**Re: Facility ID No. 1210465 Permit No 1210465-023-AC
Calciner Burner Pneumatic Feeding System AF Assessment Notification**

Dear Mr. Arif:

Per Specific Condition 24 of Permit No. 1210465-023-AC, SAC is required to notify the Florida DEP Compliance Authority 5 days prior to commencing with an "AF assessment". SAC will be moving from its "Shakedown" period to an "AF Assessment" period of testing for the Calciner Burner Pneumatic Feeding System. SAC will be testing an engineered plastic fuel material during this AF Assessment. This AF Assessment period will begin on December 4th, 2012 and will last for 60 operating days as defined by Permit No. 1210465-023-AC. The AF Assessment days will not be consecutive; allowing for any necessary adjustments, modifications, and maintenance of the feeding system. Also due to existing market conditions it is not anticipated that the kiln will operate for 60 consecutive days, and therefore the "AF Assessment" period will also be subject to the production schedule. SAC, as required by permit, will keep records of all fuel firing rates and emissions data and will make them available to the Department in AF Assessment report due 45 days after completion of the AF Assessment.

Please let me know if I can be of any further assistance. If you have any questions or comments you can contact me as follows:
