RE: South Broward Resource Recovery Project

Dear Mr. Brandon:

This correspondence is to confirm the meeting scheduled in your offices at 1:00 p.m, November 17, 1986. The purpose of this meeting is three-fold: (1) to discuss the position of Broward County Resource Recovery Office on Best Available Control Technology (BACT) for the South Broward Resource Recovery Project and the technical basis for that position; (2) to discuss the policy decision of the Florida Department of Environmental Regulation (DER) concerning rule making for these facilities (i.e., municipal solid waste fired boilers); and (3) to discuss the requirements of EPA regarding technical and administrative matters for obtaining the PSD permit for the project; of importance is the schedule for obtaining the PSD permit.

Attending for the county will be Mr. Thomas Henderson, Project Director of the Broward County Resource Recovery Office, Mr. Timothy A. Smith, attorney for Broward County, a representative of Signal Environmental Systems, Inc., the vendor for the project, and, myself and Messrs. Ronald Mills and Donald Elias as technical consultants. Also attending for informational purposes will be Mr. Tom Keith of Palm Beach County. Mr. Keith is interested in the technical and administrative matters required to obtain a PSD Permit for the Palm Beach County project.

It is our understanding that Messrs Bruce Miller and Wayne Aronson will attend the meeting. In addition, I have contacted and informed DER of the meeting and requested the attendance of either Mr. Steven Smallwood and/or Mr. Claire Fancy.

As we discussed, Mr. Henderson will be sending you further information in about a week. This information should assist us in focusing on the relevant facts of the South Broward Project at the meeting.
