Re: Fines Burning Permit Application

Dear Mr. Smallwood:

The subject application requested a permit to install the Fines Burning System on No. 2 Power Boiler. The purpose of this letter is to request an amendment to allow installation of the Fines Burning System on No. 1 Power Boiler.

As was discussed in our meeting in Perry on October 22, 1981, the two boilers are identical in design and the only change required in the permit is to replace "Power Boiler No. 2" with "Power Boiler No. 1".

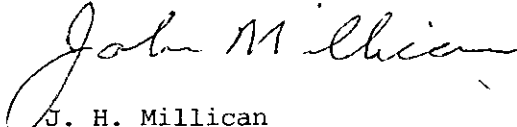

The change will be an improvement in the control of the environmental impact of the proposed system because the old controls on No. 1 Power Boiler recently were replaced with new electronic controls which have been computerized. Also, the boiler has been rebricked.

As agreed by phone with Mr. Clair Fancy and in consideration of the amendment, we will extend the time limit for processing the permit from October 27, 1981, to November 2, 1981.

Your personal support and the cooperation of your staff in expediting this permit application are greatly appreciated. We are very optimistic that the results of the project will be significant in reducing consumption of fossil fuel.

Very truly yours,

THE BUCKEYE CELLULOSE CORPORATION

J. H. Millican

WAIVER OF 90 DAY TIME LIMIT
UNDER SECTION 120.60(2), FLORIDA STATUTES

License (Permit, Certification) Application No. AC 62-45987
Applicant's Name: BUCKEYE CELLULOSE

The undersigned has read Section 120.60(2), Florida Statutes, and fully understands the Applicant's rights under that section.

With regard to the above referenced license (permit, certification) application, the Applicant hereby with full knowledge and understanding of (his) (her) (its) rights under Section 120.60(2), Florida Statutes, waives the right under Section 120.60(2), Florida Statutes, to have the application approved or denied by the State of Florida Department of Environmental Regulation within the 90 day time period prescribed in Section 120.60(2), Florida Statutes. Said waiver is made freely and voluntarily by the Applicant, is in (his) (her) (its) self-interest, and without any pressure or coercion by anyone employed by the State of Florida Department of Environmental Regulation.

This waiver shall expire on the 2 day of NOVEMBER 19 81.

The undersigned is authorized to make this waiver on behalf of the applicant.

Date

Section 120.60, Florida Statutes

(2) When an application for a license is made as required by law, the agency shall conduct the proceedings required with reasonable dispatch and with due regard to the rights and privileges of all affected parties or aggrieved persons. Within 30 days after receipt of an application for a license, the agency shall examine the application, notify the applicant of any apparent errors or omissions, and request any additional information the agency is permitted by law to require. Failure to correct an error or omission or to supply additional information shall not be grounds for denial of the license unless the agency timely notified the applicant within this 30 day period. The agency shall notify the applicant if the activity for which he seeks a license is exempt from the licensing requirement and return any tendered application fee within 30 days after receipt of the original application or within 10 days after receipt of the timely requested additional information or correction of errors or omissions. Every application for license shall be approved or denied within 90 days after receipt of the original application or receipt of the timely requested additional information or correction of errors or omissions. Any application for a license not approved or denied within the 90-day period or within 15 days after conclusion of a public hearing held on the application, whichever is latest, shall be deemed approved and, subject to the satisfactory completion of an examination, if required as a prerequisite to licensure, ²(the license) shall be issued. The Public Service Commission, when issuing a license, and any other agency, if specifically exempted by law, shall be exempt from the time limitations within this subsection. Each agency, upon issuing or denying a license, shall state with particularity the grounds or basis for the issuance or denial of same, except where issuance is a ministerial act. On denial of a license application on which there has been no hearing, the denying agency shall inform the applicant of any right to a hearing pursuant to s. 120.57.

SUBJ: BACT Recommendation for Buckeye Cellulose, Air Construct
Permit AC 62-45987

The project involves new technology for a test program burning wood fines in an existing oil fired boiler. The applicant is assuming that all of the ash will be emitted as TSP. This is the worst case situation and would result in an emission of 308 pounds per hour of particulate after controls. The existing carbonaceous rule would set a limit of .3 lbs/MBTU for existing boilers, or in this case 75 lbs/hour. As this is a test project designed to perfect the boiler design and size the control equipment, BACT should take this into account. My recommendation is that the 308 lb/hr limit be set as a cap with the ultimate goal after the test program the system will meet the limit for new carbonaceous boilers of .2 lbs/MBTU. During the proposed two year test program measurements should be made on the inlet to the exhaust system prior to the side stream scrubber, on the inlet to the scrubber, and on the exhaust from the scrubber. Particle sizing on all of these samples should be analyzed. After the end of the two year test period, a new application for construction for full conversion shall be submitted reflecting the actual emissions. The control equipment selected after the test period shall be capable of achieving the emission limit set for new carbonaceous fuel burning equipment.
