Re: City of Tallahassee Sam O. Purdom Generating Station
Public Notice of Intent to Issue Air Construction
Permit Modifications and Title V Air Operation Permit Revision

Dear Mr. Fancy:

On Thursday, July 4, 2002, the City of Tallahassee published the Public Notice permits for the Sam O. Purdom Generating Station. The affidavit received from the *Tallahassee Democrat* confirming publication is attached.

If you have any questions regarding the proof of publication, please feel free to contact me at (850) 891-8850.

Sincerely,

Jennette Curtis
Director-Environmental Resources

**PUBLIC NOTICE OF INTENT TO ISSUE AIR
CONSTRUCTION PERMIT MODIFICATIONS AND TITLE V
AIR OPERATION PERMIT REVISION**

Florida Department of Environmental Protection

Draft Air Construction Permit Project No. 1290001-005-AC
(Modification of Permit No. PSD-FL-239 (Unit 8) and Permit
No. 1290001-002-AC (Auxiliary Boiler))
**DRAFT Title V Air Operation Permit Revision Project No.
1290001-006-AV**
(Revision to Title V Air Operation Permit No. 1290001-003-AV)

Sam O. Purdom Generating Station
Wakulla County, Florida

The Florida Department of Environmental Protection (permitting authority) gives notice of its intent to issue Air Construction Permit Modifications and Title V Air Operation Permit Revision to the City of Tallahassee (applicant) for the Sam O. Purdom Generating Station located at 667 Port Leon Drive in St. Marks, Wakulla County, Florida. The applicant's authorized representative and responsible official is Mr. Robert E. McGarrath, Production Superintendent. The applicant's address is: City of Tallahassee-Electric Utility, 300 South Adams Street, Tallahassee, Florida 32301.

Permit Project No. 1290001-005-AC involves the modification of two air construction permits; Permit No. PSD-FL-239 for the Unit 8 combined cycle gas turbine and Permit No. 1290001-002-AC for the auxiliary boiler. The applicant requested the following changes to the Unit 8 permit: clarify that the heat input rate is a function of the compressor inlet temperature and not necessarily ambient temperature; revise the temperature basis for the heat input rate from 95 degrees F to 59 degrees F; increase the heat input rate by approximately 8.5% for gas firing and 6.6% for distillate oil firing; allow periods of excess emissions resulting from major tuning of the dry low NOx combustion system for up to 72 hours per year; increase authorized periods of excess emissions from 4 to 6 hours per day during days with cold startups; and increase authorized periods of excess emissions from 2 to 4 hours per day during days with hot startups. For the auxiliary boiler permit, the applicant requested authorization to operate the auxiliary boiler when either Unit 7 or Unit 8 is not in operation. Lastly, the applicant requested a concurrent revision of Title V Air Operation Permit No. 1290001-003-AV to incorporate the above requests; revise the permit subsection regulating Boilers 5 and 6 to reflect permanent shutdown; and revise the emissions unit ID number for the Unit 8 combined cycle gas turbine to be consistent with the state's database. The Title V revision is issued as DRAFT Title V Air Operation Permit No. 1290001-006-AV.

The changes are expected to result in slight increases in potential emissions of the following pollutants: 19.52 tons of carbon monoxide per year; 3.6 tons of particulate matter per year; and 4.8 tons of volatile organic compounds per year. Although the Unit 8 combined cycle gas turbine is a Phase II Acid Rain Unit, potential emissions of nitrogen oxides and sulfur dioxide remain unchanged due to enforceable emissions caps. A review for the Prevention of Significant Deterioration is not required because any increases are well below the significant emission rate thresholds.

The permitting authority will issue the Air Construction Permit Modifications and the PROPOSED Title V Air Operations Permit Revision and subsequent FINAL Title V Air Operation Permit Revision, in accordance with the conditions of the Draft Air Construction Permit Modifications and the DRAFT Title V Air Operations Permit Revision unless a response received in accordance with the following procedures results in a decision of significant change of terms or conditions.

The permitting authority will accept written comments concerning the proposed Draft Air Construction Permit Modifications and the DRAFT Title V Air Operation Permit Revision issuance actions for a period of 30 (thirty) days from the date of publication of this Notice. Written comments should be provided to the Department's Bureau of Air Regulation at 2600 Blair Stone Road, Mail Station #5505, Tallahassee, FL 32399-2400. Any written comments filed shall be made available for public inspection. If written comments received result in significant changes, the permitting authority shall issue revised Draft Air Construction Permit Modifications and a revised DRAFT Title V Air Operation Permit Revision and require, if applicable, another "Public Notice".

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative hearing in accordance with sections 120.569 and 120.57 of the Florida Statutes (F.S.). The petition must contain the information set forth below and must be filed (received) in the Department's Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000. Petitions filed by any persons other than those entitled to written notice under Section 120.60(3), F.S. must be filed within 14 (fourteen) days of publication of the public notice or within 14 (fourteen) days of receipt of the notice of intent, whichever occurs first. Under Section 120.60(3), F.S., however any person who asked the permitting authority for notice of an agency action may file a petition within 14 (fourteen) days of receipt of this notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the applicant at the address indicated above, at the time of filing. The failure of any person to file a petition within the applicable time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S. or to intervene in this proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code.

A petition that disputes the material facts on which the permitting authority's action is based must contain the following information: (a) The name and address of each agency and each agency's file or identification number, if known; (b) The name, address and telephone number of the petitioner, and the name, address and telephone number of the petitioner's representative, if any, which shall be the address for all correspondence during the course of the proceeding; (c) An explanation of how petitioner's substantial rights are affected by the agency determination; (d) A statement of the material facts upon which the petitioner received notice of the proposed action; (e) A statement of all disputed material facts. If there are none, the petition must state a concise statement of the ultimate facts alleged, as well as the rules and statutes which entitle petitioner to relief; (f) A request for the specific rules or statutes the petitioner requires reversal or modification of the agency's proposed action; and (g) A Statement of the relief sought by the petitioner. The petition must precisely state the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the permitting authority's action is based shall state that the facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301.

Because the administrative hearing process is designated as a final agency action, the filing of a petition means that the permitting authority's final action may be different from the action taken by it in this notice of intent. Persons whose substantial interests will be affected by any such final decision of the permitting authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation is not available for this proceeding.

In addition to the above, pursuant to 42 United States Code (U.S.C.) Section 7661d(b)(2), any person may petition the Administrator of the EPA within 60 (sixty) days of the expiration of the Administrator's 45 (forty-five) day period as established at 42 U.S.C. Section 7661d(b)(1), to request issuance of any permit revision. Any petition shall be based only on objections to the permit revision that were raised in the public comment period provided in this notice, unless the petitioner demonstrates to the Administrator of the EPA that it was impracticable to raise such objections within the comment period or unless the grounds for such objection arose after the comment period. Filing of a petition with the Administrator of the EPA does not stay the effective date of any permit properly issued pursuant to the provisions of Chapter 62-213, F.A.C. Petitions filed with the Administrator of the EPA must meet the requirements of 42 U.S.C. Section 7661d(b)(2) and must be filed with the Administrator at: U.S. EPA, 401 M Street, S.W., Washington 20460.

A complete project file is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Permitting Authority
Bureau of Air Regulation
Florida Department of Environmental Protection
111 S. Magnolia Drive, Suite 4
Tallahassee, FL 32301
Telephone: 850-488-0114

Affected District Office
Northwest District Office
Florida Department of Environmental Protection
160 Governmental Center
Pensacola, FL 32501-5794
Telephone 850-595-8300

The complete project includes the Technical Evaluation, Preliminary Determination, the Draft Air Construction Permit Modifications, the DRAFT Title V Air Operation Permit Revision, the application, and the information submitted by the responsible official, exclusive of confidential records or information under Section 403.111 F.S. Interested persons may contact the responsible official at the above address, or call 850-488-0114, for additional information.

The Florida Department of Environmental Protection (per-
mitting authority) gives notice of its intent to issue Air Construc-
tion Permit Modifications and Title V Air Operation Permit Revi-
sion to the City of Tallahassee (applicant) for the Sam O.
Purdom Generating Station located at 667 Port Leon Drive in St.
Marks, Wakulla County, Florida. The applicant's authorized rep-
resentative and responsible official is Mr. Robert E. McGarrath,
Production Superintendent. The applicant's address is: City of
Tallahassee-Electric Utility, 300 South Adams Street, Tallahas-
see, Florida 32301.

Permit Project No. 1290001-005-AC involves the modification of
two air construction permits; Permit No. PSD-FL-239 for the
Unit 8 combined cycle gas turbine and Permit No.
1290001-002-AC for the auxiliary boiler. The applicant re-
quested the following changes to the Unit 8 permit: clarify that
the heat input rate is a function of the compressor inlet tem-
perature and not necessarily ambient temperature; revise the
temperature basis for the heat input rate from 95 degrees F to 59
degrees F; increase the heat input rate by approximately 8.5%
for gas firing and 6.6% for distillate oil firing; allow periods of
excess emissions resulting from major tuning of the dry low
NOx combustion system for up to 72 hours per year; increase
authorized periods of excess emissions from 4 to 6 hours per day
during days with cold startups; and increase authorized periods
of excess emissions from 2 to 4 hours per day during days with
hot startups. For the auxiliary boiler permit, the applicant re-
quested authorization to operate the auxiliary boiler when ei-
ther Unit 7 or Unit 8 is not in operation. Lastly, the applicant
requested a concurrent revision of Title V. Air Operation Permit
No. 1290001-003-AV to incorporate the above requests; revise
the permit subsection regulating Boilers 5 and 6 to reflect per-
manent shutdown; and revise the emissions unit ID number for
the Unit 8 combined cycle gas turbine to be consistent with the
state's database. The Title V. revision is issued as DRAFT Title V
Air Operation Permit No. 1290001-006-AV.

