portion of this attachment.

Example Calculations:

- Limited Potential VOC Emissions - Ink Jet T-17Q Red (lb/yr) = Product Usage (qt/yr) x Product Content (lb/qt)
 = 629.29 (qt/yr) x 1.3145 (lb/qt)
 = **827.21 lb/yr.**
- Maximum Potential VOC Emissions- Ink Jet T-17Q (lb/yr) = Limited Emissions (lb/yr) x (10.11)
 = 827.21 (lb/yr) x (10.11)
 = **8,363.07 lb/yr**

MATERIAL SAFETY DATA SHEET

Ink
17 RED

SECTION I - PREPARATION INFORMATION

This MSDS complies with 29 CFR 1910.1200, and was prepared by the Environmental, Health, and Safety Manager of InkJet, Inc. 11111 InkJet Way, Willis, TX 77378. Non-Emergency Phone (936) 856-6600.

Product Name 17 RED Ink
Product Code X(01,19,21,45)0111
Emergency Phone contact CHEMTREC at (800) 424-9300
Original document date: 01/98

Date of revisions: 10/02

SECTION II - IDENTIFICATION

Product Name 17 RED Ink
Product Use Ink Jet Printers
Description Dark liquid with solvent odor

HAZARDOUS MATERIAL IDENTIFICATION SYSTEM (HMIS)

HAZARD RATINGS: 0 Minimal 1 Slight 2 Moderate 3 Serious 4 Extreme R Hand & Eye Protection
HEALTH 1 FLAMMABILITY 3 REACTIVITY 0 PERSONAL PROTECTION B

NOTICE: These ratings are for general rapid interpretation. The end-user is responsible for determining the proper protective procedures.

SECTION III - HAZARDOUS INGREDIENTS

Ingredient	CAS#	%	TLV*	PEL*	LD ₅₀ ** g/kg	LC ₅₀ ** g/m ³
Methyl Ethyl Ketone	78-93-3	60-100	200	200	2.7	23.5 g/m ³ / 8hr
Ethanol	64-17-5	10-30	1000	1000	7.0	20,000ppm/10h
Isopropanol	67-63-0	1-5	400	400	5.04	12,000ppm/ 8hr
Methanol	67-56-1	1-5	200	200	5.6	64,000ppm/ 4hr

SECTION IV - PHYSICAL DATA

Boiling Range 30° C
Melting Range -80 to -85° C
Freezing Range -80 to -85° C
Vapor Pressure 70 mm of Hg @ 20° C
Vapor Density (Air=1) Greater than air
Solubility In Water Miscible
Solubility In Organic Solvents Miscible
Specific Gravity (Water = 1) 0.869
Percent Volatile By Volume (%) 72.8%
Evaporation Rate (N-Butyl Acetate=1) 3.8
pH in concentrate Not Applicable
pH in dilution as used Not Applicable
Appearance And Odor Dark liquid with solvent odor
Odor Threshold Not Available

Page 2 of 4

SECTION V - FIRE AND EXPLOSION HAZARD

Flash Point (Tcc)	-5° C
Auto Ignition Temperature	-500° C
Upper Flammable Limit (%By Vol.)	36.5
Lower Flammable Limit (%By Vol.)	2.1
Hazardous Combustion Products	Carbon Monoxide, Carbon Dioxide & Acid Smoke
Extinguishing Media	Regular foam or dry chemical
Explosion Data (Sensitive To Mechanical Impact)	No
Explosion Data (Sensitive To Static Discharge)	Yes

FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus with full facepiece operated in the positive pressure demand mode

SECTION VI - REACTIVE DATA

Condition Of Instability	None Known
Incompatibility	None Known
Conditions Of Reactivity	Not applicable
Hazardous Decomposition Products	Carbon Monoxide, Carbon Dioxide, & Acid Smoke

SECTION VII - TOXICOLOGICAL PROPERTIES (HEALTH HAZARD)

ROUTES OF ENTRY: Skin contact, skin absorption, ingestion, inhalation, and eyes

EFFECT OF ACUTE EXPOSURE:

Eyes	May cause extreme eye irritation. Symptoms may include burning, tearing, redness, swelling and eye damage.
Skin	Exposure may cause skin irritation. Prolonged or repeated exposure may dry the skin. Symptoms may include redness, burning, drying, cracking, and skin damage.
Breathing	Excessive inhalation of vapors can cause nasal and respiratory irritation. Central nervous system effects include dizziness, weakness, fatigue, nausea, headache, possible unconsciousness and even death. Inhalation of material into the lungs can cause chemical pneumonitis, which can be fatal.
Swallowing	Can cause gastrointestinal irritation, nausea, vomiting, diarrhea, blindness and death.

Exposure Limits	See section III
Sensitization To Product	Not Available
Carcinogenicity	Not Available
Reproductive Toxicity	Not Available
Teratogenicity	Not Available
Mutagenicity	Not Available
Toxicological Synergistic Products	None known

EFFECTS OF CHRONIC EXPOSURE:

Methyl Ethyl Ketone - Minor embryotoxic/teratotoxic effects have been observed in laboratory rats exposed to methyl ethyl ketone by inhalation at levels greater than 1000 ppm (5 times the OSHA-PEL/TWA) for most of the gestation period. Methyl ethyl ketone may potentiate (shorten the time of onset) peripheral neuropathy, but methyl ethyl ketone, by itself, has not been shown to cause peripheral neuropathy.

Ethanol - Nausea, vomiting, flushing, mental excitement or depression, drowsiness, impaired perception, uncoordination, stupor, coma and death may occur.

Methanol - Poisoning may occur from ingestion. Other symptoms of over-exposure may be headaches, acidosis, convulsions, mydriasis, circulatory collapse, respiratory failure and death.

Isopropanol - Ingestion or inhalation of large quantities of vapor may cause flushing, headache, dizziness, mental depression, nausea, vomiting, narcosis, anesthesia, coma and death.

Rev DD0001

Page 3 of 4

SECTION VIII - PREVENTATIVE MEASURES**PERSONAL PROTECTION:**

Respiratory protection

If workplace exposure limit(s) of product or any other component is exceeded, a NIOSH/OSHA approved respirator is advised. (See your safety equipment supplier for specific details.)

Ventilation

Provide sufficient mechanical (general and/or local exhaust) ventilation to maintain exposure below PEL/ TLV.

Protective gloves

Wear chemical resistant gloves. (Consult your safety equipment supplier.)

Eye protection

Wear chemical splash goggles in compliance with OSHA regulations. However, OSHA regulations also permit other types of safety glasses.

Other protective equipment

Wear impervious clothing and boots to prevent prolonged exposure.

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Keep away all sources of ignition from spill. If spill is indoors, ventilate areas of spill and soak up the spill with absorbent material. Do not let spilled or leaking material enter watercourse.

DISPOSAL METHOD: Absorb in vermiculite, floor absorbent or other absorbent material and dispose in licensed facility. Observe all federal, state and local regulations.

HANDLING AND STORAGE: Protect from freezing. Overheating may cause container to rupture. Covered storage is preferable.

SPECIAL SHIPPING INFORMATION: SEE SECTION X

SECTION IX - FIRST AID MEASURES

Oral Ingestion

Seek immediate medical attention.

Eye Contact

Flush with water for 15 minutes and seek medical attention.

Skin Contact

Wash with soap and water. Wash contaminated clothing before reuse.

Skin Absorption

If skin irritation persists, seek medical attention.

Inhalation

Remove to fresh air, give artificial respiration and seek medical attention.

Effects Of Overexposure

May cause headaches if inhaled. Seek medical attention. If swallowed, can cause drunken-type behavior followed by severe systemic illness.

IMAGE INK JET PRINTING CORPORATION
Material Safety Data Sheet

SH-5135E A DATED: 10/3/2002
page 1/6

The attention of the user is drawn to the risks brought upon by the misuse of the product. This data sheet does not exempt the user from knowing and applying the relevant regulations. It is responsibility of the user to take all precautions necessary to the use of the product. The information contained in this publication is given in good faith, and to the best of our knowledge at the time of edition.

1 - CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

1.1 PRODUCT IDENTIFICATION

Name : 5135E
Chemical family : Ketone-based ink
Synonyms : n/a

1.2 COMPANY IDENTIFICATION

IMAGE INK JET PRINTING CORPORATION
1650 Airport Road, Suite 101
Kennesaw, Georgia 30144

1-800-424-9300

2 - COMPOSITION / INFORMATION ON INGREDIENTS

Type of product: PREPARATION

INGREDIENTS CONTRIBUTING TO THE HAZARD	CAS N°	EEC N°	%	RISK	RISK SYMBOL(S)
Methyl ethyl ketone (#)	78-93-3	606-002-00-3	75-85	Highly flammable Irritating to eyes and respiratory system Repeated exposure may cause skin dryness or cracking Vapors may cause drowsiness and dizziness	R11 R36/37 R66 R67
Amine salt of 1:2 chromium monoazo complex			<10	Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment	R51/53
Cellulose nitrate	603-037-01-3		<10	Highly flammable	R11
Propan-2-ol	67-63-0	603-117-00-0	<3	Highly flammable Irritating to eyes Vapors may cause drowsiness and dizziness	R11 R36 R67

The ingredients not listed are not considered as dangerous substances according to amended directive 67/548/EEC; and to 29 CFR 1910-1200 (USA).

(#) This component is subject to the reporting requirements of Section 313 of SARA Title III and 40CFR 372

	reference :	5135E
	designation :	INK - BASE 1 - BLACK

S H - 5 1 3 5 E A

This document is Image's property and cannot be communicated without written authorization

3 - HAZARDS IDENTIFICATION

HEALTH HAZARDS

Irritating to eyes and respiratory system. Repeated exposure may cause skin dryness or cracking. Vapors may cause drowsiness and dizziness. Harmful to aquatic organisms. may cause long-term adverse effects in the aquatic environment

PHYSICAL AND CHEMICAL HAZARDS : FIRE AND EXPLOSION HAZARDS

Highly flammable. Leaks of gas or spills of liquid can readily form flammable mixtures at temperatures at or above flashpoint.

	HMIS*	NFPA*
Health	2	2
Flammability	3	3
Reactivity	0	0

4 - FIRST AID MEASURES

Inhalation

Using proper respiratory protection. Immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Have the person rest. Call for prompt medical attention

Skin contact

Rinse with large amounts of water. use soap if available. Remove grossly contaminated clothing, including shoes, and launder before reuse. Get medical attention if irritation persists.

Eye contact

Immediately flush out eyes with large amounts of water for at least 15 minutes. Use an eye flush. Get medical attention rapidly

Ingestion

If swallowed, do not induce vomiting. Have the person rest. Give activated medical carbon. Get medical attention rapidly

5 - FIRE-FIGHTING MEASURES

FIRE FIGHTING PROCEDURE

Use water spray to cool fire-exposed surfaces and to protect personnel. Stop leak if possible. If a leak or spill has not ignited, use water spray to disperse the vapors and to protect those attempting to stop a leak. Either allow fire to burn under controlled conditions or extinguish with foam or dry chemical. Try to cover liquid spills with foam. Do not use a water extinguisher when printers are on fire.

SPECIAL FIRE PRECAUTIONS

See also Section 4 "First aid measures" as well as Section 10 "Stability and Reactivity"

HAZARDOUS COMBUSTION PRODUCTS

No unusual products.

6 - ACCIDENTAL RELEASE MEASURES

LAND OR WATER SPILL

Eliminate sources of ignition. Warn occupants of room of fire and explosion hazard. Prevent liquid from entering sewers, waterways, or low areas. Shut off source if possible. Advise authorities if product has entered a watercourse or sewer or has contaminated soil or vegetation. Take measures to minimize the effect on ground water. Absorb and prevent spread of spilled liquid with sand, sawdust or earth by means of shovels and buckets, and transfer to secure containers to facilitate its disposal and recycling. Recovery by pumping with an explosion-proof or hand pump is also permissible

In the event of uncontrolled release of this material the user should determine if the release is reportable under applicable laws and regulations

Disposal of recovered material must be made according to local regulations.

S H - 5 1 3 5 E A

7 - HANDLING AND STORAGE

Storage temperature: $< 35^{\circ}\text{C}$ ($< 95^{\circ}\text{F}$)

Transport temperature: $< 35^{\circ}\text{C}$ ($< 95^{\circ}\text{F}$) Keep the product in its original polyethylene container

Storage/handling, general notes

Keep container closed. Handle containers with care. Open slowly in order to control possible pressure release. Handle and store in a cool, well-ventilated place away from incompatible materials, ignition and heat source. Protect material from direct sunlight. The floor of the shop must be incombustible and act as a retainer so that spilled liquid will not spread out. Do not pressurize, cut, heat or weld containers. Empty product containers may contain product residue. Do not reuse empty containers without commercial cleaning or reconditioning. Container remains hazardous when empty. Continue to observe all precautions.

8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING MEASURES

The use of mechanical dilution ventilation is recommended whenever this product is used in a confined space, is heated above ambient temperature or otherwise to maintain ambient concentration below the threshold limits. Use explosion-proof ventilation equipment.

WORKPLACE EXPOSURE LIMITS

	Limit value (8 hours)	Limit value (short-term)	
European Community:			
Methylethylketone	200ppm (600mg/m ³)	300ppm (900 mg/m ³)	
Propoan-2-ol		400ppm (980 mg/m ³)	
USA:	OSHA*	ACGIH*	ACGIH
	PEL-TWA*	TLV-TWA*	TLV-STEL*
Methylethylketone	200ppm (590mg/m ³)	200ppm (590mg/m ³)	300ppm (885 mg/m ³)
2-Propanol	400ppm (985 mg/m ³)	400ppm (985 mg/m ³)	500ppm (1230 mg/m ³)

PERSONAL PROTECTION

Handle in the presence of adequate ventilation.

Respiratory protection:

Where exposure is likely to exceed acceptable criteria use approved respiratory protection equipment.

