[Rule 62-210.200, F.A.C., Definitions-(PTE); requested by permittee in application dated June, 2002]

4. **Emission Limitations.** The facility is subject to the following emission limitations:

5. **Reasonable Precautions.** All reasonable precautions shall be taken to prevent and control generation of unconfined emissions of particulate matter in accordance with the provisions in Rule 62-296.320, F.A.C. These provisions are applicable to any source, including but not limited to, vehicular movement, transportation of materials, construction, alteration, demolition or wrecking, or industrial related activities such as loading, unloading, storing and handling. At a minimum, the following precautions shall be taken by the permittee:

- A. Keep covers on openings in process equipment during operation.

The following procedures shall be utilized to minimize pollutant emissions:

- A. Maintain tightly fitting cover, lids, etc, on all containers of VOC/OS when they are not being handled, tapped, etc.
- B. Prevent excessive air turbulence across exposed VOC/OS's.
- C. Where possible and practical, procure/fabricate a tightly fitting cover for any open trough, basin, bath, etc. of VOC/OS so that it can be covered when not in use.
- D. All fittings, valve lines, etc. shall be properly maintained.

Exceedance of the 5% limit shall not be considered a violation in and of itself, but an indication that additional control precautions and/or practices may be necessary.