The changes are expected to result in slight increases in potential
emissions of the following pollutants: 19.52 tons of carbon
monoxide per year; 3.6 tons of particulate matter per year; and
4.8 tons of volatile organic compounds per year. Although the
Unit 8 combined cycle gas turbine is a Phase II Acid Rain Unit,
potential emissions of nitrogen oxides and sulfur dioxide remain
unchanged due to enforceable emissions caps. A review for the
Prevention of Significant Deterioration is not required because
any increases are well below the significant emission rate
thresholds.

The permitting authority will issue the Air Construction Permit
Modifications and the PROPOSED Title V. Air Operations
Permit Revision and subsequent FINAL Title V Air Operation
Permit Revision, in accordance with the conditions of the Draft
Air Construction Permit Modifications and the DRAFT Title V
Operations Permit Revision unless a response received in ac-
cordance with the following procedures results in a decisionor
significant change of terms or conditions.

The permitting authority will accept written comments
concerning the proposed Draft Air Construction Permit Modifi-
cations and the DRAFT Title V Air Operation Permit Revision
issuance actions for a period of 30 (thirty) days from the date of
publication of this Notice. Written comments should be provided
to the Department's Bureau of Air Regulation at 2600 Blair
Stone Road, Mail Station #5505, Tallahassee, FL 32399-2400.
Any written comments filed shall be made available for public
inspection. If written comments received result in significant
changes, the permitting authority shall issue revised Draft Air
Construction Permit Modifications and a revised DRAFT Title V
Air Operation Permit Revision and require, if applicable,
another "Public Notice".

A person whose substantial interests are affected by the
proposed permitting decision may petition for an administrative
hearing in accordance with sections 120.569 and 120.57 of the
Florida Statutes (F.S.). The petition must contain the
information set forth below and must be filed (received) in the
Department's Office of General Counsel at 3900 Commonwealth
Boulevard, Mail Station #35, Tallahassee, Florida, 32399-3000.
Petitions filed by any persons other than those entitled to
written notice under Section 120.60(3), F.S. must be filed within
14 (fourteen) days of publication of the public notice or within
14 (fourteen) days of receipt of the notice of intent, whichever
occurs first. Under Section 120.60(3), F.S., however any person
who asked the permitting authority for notice of an agency
action may file a petition within 14 (fourteen) days of receipt of
this notice, regardless of the date of publication. A petitioner
shall mail a copy of the petition to the applicant at the address
indicated above, at the time of filing. The failure of any person to
file a petition within the applicable time period shall constitute a
waiver of that person's right to request an administrative
determination (hearing) under Sections 120.569 and 120.57, F.S.
or to intervene in this proceeding and participate as a party to
it. Any subsequent intervention will be only at the approval of
the presiding officer upon the filing of a motion in compliance
with Rule 28-106.205 of the Florida Administrative Code
(F.A.C.).

A petition that disputes the material facts on which the permitting authority's action is based must contain the following information: (a) The name and address of each agency affected and each agency's file or identification number, if known; (b) The name, address and telephone number of the petitioner; name, address and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how petitioner's substantial rights will be affected by the agency determination; (c) A statement of how and when the petitioner received notice of the agency action or proposed action; (d) A statement of all disputed issues of material fact. If there are none, the petition must so state; (e) A concise statement of the ultimate facts alleged, as well as the rules and statutes which entitle petitioner to relief; (f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and (g) A Statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the permitting authority's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designated to formulate final agency action, the filing of a petition means that the permitting authority's final action may be different from the position taken by it in this notice of intent. Persons whose substantial interests will be affected by any such final decision of the permitting authority on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above.

Mediation is not available for this proceeding.

In addition to the above, pursuant to 42 United States Code (U.S.C) Section 7661d(b)(2), any person may petition the Administrator of the EPA within 60 (sixty) days of the expiration of the Administrator's 45 (forty-five) day review period as established at 42 U.S.C. Section 7661d(b)(1), to object to issuance of any permit revision. Any petition shall be based only on objections to the permit revision that were raised with reasonable specificity during the 30 (thirty) day public comment period provided in this notice, unless the petitioner demonstrates to the Administrator of the EPA that it was impracticable to raise such objections within the comment period or unless the grounds for such objection arose after the comment period. Filing of a petition with the Administrator of the EPA does not stay the effective date of any permit properly issued pursuant to the provisions of Chapter 62-213, F.A.C. Petitions filed with the Administrator of EPA must meet the requirements of 42 U.S.C. Section 7661d(b)(2) and must be filed with the Administrator of the EPA at: U.S. EPA, 401 M Street, S.W., Washington, D.C. 20460.

A complete project file is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:
