Re: Taylor County - Air Permitting
Buckeye Florida Limited Partnership
Energy Independence Project – Public Notice
Project No. 1230001-023-AC

Dear Mr. Mitchell,

Attached is an affidavit from Mr. Donald D. Lincoln, publisher of the Perry News-Herald/Taco Times, confirming that the "Intent to Issue" for the above referenced project was published on Friday, July 11, 2008.

If you have any questions, please contact me at (850) 584-1398.

Sincerely,

Buckeye Florida Limited Partnership

David C. Weeden
Environmental Program Manager

PUBLIC NOTICE OF INTENT TO ISSUE AIR PERMIT

Florida Department of Environmental Protection Division of Air Resource Management, Bureau of Air Regulation Draft Air Permit No. PSD-FL-397 / Project No. T230001-023 AC Buckeye Florida, Limited Partnership, Foley Energy Independence Project Taylor County, Florida

Applicant: The applicant for this project is Buckeye Florida, Limited Partnership, the applicant's authorized representative and mailing address is: Mr. Howard Owen, Vice President of Wood Cellulose Manufacturing, Buckeye Florida, Limited Partnership, One Buckeye Drive, Perry, Florida 32348.

Facility Location: Buckeye Florida, Limited Partnership operates an existing dissolving grade Kraft process pulp mill in Taylor County at One Buckeye Drive, which is east of US 19, south of SR 30, and southeast of Perry, Florida.

Project: The applicant, Buckeye Florida, Limited Partnership, submitted an application for an air construction permit for the Foley Energy Independence Project at the existing Foley Mill. The proposed project includes the following work: conversion of the Nos. 2 and 3 Recovery Boilers from direct contact evaporator units to low-odor, non-direct contact evaporator units; permanent shutdown of the black liquor oxidation system once conversion of the recovery boilers is complete; addition of two new forced-circulation/crystallizer black liquor concentrators and a black liquor storage tank to the existing multiple effect evaporator system; installation of a new 28 megawatt condensing steam turbine electrical generator set; and miscellaneous common system changes including piping, ductwork, pumps, tanks, etc. Only 12 MW are expected to be generated as a result of this project. Future steam improvement projects may take advantage of the additional capacity.

As defined in Rule 62-210 200 of the Florida Administrative Code (F.A.C.) and based on the air permit application, the project potentially results in the following significant net emissions increases: 1715 tons per year of carbon monoxide (CO); 769 tons per year of nitrogen oxides (NO_x); 237 tons per year of particulate matter (PM); and 183 tons per year of particulate matter with an aerodynamic diameter of 10 microns or less (PM₁₀). The project does not result in significant emissions increases of sulfuric acid mist, sulfur dioxide or volatile organic compounds. Pursuant to Rule 62-212 400, F.A.C., the project is subject to PSD preconstruction review for CO, NO_x, and PM/PM₁₀ emissions, which requires determinations of the Best Available Control Technology (BACT) for the PSD significant pollutants.

The Nos 2 and 3 Recovery Boilers will be the only units being modified or constructed that emit the PSD significant pollutants. Therefore, the Department made preliminary BACT determinations for the Nos. 2 and 3 Recovery Boilers based on the following: an electrostatic precipitator to control and minimize PM/PM₁₀ emissions and stack opacity; and boiler design and operating practices to minimize CO and NO_x emissions. The provisions regulating PM emissions will serve as a surrogate for controlling PM₁₀ emissions. To ensure compliance with the new BACT standards, the draft permit requires continuous monitoring and recording of opacity, CO emissions and NO_x emissions.

The Department reviewed an air quality analysis prepared by the applicant. There is no predicted significant impact on the PSD Class I increments in the St. Marks National Wilderness Area, which is the closest PSD Class I area to the facility. The following table shows the maximum predicted PSD Class II increment for nitrogen dioxide (NO₂) consumed by all sources in the area, including this project.

