PUBLIC NOTICE OF INTENT
TO ISSUE AIR PERMIT

Florida Department of Environmental
Protection Division of Air Resource
Management, Office of Permitting and
Compliance Draft Air Permit No.
1210465-034-AC
Suwannee American Cement, LLC
Branford Cement Plant
Suwannee County, Florida

Applicant: The applicant for this project
is Suwannee American Cement, LLC.
The applicant's authorized representative
and mailing address is: Mr. Tom Messer,
Plant Manager, Suwannee American Ce-
ment, LLC, Post Office Box 410, Bran-
ford, Florida 32008.

Facility Location Suwannee American
Cement, LLC operates the Branford Ce-
ment Plant, which is located in Suwan-
nee County at 5117 US Highway 27 in
Branford, Florida.

Project: The applicant applied on Janu-
ary 9, 2015 to the Department for an air
construction permit. The applicant pro-
poses changes to the sulfur dioxide (SO2)
emission standard applicable to Emission
Unit 004 - In-Line Kiln/Raw Mill. The ap-
plicant requests a lower SO2 emission
limit (from 0.20 to 0.183 pounds per ton of
clinker produced) and a longer averaging
period from (3 hours to 24 hours, rolling),
measured by a continuous emission moni-
toring system (CEMS). Details of the
project are provided in the application and
the enclosed Technical Evaluation and
Preliminary Determination.

SO2 emissions from the kiln are well-con-
trolled by judicious choices of raw materi-
als; scrubbing by finely divided lime in the
calciner; scrubbing by the moist lime-
stone in the raw mill; and injection of hy-
drated lime into the exhaust gases. Ulti-
mately, virtually all sulfur contained in the
fuel and raw materials is incorporated in-
to the clinker product.

On September 9, 2015 the kiln will be
subject to a new hydrogen chloride (HCl)
emission standard pursuant to Maximum
Achievable Control Technology (MACT)
at 40 Code of Federal Regulations, Part
63, Subpart LLL - National Emission
Standard for Hazardous Air Pollutants -
Portland Cement Plants. The require-
ment to control HCl stack concentration to
3 parts per million by volume will tend to
further suppress SO2 emissions.

The Department does not expect a signifi-
cant increase in SO2 emissions as a
result of the revised limit and averaging
time. A review pursuant to the rules for
Prevention of Significant Deterioration
(PSD) at Section 62-212.400, Florida Ad-
ministrative Code (F.A.C.) and a Best
Available Control Technology (BACT)
were not required.

Permitting Authority: Applications for air
construction permits are subject to re-
view in accordance with the provisions of
Chapter 403, Florida Statutes (F.S.) and
Chapters 62-4, 62-210 and 62-212,
F.A.C. The proposed project is not ex-
empt from air permitting requirements and
an air permit is required to perform the
proposed work. The Division of Air Re-
source Management's (DARM) Office of
Permitting and Compliance is the Per-
mitting Authority responsible for making a
permit determination for this project. The
Permitting Authority's physical address is:
2600 Blair Stone Road, Tallahassee, Flor-
ida 32309-2400. The Permitting Authority's mailing ad-
dress is: 2600 Blair Stone Road, MS
#5505, Tallahassee, Florida 32399-2400.
The Permitting Authority's telephone
number is 850/717-9000.

Project File: A complete project file is
available for public inspection during the
normal business hours of 8:00 a.m. to
5:00 p.m., Monday through Friday (ex-
cept legal holidays), at address indicated
above for the Permitting Authority. The
complete project file includes the Draft
Permit, the Technical Evaluation and Pre-
liminary Determination, the application,
and the information submitted by the ap-
plicant, exclusive of confidential records
under Section 403.111, F.S. Interested
persons may contact the Permitting Au-
thority's project review engineer for addi-
tional information at the address and
phone number listed above. In addition,
electronic copies of these documents are
available on the following web site by en-
tering draft permit number:
<http://www.dep.state.fl.us/air/emission/apds/default.asp>.

Notice of Intent to Issue Air Permit:
The Permitting Authority gives notice of
its intent to issue an air permit to the
applicant for the project described above.
The applicant has provided reasonable
assurance that operation of the proposed
equipment will not adversely impact air
quality and that the project will comply
with all applicable provisions of Chapters
62-4, 62-204, 62-210, 62-212, 62-296 and
62-297, F.A.C. The Permitting Authority
will issue a Final Permit in accordance
with the conditions of the proposed Draft
Permit unless a timely petition for an ad-
ministrative hearing is filed under Sec-
tions 120.569 and 120.57, F.S. or unless
public comment received in accordance
with this notice results in a different de-
cision or a significant change of terms or
conditions.

Comments: The Permitting Authority will
accept written comments concerning the
proposed Draft Permit and requests for a
public meeting for a period of 30 days
from the date of publication of the Public
Notice. Written comments must be re-
ceived by the Permitting Authority by
close of business (5:00 p.m.) on or be-
fore the end of this 30-day period. In ad-
dition, if a public meeting is requested with-
in the 30-day comment period and con-
ducted by the Permitting Authority, any
oral and written comments received dur-
ing the public meeting will also be con-
sidered by the Permitting Authority. If
timely received comments result in a sig-
nificant change to the Draft Permit, the
Permitting Authority shall revise the Draft
Permit and require, if applicable, another
Public Notice. All comments filed will be
made available for public inspection.

(over ->)

Petitions: A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57, F.S. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of the Public Notice or receipt of a written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Permitting Authority for notice of agency action may file a petition within 14 days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. A petition for administrative hearing must contain the information set forth below and must be filed (received) with the Agency Clerk in the Office of General Counsel, 3900 Commonwealth Boulevard, MS 35, Tallahassee, Florida 32399-3000, AgencyClerk@dep.state.fl.us, before the deadline. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Permitting Authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, any email address, telephone number and any facsimile number of the petitioner; the name, address any email address, telephone number, and any facsimile number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of when and how each petitioner received notice of the agency action or proposed decision; (d) A statement of all disputed issues of material fact. If there are none, the petition must so state; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action including an explanation of how the alleged facts relate to the specific rules or statutes; and, (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action. A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Permitting Authority's final action may be different from the position taken by it in this Public Notice of Intent to Issue Air Permit. Persons whose substantial interests will be affected by any such final decision of the Permitting Authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation: Mediation is not available in this proceeding.
