Barbara,

Please post the attached documents as soon as possible. This project includes a minor AC permit that is the basis for the SIP submittal that Tom Rogers is submitting on Tuesday, so this permit needs to get to the applicant for publication. I already sent them a Word version of the Public Notice so they can get with their newspaper.

Tom, I think you have already seen this draft permit that allowed OUC to model out of BART, but I did add one more condition to it reducing their opacity standard from 40% to 20%. Not that it goes into the model, but worth mentioning for visibility improvement if it fits in your BART exemption portion of the SIP submittal.