Protective clothing:

Wear natural or butyl rubber gloves and protective clothing, which are impervious to the product for the duration of the anticipated exposure. Gloves should be replaced immediately if signs of degradation are observed.

Eye protection:

Wear safety glasses

9 - PHYSICAL AND CHEMICAL PROPERTIES

Physical state	liquid
Form/color	black liquid
Odor	characteristic, ketone
pH (at 20°C (68°F))	not applicable
Freezing/melting point	$< -85^{\circ}\text{C}$ (-121°F)
Boiling point	$> 75^{\circ}\text{C}$ (167°F)
Flashpoint (in a closed cup)	about -9°C (16°F)
Self-ignition temperature	$> 400^{\circ}\text{C}$ ($> 752^{\circ}\text{F}$)
Explosive limits (in air)	1.8 - 12.0 Vol. %
Vapor pressure (at 25 °C, 77 °F)	13.3 kPa (Methylethylketone)
Density (20 / 20)	$0.86 < 0.87$
Vapor density (/air)	> 1
Solubility in water (at 20 °C, 68 °F)	partial
Is material hygroscopic?	slightly
n-octanol / water partition coefficient (logP(o/w))	0.26 (Methylethylketone)

Note: The flashpoint of the product has not been determined. The flashpoint indicated is that of the solvent with the lowest one.

10 - STABILITY AND REACTIVITY

Stability	stable
Hazardous polymerization	no
Materials and conditions to avoid (incompatibility)	strong oxidizing agents
Hazardous decomposition products	none

11 - TOXICOLOGICAL INFORMATION

ACUTE

Inhalation:

Vapor concentrations above recommended exposure levels may be irritating to the eyes and the respiratory tract, may cause headaches and dizziness, could be anesthetic and may cause other effects on the central nervous system.

LC₅₀* (rat, 4 hours) > 9000ppm (Methylethylketone)

Skin contact:

Frequent or prolonged contact may defeat and dry the skin, leading to discomfort and dermatitis.

LD₅₀* (rabbit) = 13g/kg (Methylethylketone)

Eye contact:

Irritating. Will injure eye tissue if not removed promptly.

Ingestion:

Small amounts of liquid aspirated into the respiratory system during ingestion or vomiting may cause bronchopneumonia or pulmonary edema.

LD₅₀* (rat) = 3000mg/kg (Methylethylketone)

CHRONIC

There is no evidence that exposure to Methylethylketone alone causes progressive or irreversible neurotoxic effects. However, simultaneous over-exposure to Methylethylketone and to n-Hexane or 2-Hexanone or Toluene can increase the risk of neuropathy linked to them.

OTHERS

Pregnant women should avoid handling and exposure

No component of this product has been identified as a carcinogen by the International Agency for Research on Cancer (IARC).

12 - ECOLOGICAL INFORMATION

Methyl ethyl ketone

WGK*	1
Mobility:	This substance is relatively volatile.
Degradability:	Readily biodegradable
Ecotoxicity:	LC ₅₀ * (fish, 96 hours) = 4600mg/l EC ₅₀ * (daphnia, 48 hours) = 7060mg/l EC ₅₀ * (bacteria, 16 hours) = 1150mg/l

Amine salt of 1:2 chromium/monoazo complex

Degradability:	Not biodegradable
Ecotoxicity:	LC ₅₀ * (fish, 96 hours) = 2mg/l EC ₅₀ * (daphnia, 24 hours) = 1000mg/l

Propan-2-ol

WGK*

S H - 5 1 3 5 E A

13 - DISPOSAL CONSIDERATIONS

Empty containers should be taken for recycling, recovery or disposal through a suitably qualified or licensed contractor. This product is not suitable for disposal by either landfill or via municipal sewers, drains, natural streams or rivers. This product can be burned directly in the appropriate facility. Disposal of material must be made according to local regulations.

14 - TRANSPORT INFORMATION

IMAGE INK JET PRINTING CORPORATION
Material Safety Data Sheet

SH-5191 D DATED: 1/24/2003
page 1/5

The attention of the user is drawn to the risks brought upon by the misuse of the product. This data sheet does not exempt the user from knowing and applying the relevant regulations. It is responsibility of the user to take all precautions necessary to the use of the product. The information contained in this publication is given in good faith, and to the best of our knowledge at the time of edition.

