PERMITTEE:  
Kearney Development Co., Inc.

Permit Number: 7774801-002-AO  
Expiration Date: January 15, 2001

**SPECIFIC CONDITIONS:**

MODIFICATION

1. No alterations shall be made to the portable soil cement plant that have the potential to increase air pollutant emissions without prior approval from the Department's Bureau of Air Regulation. The unit shall not operate more than 8,736 hours per year and shall not process more than 314,496 TPY cement.

EMISSIONS STANDARDS, TESTING, AND RECORD REQUIREMENTS

2. Visible emissions from the cement silo, aggregate hopper, aggregate storage area, and plant conveyers shall not exceed 15 percent opacity.
3. Visible emissions from the diesel engine shall not exceed 20 percent opacity pursuant to Rule 62-296.310(2), F.A.C.
4. The silo baghouse and diesel engine shall be tested annually for visible emissions by EPA Method 9 as described in 40 CFR 60, Appendix A (July 1, 1994) while cement is being transferred at a rate of approximately 36 TPH. Minimum test time is 30 minutes. The baghouse shall be inspected and repaired, if needed, prior to erection of the silo at any location. The results of each inspection and any maintenance done on the baghouse shall be recorded in the plant operation log. These records shall be kept for a minimum of two years for inspection by the Department.
5. If there is a good reason to believe the emission standard is not being met, the Department may require that compliance with the standard be demonstrated using EPA Method 9 as described in 40 CFR 60, Appendix A (July 1, 1995), in accordance with Rule 62-297.340(2), F.A.C. A written log of daily cement transfer shall be kept for a minimum of two years and available for inspection to the Department.
6. The Department's District Air Program Administrator and the County Air Program Administrator that have jurisdiction over the site where the plant will be tested, shall be notified in writing at least 15 days in advance of any compliance test scheduled to be conducted on this plant.
7. Reasonable precautions shall be taken to prevent and control generation of unconfined emissions of particulate matter in accordance with the provisions in Rule 62-296.310(3), F.A.C. These provisions are applicable to any source, including but not limited to, vehicular movement, transportation of materials, construction,

alterations, or industrial related activities such as loading, unloading, storing, and handling of materials. Wetting the material with water to minimize dust is considered a reasonable precaution for this plant.

8. Operation of this facility shall not cause, suffer, allow or permit the discharge of air pollutants which cause or contribute to an objectionable odor (Rule 62-296.320(2), F.A.C.).

#### ADMINISTRATIVE REQUIREMENTS

9. At least 7 days prior to relocating the plant, the permittee shall notify the Department's District Air Program Administrator and, if applicable, the County Air Program Administrator of all potential sites that the plant may be operated at in the next 30 days. The notification will be on DEP Form 62-210.900(3). All potential construction sites may be shown on a USGS topographic map. Unless notified otherwise by an environmental agency, the plant may be relocated and operated at any site on the list.

10. Submit to the Bureau of Air Regulation for this plant, each calendar year, on or before March 1, an emission report for the preceding calendar year containing the following information pursuant to Section 403.061(13), Florida Statutes:

- (A) Annual amount of materials and/or fuels utilized.
- (B) List of sites where the unit operated during the year.