Summary of PSD Class II Increment Analysis

Pollutant	Averaging Time	Allowable	Increment Consumed	Percent
		Increment (ug/m ³)	(ug/m ³)	
NO ₂	Annual	25	1.3	5%

The other PSD significant pollutants were predicted to have no significant impacts in the PSD Class II area in the vicinity of the project. Based on the analysis, emissions from the project will not significantly contribute to, or cause a violation of, any state or federal ambient air quality standards. A draft permit was originally issued for this project on June 13, 2008. The applicant filed a request for an extension of time in which to file a petition. The applicant and the Department reached a mutual agreement to clarify several conditions of the original permit and issue a revised draft permit for publication. The previous draft permit package is hereby rescinded and replaced with the revised draft permit package.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.), and Chapters 62-462-210, and 62-212, F.A.C. The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Florida Department of Environmental Protection's Bureau of Air Regulation is the Permitting Authority responsible for making a permit determination for this project. The Bureau of Air Regulation's physical address is 111 South Magnolia Drive, Suite 4, Tallahassee, Florida 32301, and the mailing address is 2600 Blair Stone Road, MS #5505, Tallahassee, Florida 32399-2400. The Bureau of Air Regulation's phone number is 850/488-0114.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m., Monday through Friday (except legal holidays), at the address indicated above for the Permitting Authority. The complete project file includes the Draft Permit, the Technical Evaluation and Preliminary Determination, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.111, F.S. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address and phone number listed above.

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue an air permit for the project described above. The

issued for this project on June 10, 2008. The applicant filed a request for an extension of time in which to file a petition. The applicant and the Department reached a mutual agreement to clarify several conditions of the original permit and issue a revised draft permit for publication. The previous draft permit package is hereby rescinded and replaced with the revised draft permit package.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.), and Chapters 62-4.62-210, and 62-212, F.A.C. The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The Florida Department of Environmental Protection's Bureau of Air Regulation is the Permitting Authority responsible for making a permit determination for this project. The Bureau of Air Regulation's physical address is 111 South Magnolia Drive, Suite 4, Tallahassee, Florida 32301, and the mailing address is 2600 Blair Stone Road, MS #5505, Tallahassee, Florida 32399-2400. The Bureau of Air Regulation's phone number is 850/488-0114.

Project File: A complete project file is available for public inspection during the normal business hours of 8:00 a.m. to 5:00 p.m., Monday through Friday (except legal holidays), at the address indicated above for the Permitting Authority. The complete project file includes the Draft Permit, the Technical Evaluation and Preliminary Determination, the application, and the information submitted by the applicant, exclusive of confidential records under Section 403.111, F.S. Interested persons may contact the Permitting Authority's project review engineer for additional information at the address and phone number listed above.

Notice of Intent to Issue Air Permit: The Permitting Authority gives notice of its intent to issue an air permit to the applicant for the project described above. The applicant has provided reasonable assurance that operation of the proposed equipment will not adversely impact air quality and that the project will comply with all applicable provisions of Chapters 62-4.62-204, 62-210, 62-212, 62-296, and 62-297, F.A.C. The Permitting Authority will issue a Final Permit in accordance with the conditions of the proposed Draft Permit, unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, F.S., or unless public comment received in accordance with this notice results in a different decision or a significant change of terms or conditions.

Comments: The Permitting Authority will accept written comments concerning the proposed Draft Permit and requests for a public meeting for a period of 30 days from the date of publication of the Public Notice. Written comments must be received by the Permitting Authority by close of business (5:00 p.m.) on or before the end of this 30-day period. In addition, if a public meeting is requested within the 30-day comment period and conducted by the Permitting Authority, any oral and written comments received during the public meeting will also be considered by the Permitting Authority. If timely received comments result in a significant change to the Draft Permit, the Permitting Authority shall revise the Draft Permit and require, if applicable, another Public Notice. All comments filed will be made available for public inspection.

Petitions: A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed with (received by) the Department's Agency Clerk in the Office of General Counsel of the Department of Environmental Protection, 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida 32399-3000 (Telephone: 850/245-2241; Fax: 850/245-2303). Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S., must be filed within 14 days of publication of this Public Notice or receipt of a written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Permitting Authority for notice of agency action may file a petition within 14 days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the approval of the presiding officer, upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Permitting Authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address, and telephone number of the petitioner; the name, address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination; (c) A statement of when and how each petitioner received notice of the agency action or decision; (d) A statement of all disputed issues of material fact; (e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action including an explanation of how the alleged facts relate to the specific rules or statutes; and; (g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the agency to take with respect to the agency's proposed action. A petition that does not dispute the material facts upon which the Permitting Authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Permitting Authority's final action may be different from the position taken by it in this Notice of Intent to Issue Air Permit. Persons whose substantial interests will be affected by any such final decision of the Permitting Authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation: Mediation is not available in this proceeding.