1 - PRODUCT AND COMPANY IDENTIFICATION

1.1 PRODUCT IDENTIFICATION

Name : 5191
Chemical family : Ketone-based additive
Synonyms : n/a

1.2 COMPANY IDENTIFICATION

IMAGE INK JET PRINTING CORPORATION
1650 Airport Road, Suite 103
Kennesaw, Georgia 30144
Tel : (770) 421 7700
Fax : (770) 421 7702

(if other than the company)

1.3 EMERGENCY PHONE NUMBER

1-800-424-9300

2 - COMPOSITION / INFORMATION ON INGREDIENTS

Type of product: PREPARATION

<u>INGREDIENTS CONTRIBUTING TO THE HAZARD</u>	<u>CAS N°</u>	<u>EEC N°</u>	<u>%</u>	<u>RISK</u>	<u>RISK SYMBOL(S)</u>
Methylethylketone	78-93-3	606-002-00-3	>90	Highly flammable Irritating to eyes Repeated exposure may cause skin dryness or cracking Vapors may cause drowsiness and dizziness	R11 R36 R66 R67

The ingredients not listed are not considered as dangerous substances according to directive 67/548/EEC, point 4, and to 29 CFR 1910-1200 (USA).

3 - HAZARDS IDENTIFICATION

ADVERSE HUMAN HEALTH AND ENVIRONMENTAL EFFECTS

Irritating to eyes. Repeated exposure may cause skin dryness or cracking. Vapors may cause drowsiness and dizziness.

PHYSICAL AND CHEMICAL HAZARDS

Highly flammable. Leaks of gas or spills of liquid can readily form flammable mixtures at temperatures at or above flashpoint.

Material Safety Data Sheet

page 2/5

4 - FIRST AID MEASURES

Inhalation: Using proper respiratory protection, immediately remove the affected victim from exposure. Administer artificial respiration if breathing is stopped. Have the person rest. Call for prompt medical attention.

Skin contact: Rinse with large amounts of water, use soap if available. Remove grossly contaminated clothing, including shoes, and launder before reuse. Get medical attention if irritation persists.

Eye contact: Immediately flush out eyes with large amounts of water for at least 15 minutes. Get medical attention rapidly.

Ingestion: If swallowed, do not induce vomiting. Have the person rest. Get medical attention rapidly.

5 - FIRE-FIGHTING MEASURES

Use water spray to cool fire-exposed surfaces and to protect personnel. Stop leak if possible. If a leak or spill has not ignited, use water spray to disperse the vapors and to protect those attempting to stop a leak. Either allow fire to burn under controlled conditions or extinguish with foam or dry chemical. Try to cover liquid spills with foam.

Do not use a water extinguisher when printers are on fire.

6 - ACCIDENTAL RELEASE MEASURES

Eliminate sources of ignition. Warn occupants of downwind areas of fire and explosion hazard. Prevent liquid from entering sewers, waterways, or low areas. Keep public away. Shut off source if possible to do so without hazard. Advise authorities if product has entered a waterway or sewer or has contaminated soil or vegetation. Take measures to minimize the effect on ground water. Contain spilled liquid with sand or earth. Dilute contained spill with water. Recover by pumping (use an explosion-proof or hand pump) or with a suitable absorbent. If liquid is too viscous for pumping, scrape up with shovels and buckets, and transfer to secure containers to facilitate its disposal and recycling. In the event of uncontrolled release of this material the user should determine if the release is reportable under applicable laws and regulations.

Disposal of recovered material must be made according to local regulations.

7 - HANDLING AND STORAGE

HANDLING

Handle containers with care. Open slowly in order to control possible pressure release. Do not handle or open near an open flame, source of heat or sources of ignition. Do not pressurize, cut heat or weld containers. Empty product containers may contain product residue. Do not reuse empty containers without commercial cleaning or reconditioning. Container remains hazardous when empty. Continue to observe all precautions.

STORAGE

Keep container closed. Store in a cool, well-ventilated place away from incompatible materials. Do not store near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. The floor of the premises must be incombustible, impermeable and act like a reservoir so that in case of breaking liquid will not spill outside. Keep product in its original packaging. Store below 35°C (95°F).

8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING MEASURES

The use of mechanical dilution ventilation is recommended whenever this product is used in a confined space, is heated above the ambient temperature or otherwise to maintain ambient concentration below the recommended threshold exposure limits. Use explosion-proof ventilation equipment.

WORKPLACE EXPOSURE LIMITS

European Community:

Methylethylketone

USA:

Limit Value (8 hours)

200ppm (600mg/m³)

OSHA*

PEL-TWA*

Limit Value (short-term)

300ppm (900mg/m³)

TLV-STEL*

Methylethylketone

200ppm (590mg/m³)

200ppm (590mg/m³)

300ppm (885mg/m³)

PERSONAL PROTECTION

Handle in the presence of adequate ventilation

Respiratory protection :

Where concentrations in air may exceed the limits given in this section, using a half-face filter mask is recommended to protect from overexposure by inhalation.

Protective clothing :

When handling this product, wearing is chemical resistant (butyl rubber) gloves is recommended. Gloves should be replaced immediately if signs of degradation are observed.

