Re: Statewide Permit #7775018-002-AC

Dear Wayne:

I would like to thank you for your assistance the past several weeks in regards to the set up of our portable concrete batch plant at the new extension of 9A at Bay Meadows Boulevard. Portions of the plant will be arriving onsite next week and we are projecting a testing date of 3/6/00. We have contacted Lee Daniel with Controlled Environments for Industry, Inc. to perform the testing. This will be the same plant and the same inspector you saw as your last visit to our project on I-95 two years ago.

As I have mentioned to you on the phone today, I have not heard from your permitting department since 2/4/00. From your discussion with Jim Woosely, I gather he saw no permitting problems, so I am proceeding with my permit requirements as discussed with Jonathan Holtom with FDEP. This action is necessary if I am to report the stack test projection date to you in a timely manner.

If you need additional information, please do not hesitate to contact me.

Sincerely,

Corky Lane
