Your application for this project has been received and reviewed for completeness. The following items are needed to complete your application.

1. The project appears subject to section 112(g) of the Clean Air Act, because of the projected emissions of styrene above 10 tons per year. A MACT proposal is needed. The proposal will be sent to DARM in Tallahassee for analysis. Provide this office with the MACT proposal or a copy of the proposal sent to DARM in Tallahassee.
2. The facility is subject to other permits from the DEP. Provide a statement that the other applications (such as Wetlands, Hazardous Waste, Domestic Waste, and Drinking Water) have been, or intend to be, sent to this office.
3. The company will need to track material usage and VOC emissions when it receives the permit. Provide a copy of a worksheet, which will be used to track twelve-month usage of resins and the VOC emissions.
4. The company paid for 50 tons of VOC emissions. Provide a statement that the limit is 40 tons instead of the 50 tons, based upon the permit fee.
5. The company requested a work limit of 2448 hours per year, when no limit is required. Provide a statement that a production limitation of 2448 hours per year is needed.

Pursuant to Rule 62-4.055, the applicant shall have ninety days after the Department mails a timely request for additional information to submit that information to the Department. If an applicant requires more than ninety days in which to respond to a request for additional information, the applicant may notify the Department in writing of the circumstances, at which time the application shall be held in active status for one additional period of up to ninety days. Additional extensions shall be granted for good cause shown by the applicant. A showing that the applicant is making a diligent effort to obtain the requested additional information shall constitute good cause. Failure of an applicant to provide the timely requested information by the applicable deadline shall result in denial of the application.
