**Subject:** meeting follow up

Good Morning Christy,

I just want to follow up on the meeting at SAC on Friday with information I promised to get to you.

Attached is the PSD 2 year baseline.

Also, I attached is the same information that we had printouts at the meeting of the revised PSD evaluation from the initial application.

The other items:

Krishna is gathering the information on the sampling method name (e.g., ASTM sampling method).

And I am reviewing the highest ash and chlorine content materials.

We should have those for you later today.

Max