Eye protection :

When handling this product, wearing splash-resistant goggles is recommended. An eye wash should be available.

page 3/5

9 - PHYSICAL AND CHEMICAL PROPERTIES

Physical state and color	pink liquid
Odor	ketone
pH (at 20°C (68°F))	not applicable
Melting point	< -85 °C (-121°F)
Boiling point	> 75°C (167°F)
Flashpoint (in a closed cup)	about -9°C (16 °F)
Self-ignition temperature	> 500 °C (932 °F)
Explosive limits (volume % in air)	1.8 - 11.5
Vapor pressure (at 25 °C , 77 °F)	13.3 kPa at 25°C (77°F) (Methylethylketone)
Vapor density (/ air)	> 1
Density (at 20°C (68°F))	0.80 - 0.81
Water solubility	partial
n-octanol / water partition coefficient (log P(o/w))	0.26 (Methylethylketone)
Note: The flashpoint of the preparation has not been determined. The flashpoint indicated is the one of the solvent with the lowest value	

10 - STABILITY AND REACTIVITY

Stability	stable
Hazardous polymerization	no
Materials and conditions to avoid (incompatibility)	strong oxidizing agents
Hazards decomposition products	none

11 - TOXICOLOGICAL INFORMATION

ACUTE

Inhalation :

Vapor concentrations above recommended exposure levels may be irritating to the eyes and the respiratory tract. may cause headaches and dizziness. could be anesthetic and may have other central nervous system effects.

LC₅₀(rat, 4 hours) > 9000ppm (Methylethylketone)

Skin contact:

Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis

LD₅₀(rabbit) = 1.3g/kg (Methylethylketone)

Eye contact:

Irritating and will injure eye tissue if not removed promptly

Ingestion :

Small amounts of liquid aspirated into the respiratory system during ingestion or vomiting may cause bronchopneumonia or pulmonary edema.

LD₅₀(rat) = 3000mg/kg (Methylethylketone)

CHRONIC

There is no evidence that exposure to Methylethylketone alone causes progressive or irreversible neurotoxic effects. However, simultaneous over-exposure to Methylethylketone and to n-Hexane can potentiate the known irreversible effects of n-hexane.

OTHERS

Avoid exposure for pregnant women.

12 - ECOLOGICAL INFORMATION

Methylethylketone

WGK:	1
Mobility:	This substance is relatively volatile.
Degradability:	Readily biodegradable
Ecotoxicity:	LC ₅₀ (fishes, 96 hours) = 4600mg/l EC ₅₀ (daphnia, 48 hours) = 7060mg/l EC ₅₀ (bacteria, 16 hours) = 1150mg/l

MSDS #6

MATERIAL SAFETY DATA SHEET

MSDS ID#: 100005

Date Prepared: October 19, 1995

Revision: February 10, 2003

1. PRODUCT AND COMPANY IDENTIFICATION

Product Name: M-149 OFFSET INK Product Code: 10006
Colors Covered: Black; Blue; Green; White; UV Readable; Standard Grey; NL Red; NL Yellow; NL Orange; NL Brown; FR Black; Silver; Purple; Process Blue; Spectra Blue; NL Red/Orange; Deep Red; Copper; Black Low Odor; SP Orange; PMS 9U/10U Grey; SP Green
Supplier Name: Matthews International Corporation Address: 101 Fairview Avenue
City: Pittsburgh State/Zip: Pennsylvania, USA, 15238
Phone: (412)865-2500 Fax: (412)828-4545 24 Hour Emergency Phone: (412)456-7499

2. COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous Components	[] Substance		[X] Mixture		R-Phrase	S-Phrases
	Percent	CAS No.	TLV	Carcinogen		
Cyclohexanone	11-17	108-94-1	25 ppm	No	R10, R20	S25
Isophorone	35-57	78-59-1	5 ppm	No	R21/22, R36/37, R40	S13, S23, S36/37/39, S46

3. HAZARDS IDENTIFICATION

Most Important Hazards: Severe eye irritant. Flammable liquid.

Main Symptoms of Overexposure: EYES- Causes severe irritation, experienced as discomfort or pain, excess blinking, marked redness and swelling of the conjunctiva, may cause chemical burns on the cornea; SKIN- Moderate skin irritation. Prolonged contact may cause chemical burns, seen as marked redness or swelling; INHALATION- May cause irritation of the respiratory tract, experienced as nasal discomfort and discharge, with chest pain, coughing, headache, nausea, vomiting, dizziness, drowsiness, disturbed vision and unconsciousness. Repeated or prolonged exposures to high concentrations may cause kidney and liver damage. INGESTION- May cause nausea, vomiting, burning sensation in mouth and throat, and abdominal discomfort.

4. FIRST AID MEASURES

Inhalation: Move to fresh air. Aid in breathing, if necessary, and get immediate medical attention.

Skin Contact: Remove contaminated clothing. Wash skin with soap and water. Get medical attention if irritation persists. Wash clothing before reuse.

Eye Contact: Immediately flush eyes with water for at least 15 minutes raising upper and lower eyelids occasionally. Get immediate medical attention.

Ingestion: DO NOT induce vomiting. Keep person warm and quiet and get medical attention. Aspiration of the material into the lungs due to vomiting can cause chemical pneumonitis which can be fatal.

5. FIRE-FIGHTING MEASURES

Extinguishing media: Water spray, dry chemical, carbon dioxide, and alcohol foam.

Specific Hazards: Flammable liquid. Do not pressurize, cut, weld or expose containers to flame or other sources of ignition. Vapors are heavier than air and may travel along the ground or be moved by ventilation and be ignited by heat, pilot lights or other flames.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: Eliminate all ignition sources.

Environmental precautions: Prevent runoff from entering drains, sewers or streams. May be toxic to fish.

Methods of cleaning up: Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Small spills should be flushed with large amounts of water. Larger spills should be collected for disposal.

7. HANDLING AND STORAGE

Handling-Precautions: May cause eye burns. Harmful if absorbed through the skin. Wash thoroughly after handling.

Safe handling Advice: Keep away from heat, sparks and flames.

Storage-Conditions: Avoid excessive heat and sources of ignition. Store in a cool, clean, well ventilated non-smoking area in a sealed grounded container.

Incompatible Products: Keep from contact with strong oxidizing agents.

MSDS ID#: 100005

Date Prepared: October 19, 1995

Revision: February 10, 2003

Product Name: M-149 OFFSET INK

Product Code: 10006

8. EXPOSURE CONTROL/PERSONAL PROTECTION

Engineering Measures: Good general ventilation should be used. Use local exhaust ventilation or other engineering controls to maintain airborne levels below recommended exposure limits.

Personal Protective Equipment: Eliminate all ignition sources.

Respiratory Protection: If engineering controls do not maintain concentrations below recommended exposure limits, an approved respirator should be used. Type: organic vapor.

Hand Protection: Where prolonged or repeated skin contact will occur, impervious gloves should be worn. Type: butyl

Eye Protection: Wear safety glasses with side shield or goggles.

Skin and Body Protection: Recommended Decontamination facilities: eye bath, safety shower, washing facilities.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical State: Liquid

Color: Various

Odor: Characteristic ketone odor

Flashpoint: 43-50° C (110-122° F)

Autoignition temperature: N/A

pH: N/A

Density: 1.00-1.22

Vapor Pressure: N/A

Vapor Density: >3.0

Solubility in Water: negligible

Boiling Point: 157° C (314° F) (for Cyclohexanone)

Freezing Point: N/A

V.O.C.: 642-734

Evaporation rate (Butyl Acetate=1): .38 (for Cyclohexanone)

10. STABILITY AND REACTIVITY

Stable: Yes **Conditions to avoid:** Avoid heat, sparks and open flames.

Materials to avoid: Avoid strong oxidizing agents.

Hazardous decomposition products: Carbon dioxide, carbon monoxide

11. TOXICOLOGICAL INFORMATION

Acute toxicity: Oral LD50 (rat, for Cyclohexanone)- 1.9 g/kg Dermal LD50 (rat, for Cyclohexanone)- 3.2 g/kg

Chronic Toxicity: Isophorone, when administered by stomach tube in corn oil at dosage levels of 250 or 500 mg/kg, of body weight, was associated with a slightly increased incidence of renal and preputial tumors in male rats and of liver tumors in male mice but did not exhibit similar potential in either female rats or mice. Guinea pigs exposed to 4000 ppm of Cyclohexanone for a 6 hr period showed signs of CNS depression, lacrimation, salivation, depression of body temperature and respiratory heart rate and opacity of the cornea. Liver and kidney damage reported in monkeys and rabbits (190 ppm) and rats (105.2 mg/m³) due to Cyclohexanone.

Target Organs: Eyes, skin, respiratory system, central nervous system, liver, kidneys

Sensitization: No **Specific Effects:** May aggravate an existing condition of dermatitis.

12. ECOLOGICAL INFORMATION

Possible Environmental Effects: This product may be toxic to fish. Avoid discharge to natural waters. Do not discharge into sewers or drains without the proper authority.

13. DISPOSAL CONSIDERATIONS

Waste Disposal: Dispose of in accordance with all local, state and federal regulations.

