MEMORANDUM

TO: Jason Waters
Air Permitting Supervisor

DATE: 09/23/2004

FROM: Jose Zornita
Permit Engineer

Company: Charlotte Pipe and Foundry
Facility I.D. No.: 1190030/Project No.: 006
County: Sumter
Project: Construction of a Waste CPVC Scrap Grinder

Based on my review of the above subject air construction application and the site inspection conducted on 09/22/2004, I conclude that the above project is exempt from air permitting based on the information below:

- The CPVC scrap grinder will be located inside the main production facility (enclosed building). Any emissions (PM) that are generated are controlled by polyester filter screen that vents inside the building. Emissions from the grinder are not released into the atmosphere, but contained within the building.

I recommend that the \$250.00 air construction application fee be refunded to the facility.
