

P.E. CERTIFICATION STATEMENT

PERMITTEE

Klausner Holding USA Inc.  
1297 Professional Drive, Suite 202  
Myrtle Beach, South Carolina 29577

Draft Permit No. 1210468-001-AC (PSD-FL-417  
Klausner Suwannee Mill  
Suwannee County

PROJECT DESCRIPTION

The Suwannee Mill is a lumber production facility located in Suwannee County approximately 1.5 miles east of the intersection of U.S. Highway 90 and 185<sup>th</sup> Road, Live Oak, Florida. The Suwannee Mill will have a maximum annual production of 700 million board feet per year of lumber. Key operations include log handling, sawing, heat production, lumber drying, planing and dispatching. The mill will have four natural gas fueled boilers and two woody biomass-fueled boilers that will provide hot water to the lumber drying kilns.

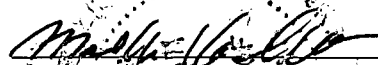

The project is subject to preconstruction review for the Prevention of Significant Deterioration (PSD) of Air Quality in accordance with Rule 62-212.400, Florida Administrative Code (F.A.C.). Best Available Control Technology (BACT) determinations were conducted for the following pollutants: volatile organic compounds (VOC), nitrogen oxides (NO<sub>x</sub>), carbon monoxide (CO), particulate matter (PM), PM with an aerodynamic diameter less than or equal to 10 micrometers (PM<sub>10</sub>) and PM with an aerodynamic diameter less than or equal to 2.5 micrometers (PM<sub>2.5</sub>).

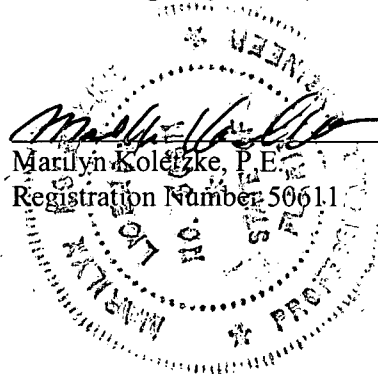

In addition to BACT emission standards and controls, the kilns and boilers will meet the applicable New Source Performance Standards (NSPS) and National Emission Standard for Hazardous Air Pollutants (NESHAP) contained in 40 Code of Federal Regulation, Parts 60 and 63.

Air quality impacts in the nearest PSD-Class I Okefenokee National Wildlife Refuge are less than the respective significant impact levels (SIL) for nitrogen dioxide (NO<sub>2</sub>), PM<sub>10</sub> and PM<sub>2.5</sub>. The projected Class II increment consumption of all projects in the area since 1977, including the proposed project, are less than the allowable increment consumption for these pollutants and averaging times.

Based on the required analyses, there is reasonable assurance that the proposed project will not cause or significantly contribute to a violation of any ambient air quality standard or PSD increment.

*I HEREBY CERTIFY that the air pollution control engineering features described in the above referenced application and subject to the proposed permit conditions provide reasonable assurance of compliance with applicable provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Chapters 62-4 and 62-204 through 62-297. However, I have not evaluated and I do not certify aspects of the proposal outside of my area of expertise (including, but not limited to, the electrical, mechanical, structural, hydrological, geological, and meteorological features).*
