AIR REGULATION**

Re: **BALLENGER PAVING COMPANY, INC., 7775027-001-AC**

Mr. Hanks:

This office has reviewed the construction application for the above mentioned facility. The application is considered complete.

Pinellas County does have a requirement for an operation and maintenance plan (O&M Plan) when control equipment is utilized. When the construction permit is issued, it should reflect the need to submit an O&M Plan with the application for an operating permit. The recommended language is:

An Operation and Maintenance (O&M) Plan for the C & W Manufacturing and Sales Company, Inc., Model CW-RA-200 shall be submitted with the application for an operating permit. The O&M logs shall be maintained for a minimum of two years and made available upon request. At a minimum, the O&M plan shall include:

- A. The operating parameters of the control device.
- B. A timetable for the routine maintenance of the pollution control device.
- C. A time table of routine weekly, bi-monthly, or monthly observations of the pollution control device.
- D. A list of the type and quantity of the required spare parts which are stored on the premises for the control device.
- E. A record log which shows, at a minimum, when maintenance was performed, what maintenance was performed, and by whom.

[Pinellas County Pinellas County Code, Section 58-128]

If the permit is issued with the general language stating that the facility must comply with local requirements, Ballenger would need to submit an acceptable O&M Plan with their notice to relocate. The preference is to have the specific language in the permit.

If you have any questions, contact this office at (813) 464-4422 or Suncom 570-4422.

Sincerely,

Gary Robbins, Environmental Program Manager
Air Quality Division
