**FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION**  
Draft Air Permit No. 1210465-015-AC  
Suwannee American Cement - Branford Cement Plant  
Temporary Hydrated Lime Testing  
Suwannee County, Florida

Applicant: The applicant for this project is Suwannee American Cement, LLC. The applicant's authorized representative and mailing address is: Tom Messer, Plant Manager, Branford Cement Plant, 5117 US Highway 27, Branford, FL, 32008.  
Facility Location: Suwannee American Cement, LLC operates the existing Branford Cement Plant, which is located at 5117 US Highway 27 in Suwannee County, Florida.  
Project: The applicant proposes a temporary evaluation period to process raw materials (i.e., limestone, etc.) mined on site with potentially higher sulfur contents; allow stabilization of the sulfur-alkali balance in the

kiln system with these materials; evaluate full uncontrolled SO2 emissions; test other sources of alkali (i.e., feldspar) that could be used to bind sulfur to the cement clinker product to reduce SO2 emissions; monitor and record changes in the uncontrolled SO2 emissions; and test the reduction capabilities of the installed hydrated lime system. During the 60-day evaluation test period, the applicant requests that the permitted sulfur dioxide (SO2) emission rate of 0.20 lb/ton of clinker be temporarily revised to a 30-day rolling average. This will provide the flexibility necessary to determine uncontrolled emission levels, test the effects of feldspar and other alkalis to reduce SO2 emissions, evaluate the effectiveness of the existing hydrated lime injection system, and observe any operational difficulties. Continuous emissions monitoring data will be used to ensure compliance. The project will not result in significant increases of SO2 emissions. The applicant also proposes to install a new limestone bin to feed the finish mill. The limestone would displace gypsum, which is typically used in the finish mill. Fugitive emissions from the transport of limestone would be offset by an equivalent amount from the transport of gypsum resulting in no expected emissions increases of particulate matter. The project is not subject to preconstruction review for the Prevention of Significant Deterioration, Rule 62-212.400, F.A.C.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.) and Chapters 62-4, 62-210, and 62-212 of the Florida Administrative Code (F.A.C.). The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Bureau of Air Regulation is the Permitting Authority responsible for making a permit determination for this project. The Permitting Authority's physical address is: 111 South Magnolia Drive, Suite #4, Tallahassee, Florida. The Permitting Authority's mailing address is: 2600 Blair Stone Road, MS #5505, Tallahassee, Florida 32399-2400. The Permitting Authority's telephone number is 850/488-0114.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m., Monday through Friday (except legal holidays), at address indicated above for the Permitting Authority. The complete project file includes the Draft Permit, the Technical Evaluation and Preliminary Determination, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.111, F.S. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address or phone number listed above.

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue an air permit to the applicant for the project described above. The applicant has provided reasonable assurance that operation of proposed equipment will not adversely impact air quality and that the project will comply with all appropriate provisions of Chapters 62-4, 62-204, 62-210, 62-212, 62-296, and 62-297, F.A.C. The Permitting Authority will issue a Final Permit in accordance with the conditions of the proposed Draft Permit unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, F.S. or unless public comment received in accordance with this notice results in a different decision or a significant change of terms or conditions.

Comments: The Permitting Authority will accept written comments concerning the proposed Draft Permit for a period of fourteen (14) days from the date of publication of this Public Notice. Written comments must be provided to the Permitting Authority at the above address. Any written comments filed will be made available for public inspection. If a written comment received result in a significant change to the Draft Permit, the Permitting Authority shall revise the Draft Permit and require, if applicable, another Public Notice.

Public Notice: A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with

Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed with (received by) the Department's Agency Clerk in the Office of General Counsel of the Department of Environmental Protection at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S. must be filed within fourteen (14) days of publication of this Public Notice or receipt of a written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Permitting Authority for notice of agency action may file a petition within fourteen (14) days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Permitting Authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address and telephone number of the petitioner; the name address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial rights will be affected by the agency determination; (c) A statement of how and when the petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so state. (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action. A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C. Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Permitting Authority's final action may be different from the position taken by it in this Public Notice or Intent to Issue Air Permit. Persons whose substantial interests will be affected by such final decision of the Permitting Authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. Mediation is not available for this proceeding. 04/21
