Doug,

The Department received a request for an extension of time on their construction permit No. 7775176-001-AC on June 30, 2003. We issued an intent to issue and a public notice for this extension per your advice on July 30, 2003.

The permittee didn't do the public notice, instead requested the OGC to grant a 60-day extension of time in which to file a petition. The request copy was received in this office on August 18, 2003. This office didn't receive any information regarding OGC's action on the request.

The Department received an operation permit application on October 8, 2003. The Department also received another copy of a request to OGC for an additional extension of time to file a petition.

Based on these information, the questions are:

1. What happens to the extension project? It remains open in ARMS.
2. What happens to the operation permit application? Can it be processed and issued while extension project is not resolved?
If the answer is yes, then we have other problems. 90-day time clock in ARMS cannot be met with the current expiration of construction permit, and then, the facility will be without any valid permit.

Please advise ASAP. Thanks,

Quaid Noor