14. TRANSPORT INFORMATION

Land: (DOT)- regulated, Flammable liquid, Class 3, packaging group III, Proper Shipping Name: Printing Ink, UN 1210

Inland Waterways: (ADR)- N/A

Sea: (IMDG)- regulated, Flammable liquid, Class 3.3, packaging group III, Proper Shipping Name: Printing Ink, UN 1210

Air: (IATA)- regulated, Flammable liquid, Class 3, packaging group III, Proper Shipping Name: Printing Ink, UN 1210

15. REGULATORY INFORMATION

Hazard and Safety Information: CA Prop 65- none; PA hazardous substance list- Cyclohexanone, listed; SARA 313- none; SARA 311,312- Immediate health hazard, Delayed health hazard, Fire hazard (from Cyclohexanone and Isophorone); TSCA- all components listed; EINECS- Cyclohexanone: #203-631-1, Isophorone: #201-120-0; Cyclohexanone: R10- Flammable, R20- Harmful by inhalation, S23- Avoid contact with eyes; Isophorone: R21/22- Harmful in contact with skin and if swallowed, R36/37- Irritating to eyes and respiratory system, R40- Limited evidence of a carcinogenic effect, S13- Keep away from food, drink and animal feedingstuffs, S23- Do not breathe vapor, S36/37-38- Wear suitable protective clothing, gloves and eye/face protection, S46- If swallowed, seek medical advice immediately and show container/label

Ozone Depleting Chemicals Present: None

16. OTHER INFORMATION

Containers of this material may be hazardous when emptied; all hazard precautions given in the data sheet must be observed. The information contained herein is based upon what we believe to be reliable data. However, we make no warranty or guarantees, expressed or implied, concerning the accuracy of such information and disclaim all liability from reliance thereon. You should evaluate the information through your own sources prior to use.

ATTACHMENT C
VISIBLE EMISSIONS TEST REPORTS

Air Observations, Inc.

September 21, 2006

Mr. James Neubauer
Aware Environmental
9305-J Monroe Road
Charlotte, NC 28270

RE: Charlotte Pipe & Foundry Company

Dear James,

Enclosed please find one (1) copy of the completed visible emission compliance tests that were recently performed on the seven (7) storage silos at the above facility. The required copies of these tests have been previously submitted to the regulatory agency(s) as per our new procedure. Copies have also been sent to James Young at the facility.

If you have any questions or if I may be of further service at this time, please feel free to give me a call.

Thank you for allowing Air Observations, Inc. to perform your testing.

Sincerely,

Pamela LeBoss

Air Observations, Inc.

September 21, 2006

Mr. James Young
Charlotte Pipe & Foundry Company
P.O. Box 220
Wildwood, Florida 34785

Dear Zip,

Enclosed please find your copies of the completed visible emission compliance tests that were recently performed on the seven (7) storage silos at your facility. The required copies of these tests have been previously submitted to the regulatory agency(s) as per our new procedure. Copies have also been sent to James Neubauer at Aware Environmental.

Also enclosed is your Invoice.

If you have any questions or if I may be of further service at this time, please feel free to give me a call.

Thank you for allowing Air Observations, Inc. to perform your testing.

Sincerely,

Pamela LeBoss

RE: Federally Enforceable State Operation Permit Modification
 Charlotte Pipe and Foundry Company, Wildwood, Florida
 Facility ID: 1190030
 FDEP Project No.: 1190030-011-AF
 AEI Job No.: N188-83

Dear Mr. McDonald:

Per your conversation with Nick Peth, Charlotte Pipe and Foundry Company, Plastics Division (CPFC) is submitting the following list of updated throughput capacities for the silos located at the CPFC Wildwood, Florida facility. Based on equipment capabilities, the facility is currently permitted to have a maximum material production rate of 12.5 tons per hour for PVC or CPVC. At this time the facility is not capable of reaching the permitted maximum material production rate and is requesting that the following throughput limits be established for the facility's silos through a Federally Enforceable State Operation (FESOP) modification:

Emission Unit ID #	Emission Source ID #	Emission Source Description	Emission Point ID #	Requested Throughput Limit
002	ES-02	PVC Storage Silo 2	EP-02	16,000 lbs/hr
002	ES-03	PVC Storage Silo 3	EP-03	13,000 lbs/hr
002	ES-04	PVC Storage Silo 4	EP-04	15,000 lbs/hr
002	ES-05	PVC Storage Silo 5	EP-05	15,000 lbs/hr
002	ES-06	PVC Storage Silo 6	EP-06	13,000 lbs/hr
002	ES-07	PVC Resin Storage Silo 7	EP-07	15,000 lbs/hr
007	ES-36	CPVC Compound Storage Silo 1	EP-24	3,500 lbs/hr

CPFC greatly appreciates your time reviewing this matter. Should you have any questions or require any additional information, please contact me at (704) 291-3211 or Mr. James Neubauer of Aware Environmental ® Inc. at (704) 815-1686.

Sincerely,
